## Faculty and Program Mission

### Faculty Mission:

The faculty of Commerce and Business Administration in Future University is committed to achieve educational effectiveness that keeps pace with modern trends and technology in education, to prepare a distinguished graduate with professional values and ethics capable of innovation and competition locally and regionally, and excellence in scientific research, community service and participate in achieving sustainable development.

### Accounting Mission:

The Accounting Program at the Faculty of Commerce and Business Administration, Future University, is committed to achieve excellence in the educational process to prepare a graduate who meets the requirements of the local and regional labor market, produce efficient scientific research, participate in community service and sustainable development, while adhering to ethics and professional values.

## Program Objectives

### Program objectives:

1. Enabling students to apply the acquired knowledge and skills in solving and addressing contemporary accounting problems.
2. Providing an effective environment for education, scientific research, and community service process.
3. Qualifying a graduate who can cope with the rapid and successive changes in the field of accounting and in business in general.
4. Meeting the needs of the labor market for accountancy cadres who are scientifically and professionally qualified.
5. Developing personal and self-learning skills and communicating with the others with an emphasis on commitment to ethics.
6. Encouraging theoretical and applied scientific research to address contemporary issues in a way that serves society.

## A - Basic Information

1. **Program title:** Accounting
2. **Program type:** Single
3. **Department responsible for the program:** Accounting Department.
4. **Date of program approval:** 2006
5. **Departments participate in the program:**
  - Management Information System Department
  - Business Administration Department.
  - University Requirements and training center.
  - English unit.
  - University Requirement Unit.
6. **Date of program specification approval:**
  - Department Council Approval: 06/09/2021
  - Faculty Council Approval: 27/09/2021
7. **Program Coordinator:** Dr. Ola Shawky
8. **Program Internal evaluators:** Prof. Iman Saad Eldeen
9. **Program External evaluator:** Prof. Fawzy Mohamed Hekal

## B - Specialized Information

### 1- Accounting Program Aims

*By the end of the program graduates should be able to:*

- A1.** Interpret the necessary knowledge that enhance scientific thinking, problem solving techniques and report writing skills **(General NARS: 1.1)**
- A2.** Employ the appropriate knowledge and skills base to pursue a career managing and developing accounting practices in a contemporary business context. **(General NARS: 1.2)**
- A3.** Apply Accounting practices related to corporate social responsibilities in a positive manner **(General NARS: 1.2)**
- A4.** Support the community with professional expertise in accounting to better serve and communicate effectively and efficiently with external and internal environment. **(General NARS: 1.3)**
- A5.** Examine how new international trends affect accounting practices in different business organizations. **(General NARS: 1.4)**
- A6.** Cope with the changing standards and government regulations of the accounting professional. **(General NARS: 1.4)**
- A7.** Comprehend the fundamentals of partnerships, corporations, cost accounting, auditing, and other contemporary aspects of accounting by continuing education. **(General NARS1.5)**
- A8.** Demonstrate the professional moral, legal rules, and ethical standards related to accounting. **(General NARS: 1.6)**
- A9.** Prepare feasibility studies and investment projects evaluations. **(General NARS: 1.7)**
- A10.** Use different information technology techniques in accounting fields. **(General NARS: 1.8)**

## 2- Intended Learning Outcomes (ILOs):

### a. Knowledge and Understanding:

- **Accounting General ILOs: Knowledge and Understanding**

*By the end of the program the graduate should be able to:*

- a1. Describe different management organizational types, structures, and functions. (General NARS: 2.1)
- a2. Discuss the different environments in which organizations operate and the different methods to deal with it. (General NARS: 2.2)
- a3. Illustrate recent developments, new trends and contemporary issues in business practices. (General NARS: 2.3)
- a4. Explain the concepts, principles, and theories related to business practices. (General NARS: 2.4)
- a5. Relate other social sciences relevant to accounting discipline. (General NARS: 2.5)
- a6. Identify the research methodology, analysis, and statistical techniques related to the field management sciences. (General NARS: 2.6)
- a7. Explain the interdisciplinary approaches and concepts between Accounting and other social sciences. (General NARS: 2.7)
- a8. Express all the ethical and disciplinary considerations in the business field. (General NARS: 2.8)

- **Accounting Specific ILOs: Knowledge and Understanding**

*By the end of the program the graduate should be able to:*

- a9. Describe different business organizations, legal forms, their interdepartmental relations, and functions. (ACC NARS: 1.1)
- a10. Comprehend the basics of accounting information systems and their relationship with decision support system. (ACC NARS: 1.2)
- a11. Relate accounting Knowledge, rules, and practices with other sciences (Human Resources Management, Finance, Management Information

- Systems, Law, Economics, Statistics, and Insurance). (ACC NARS: 1.3)
- a12.** Explain the principles of accounting theory including standards and applications (ACC NARS: 1.4)
- a13.** Discuss the recording, posting, analyzing, presenting, and interpreting procedures of the financial operations manually and electronically. (ACC NARS: 1.5)
- a14.** Identify various accounting rules, regulations and practices in real life within different institutions (non - profit organizations, banking sector, agriculture, commerce, and other companies). (ACC NARS: 1.6)
- a15.** Outline the phases of feasibility studies, procedures of asset valuation, financial planning, and budget preparations. (ACC NARS: 1.7)
- a16.** Comprehend financial information relevant to commercial and tax legislations and their accounting applications. (ACC NARS: 1.8)
- a17.** Review the standards and procedures used in internal auditing (ACC NARS: 1.9)
- a18.** Discuss different procedures, rules, and standards for auditing financial statements. (ACC NARS: 1.10)
- a19.** Identify different accounting transaction procedures for securities such as stocks, bonds, and treasury bills in different financial markets. (ACC NARS: 1.11)

## **b. Intellectual Skills:**

- **Accounting General ILOs: Intellectual Skills**

*By the end of the program the graduate should be able to:*

- b1.** Classify the different scientific approaches used in thinking and information systems usage. (NARS 4.1)
- b2.** Interpret the different approaches of creative thinking. (NARS 4.2)
- b3.** Evaluate critically the positive approaches and the negative drawbacks related to contemporary issues. (NARS 4.3)
- b4.** Analyze numerical data and its interpretation. (NARS 4.4)

**b5.** Choose the appropriate practices that enable organizations to transform threats to opportunities. (NARS 4.5)

**b6.** Integrate the subjective viewpoints in an objective scientific manner supported by business supports, financial data and research findings in the business discipline. (NARS 4.6)

- **Accounting Specific ILOs: Intellectual Skills**

*By the end of the program the graduate should be able to:*

**b7.** Assess the financial consequences of global events on accounting practices. (ACC NARS 3.1)

**b8.** Interpret accounting for financial transactions. (ACC NARS: 3.1)

**b9.** Select appropriate cost, taxation and auditing techniques based on the type of business organization. (ACC NARS 3.2)

**b10.** Choose the best accounting practices that suits different human resources and marketing functions. (ACC NARS: 3.2)

**b11.** Interpret accounting information and its indication to stakeholders. (ACC NARS 3.3)

**b12.** Infer the effect of human resources management, marketing, and information systems on different accounting practices. (ACC NARS: 3.3)

**b13.** Design accounting systems and suggest different methods to improve the working environment and the decision-making process. (ACC NARS: 3.4)

**b14.** Employ information systems in building accounting cycle according to new challenges. (ACC NARS: 3.4)

### **c. Professional and Practical skills:**

- **Accounting General ILOs: Professional and Practical Skills**

*By the end of the program the graduate should be able to:*

**c1.** Use organizational resources (physical, financial, human... etc.) efficiently and effectively. (NARS 3.1)

**c2.** Conduct different market research studies and analysis. (NARS 3.2)

**c3.** Examine different information sources and their validity. (NARS 3.3)

- c4. Analyze the various statistical data and interpret their economic and social indications. (NARS 3.4)
- c5. Design management, accounting and insurance information systems related to various business disciplines. (NARS 3.5)
- c6. Employ the appropriate scientific methods in solving problems. (NARS 3.6)
- c7. Appraise the performance of different organization through business monitoring and management control techniques. (NARS 3.7)
- c8. Prepare business reports in a scientific manner. (NARS 3.8)
- c9. Practice computer applications and information technology in the various business disciplines (NARS 3.9)
- c10. Use financial data, appraisal reports and other business reports for developing and improving organization performance. (NARS 3.10)
- **Accounting Specific ILOs: Professional and Practical Skills**  
*By the end of the program the graduate should be able to:*
  - c11. Use appropriate accounting methods and tools in preparing financial statements and footnotes. (ACC NARS 2.1)
  - c12. Prepare financial reports using information technologies and data base systems. (ACC NARS 2.1)
  - c13. Prepare budgets, feasibility studies and other reports for investment alternatives (ACC NARS 2.2)
  - c14. Employ different analysis methods and techniques to evaluate and monitor investments. (ACC NARS 2.2)
  - c15. Deploy proper presentation for financial information balancing between disclosure and its privacy. (ACC NARS 2.3)
  - c16. Present different accounting reports using the appropriate human resources, marketing, and information systems skills. (ACC NARS: 2.3)
  - c17. Apply appropriate methods and suitable accounting programs in selecting auditing samples. (ACC NARS 2.4)

**c18.** Implement various testing, examination, analyzing, auditing, documenting and reporting for various documents, accounts and financial statements.

(ACC NARS 2.5)

**c19.** Provide all related managerial, financial and tax consultation to different parties. (ACC NARS 2.6)

**c20.** Accomplish all professional assessments in the accounting and auditing work fields (ACC NARS 2.7)

#### **d. General and Transferable Skills:**

- **Accounting General ILOs: General & Transferable**

*By the end of the program the graduate should be able to:*

**d1.** Manage time effectively. (NARS: 5.1)

**d2.** Communicate effectively with others. (NARS: 5.2)

**d3.** Respect teamwork. (NARS: 5.3)

**d4.** Participate in continuous professional development and lifelong learning through developing intellectual and cognitive skills. (NARS: 5.4)

**d5.** Use both qualitative methods and problem-solving tools on individual and corporate levels. (NARS: 5.5)

**d6.** Apply communication skills techniques in Presentations and discussion. (NARS: 5.6)

**d7.** Enhance self and stress management skills. (NARS: 5.7)

**d8.** Implement creative, innovative, and continuous work techniques. (NARS: 5.8)

**d9.** Retrieve different scientific terminologies related to business practices (NARS: 5.9)

**d10.** Use English language properly in all discussions, research, and presentations (NARS: 5.10)

### 3- Academic Standards of the program:

- The faculty adopted the National Academic Reference Standards (NARS) issued by the National Authority for Quality Assurance and Accreditation of Education (NAQAAE), 2<sup>nd</sup> edition January 2009 for faculties of commerce and they were approved by:

- The Department council on 5/9/2016

- The faculty council No. 36 on 3/10/2016

*Review the following Appendices:*

- Appendix A:* NARS for faculties of Commerce
- Appendix B:* Graduate attribute vs program mission and objectives.
- Appendix C:* Program Vs NARS Matrix.
- Appendix D:* Program Aims Vs program ILO's.

### 4- Reference Standards (Benchmark)

- Not Applicable

### 5- Program Structure:

a- **Program duration:** 4 levels divided into 8 semesters for 4 Academic years.

b- **Program structure:**

- Actual hours: Theoretical (130), Practical (23), Total (153)
- Total credit hours: (130)

Courses		NARS	Program	
No.	Sciences Nature	%	Credit Hours	%
1	Basic Sciences	25%	33	25.5%
2	Humanities & Social Sciences	12.5%	15	11.5%
3	Specialization Courses	50%	67	51.5%
4	Sciences left to colleges	12.5%	15	11.5%
	<b>Total</b>	<b>100%</b>	<b>130</b>	<b>100%</b>

\***Humanities & Social Sciences:** PSC110, MGT 102, 2 Uni. Electives, LAW101, ECN102

\***Specialization Courses:** (Compulsory and Electives, Minor, SAT 101, SAT 201, MAT 101, FIN 201)

\***Sciences left to colleges:** (ENG KET, ENG PET, CSC101, REM 101, ECN 101, ECN 201)

\***Basic Sciences:** Rest of faculty requirements

\***Summer training:** 6 weeks at the end of the 2<sup>nd</sup> and 3<sup>rd</sup> year – 3 weeks each year

## c- Program Courses

### 1- University Requirements

- **Mandatory (Compulsory) Courses: (8 credit hours)**

Course Code	Course Name	Credit Hours	Prerequisites
ENG EL	English Elementary	0	-
ENG KET/KET A	English KET/KET Advanced	2	ENG KET
ENG PET/ ENG PET A	English PET/ PET Advanced	2	Placement test
CSC101	Introduction to Computer	2	-
PSC110	Human Rights	2	-

- **Elective Courses: (4 credit hours)**

Course Code	Course Name	Credit Hours	Prerequisites
MGT100	Small Business Management	2	-
PSY101	Introduction to Psychology	2	-
SOC101	Introduction to Sociology	2	-
ENV101	Introduction to Environmental Science	2	-
CSC102	Specialized Computer Applications	2	CSC101
SCT101	Scientific Thinking	2	-
CPS101	Communication and Presentation Skills	2	-

### 2- Faculty Requirements (63 credit hours):

Course Code	Course Title	Prerequisite	Credit hours
MGT101	Introduction to Management		3
ACT101	Introduction to Accounting		3
ECN101	Introduction to Microeconomics		3
MAT101	Business Mathematics		3
LAW101	Business Law		3
ECN102	Introduction to Macroeconomics		3
MGT102	Organization Behavior	MGT101	3
SAT101	Introduction to Business Statistics		3
ACT102	Financial Accounting	ACT101	3
REM101	Research Methodology		3
FIN201	Corporate Finance (1)		3
MGT201	Production and Operations Management	MGT101	3
ACT201	Cost Accounting	ACT102	3
MIS201	Introduction to Management Information Systems		3
MIS202	Introduction to Programming	MIS201	3

SAT201	Advanced Statistics	SAT101	3
ECN201	Money and Banking	ECN102	3

Course Code	Course Title	Prerequisite	Credit hours
HRM201	Introduction to Human Resources Management	MGT101	3
MGT401	Strategic Management	MGT101	3
MGT402	Feasibility Studies	ECN101, MGT101	3
<b>Total Credit Hours</b>			<b>63 hours</b>

### 3- Specialization core courses: (40 Credit Hours)

#### Compulsory Courses

Course Code	Course Title	Prerequisite
ACT301	Auditing	ACT102
ACT302	Intermediate Accounting	ACT102
ACT303	Advanced Cost Accounting	ACT201
ACT304	Managerial Accounting and Budgeting	ACT201
ACT305	Governmental Accounting	ACT 102
ACT306	Tax Accounting	ACT 302, Law 101
ACT401	Advanced Auditing	ACT 301, ACT 306
ACT402	Specialized Accounting	ACT302
GAC401	Graduation Project 1	REM101, SAT201
GAC402	Graduation Project 2	GAC401
	Elective (1)	
	Elective (2)	
	Elective (3)	
	Elective (4)	

#### • Major Electives:

Course code	Course Name	Prerequisites	Credit Hours	Theoretical hours	Practical Hours
MGT301	Negotiation Management	MGT101	3	3	-
MGT302	Business Communication	MGT101	3	3	-
MGT303	Small Business Management and Entrepreneurship	MGT101	3	3	-
ACT307	Computer Applications in Accounting	ACT102, CSC101	3	3	1
ACT308	Advanced Managerial Accounting	ACT303, ACT304	3	3	1

ACT403	Accounting Information Systems	MIS201, ACT302	3	3	1
ACT404	Advanced Accounting	ACT306	3	3	1
ACT405	International Accounting	ECN201, ACT302	3	3	1

• **Minor Courses: (15 Credit Hours)**

**Students can choose one of the following minors**

**List of Minor Courses/ Marketing Minor**

Course Code	Course Title	Credit Hours	Theoretical (Hours)	Practical (Hours)	Pre-requisite
MKT302	Consumer Behavior	3	3		MKT201
MKT303	Marketing Research	3	3	1	MKT201
MKT304	Integrated Marketing Communication	3	3	1	MKT201
MKT306	E-Marketing	3	3		MKT201
MKT401	Strategic Marketing	3	3	1	MKT201

**List of Minor Courses/ Finance Minor**

Course Code	Course Title	Credit Hour	Theoretical (Hours)	Practical (Hours)	Pre-requisite
MAT301	Insurance and Risk Management	3	3	1	MAT101
FIN301	Corporate Finance (2)	3	3	1	FIN201
FIN302	Bank Management	3	3	1	ACT101
FIN303	Investment and Portfolio Management	3	3	1	FIN201
FIN305	Financial Markets	3	3	1	FIN201

**List of Minor Courses/ HR Minor**

Course Code	Course Title	Credit Hours	Theoretical (Hours)	Practical (Hours)	Pre-requisite
HRM301	Performance Management	3	3	1	MGT101, HRM201
HRM302	Recruitment and Selection	3	3		HRM201
HRM303	Human Resources Planning	3	3		HRM201
HRM304	Training and Development	3	3		HRM303
HRM401	Strategic Human Resources Management	3	3	1	HRM201, MGT401

**List of Minor Courses/ Management Information Systems Minor**

Course Code	Course Title	Credit Hours	Theoretical (Hours)	Practical (Hours)	Pre-requisite
MIS302	E-Commerce	3	3		MIS201
MIS303	Data Base Systems	3	3	1	MIS201

MIS306	System Analysis and Design	3	3	1	MIS303
MIS307	Operating Systems	3	3	1	MIS303
MIS401	Decision Support Systems	3	3		MIS201

**Program courses distribution according to levels:**

**Level one – Fall**

Course Code	Course Title	Credit Hours	Theoretical (Hours)	Practical (Hours)	Pre-requisite
MGT101	Introduction to Management	3	3		
ACT101	Introduction to Accounting	3	3	1	
ECN101	Introduction to Microeconomics	3	3	1	
MAT101	Business Mathematics	3	3	1	
LAW101	Business Law	3	3		
<b>Total Credit Hours: 15 Hours</b>					

**Level one – Spring**

Course Code	Course Title	Credit Hours	Theoretical (Hours)	Practical (Hours)	Pre-requisite
ECN 102	Introduction to Macroeconomics	3	3	1	
MGT 102	Organization Behavior	3	3		MGT101
REM 101	Research Methodology	3	3	1	
SAT 101	Introduction to Business Statistics	3	3	1	
ACT 102	Financial Accounting	3	3	1	ACT101
<b>Total Credit Hours: 15 Hours</b>					

**Level Two – Fall**

Course Code	Course Title	Credit Hours	Theoretical (Hours)	Practical (Hours)	Pre-requisite

	Elective (4)	3	3		
<b>Total Credit Hours: 17 Hours</b>					

### 6- Course Contents

Review Appendix (E): Program ILOs and Courses Matrix  
Review Appendix (F): Courses Specification

### 7- Program Admission Requirements

**✚ Students, with the following qualifications, are eligible for admission at Future University:**

- Those who have The Egyptian General Secondary Certificate of Education (Thanaweya Amma) or its equivalent certificates according to rules issued by the Supreme Council of Private Universities. The University Council, considering rules of admission to the faculty, determines number of non-Egyptian students who might be admitted at the University.
- Those who receive the required grades in high school exam or its equivalent according to the Ministry of Higher Education policy toward private higher education. These grades should not be less than those spelled out in the Presidential Decree concerning the establishment of Future University.
- Those who successfully pass admission and competence tests, or any other tests determined by the University Council.
- Those who successfully pass high school exam or its equivalent required admission courses for the Faculty he/ she is applying for.
- Those who successfully pass medical exam determined by University Council.

**✚ Students with high school certificate or its equivalent from previous year might be admitted if the following conditions are met:**

- No more than one year elapsed since student received high school certificate or its equivalent.
- Student should have received minimum required grade for admission at the University according to the Presidential Decree of its establishment.

- Student should present a confirmation that he/she is not admitted to any Egyptian or equivalent University in the year he/she received his/ her high school certificate or its equivalent.
- Student should successfully pass competence tests or any other tests required by the University.
- Students who have been dismissed from state or private universities are ineligible for admission.

**+ English Language Requirements:**

Since English is the teaching language at FCBA, all applicants must go through an English placement exam as an enrollment condition for any degree program. Based on the exam score the students' English level is classified as Elementary level which is non-credit, Key English Test (KET) level or Preliminary English Test (PET). The student grades in ENG PET/ ENG PET A and in ENG KET/ ENG KET A is counted in their GPA

## 8- Regulations for progression and program completion:

- To receive a bachelor's degree, students must complete a four-year program in which they complete 130 credit hours which combine University requirements, Faculty requirements and Department requirements given that the minimum letter grade in any course is "D" and the minimum Cumulative Grade Point Average (CGPA) is "C" to be awarded a Bachelor of Science Degree (B.Sc.).

- **Semesters:**

Academic year is divided into two regular semesters (fall and spring); each semester consists of fifteen weeks. The Faculty could arrange for summer semester which covers six weeks where students would be allowed to register for a maximum of six credit hours.

- **Class Levels:**

- In First Level: Students should pass **36** Credit hours as follows: Compulsory **32** – Elective **4**
- In Second Level: Students should pass **33** Credit hours as follows: Compulsory **33** - Elective **0**

**Student would select his/ her major starting with third academic year after earning minimum of 54 credit hours.**

- In Third Level: Students should pass **30** Credit hours as follows: Compulsory **24** - Elective **6**

- In Fourth Level: Students should pass **31** Credit hours as follows:  
Compulsory **25** - Elective **6**

### ▪ **Academic Load**

The number of credit hours that the student register during the academic semester shall not exceed (18) eighteen credit hours and shall not be less than (12) twelve credit hours. But the summer semester the normal load a normal load shall not exceed 7 credit hours (9 credit hours in case of graduation). Students who are eligible to register an in exceptional cases, according to the rules set by the faculty and based on the proposal of the Academic Advisor, the student may register three credit hours more than the maximum after the approval of the Dean, provided that his cumulative GPA is not less than 3.5 in non-graduation cases or 2.0 in graduation cases.

### ▪ **Attendance and Absence:**

Attending classes and labs are essential where students benefit from lectures and discussions with professors and classmates. Students should attend regularly to avoid any negative impact on their grades.

- **In case of absence** of one of the semester tests without acceptable excuse, students will not be given another test opportunity. If absence percentage in one of the courses reached, during the first twelve weeks of the semester, 25% of attendance the student may withdraw from the course. If absence percentage, however, exceeded 25% the student would not be allowed to withdraw, attend lectures, attend final exam and will receive F in the course (the faculty deprive the students from attending final exam). The student receives two warning before being prohibited
- **In case of Incomplete Course** students who are unable to complete a course may be permitted to continue work in that course beyond the examination period. In such a case, a grade of “I”, for “incomplete,” is assigned. The students must decide with the professor to complete the course maximum within one week after the beginning of the new academic semester. Failure to do this results in recording grade F for that course.

### ▪ **Warnings**

If a student at the end of a semester received CGPA less than 2.0 he/she would be put under probation and academic supervision for 4 successive semesters. He/she should upgrade the CGPA to 2.0 by the end of the successive semester. In this case a written warning should be sent to the student and a copy to his parents explaining the consequences of his lack of commitment to the academic supervision.

During that period, student would not be allowed to register for more than 12 Credit Hours in a semester in addition to the English course. The student should meet with his academic advisor to follow up on the student status with other professors. By the end of this period, if the student did not receive GPA of 2.0, he/ she would be terminated from the University.

### ▪ Repeating Courses

**Repeating a course in case of a student wishes to improve his/her grades:** A student might repeat a course to improve its grade. In this case, the higher grade will be calculated into the GPA and the previous grade will be erased from the student's record. If a student wishes to repeat a course for a second time, he/she should present an appeal to students' affairs council with the view of the academic advisor and the Faculty council.

**Repeating a course in case a student receives F:** A student is allowed to repeat a course which he failed. If he/she successfully passes the course, F would be erased from his/her transcripts and the new grade will be calculated in his GPA.

**Change of Courses:** Students who wish to drop or add any course must follow the rules which are determined by registration office in the Faculty. Students will not be allowed to drop and add any course without prior permission from his academic advisor, students may withdraw courses. A grade of “W” will be assigned to students in the withdrawn courses. o Students will receive a grade of “F” if they stop attending classes without officially dropping or withdrawing the course.

**Grading scheme:** Each instructor evaluates students' activities during the semester (attendance, semester exams, assignments and mid - terms) in addition to final written exam at the end of the semester. The students' course work represents 60% of the total course grade while the final exam represents 40% of the total course grade, except some courses that has different nature such as graduation project. Course grading schemes are represented in the below table:

Grade	%	GPA
A	≥ 90%	4.0
A-	= 85% > 90%	3.7
B+	= 80% > 85%	3.3

B	= 75% > 80%	3.0
B-	= 70% > 75%	2.7
C+	= 65% > 70%	2.3
C	= 60% > 65%	2.0
C-	= 55% > 60%	1.7
D+	= 53% > 55%	1.3
D	= 50% > 53%	1.0
F	< 50%	0.0

- For any student to pass the course he/ she should receive at least 50% of the course grade (D).
- The students receive no grade in case (1) if the student withdraw from the course (withdraw), or (2) the student did not enter the final exam but submit an excuse accepted by the faculty (incomplete).
- GPA at the end of each semester is calculated as follows:

GPA= Total of (Grade × Number of Credit Hours for each course) ÷ Number of Credit Hours received during study years.

## 9- Evaluation of the students in the program:

Method	Measured (ILOs)
Written examination: (Midterm and final exams)	To assess: <ul style="list-style-type: none"> <li>▪ knowledge &amp; understanding</li> <li>▪ Intellectual skills</li> </ul>
Practical Exam	To assess: <ul style="list-style-type: none"> <li>▪ Practical &amp; professional skills</li> <li>▪ General and transferable skills</li> </ul> (In course ACT 307 – Computer Application in Accounting)
Course work activities Assignments, quizzes, individual and teamwork projects, Research, and reports.	To assess: <ul style="list-style-type: none"> <li>▪ knowledge &amp; understanding</li> <li>▪ Intellectual skills</li> <li>▪ Practical &amp; professional skills</li> <li>▪ General and transferable skills</li> </ul>
Graduation project:	To assess: <ul style="list-style-type: none"> <li>▪ knowledge &amp; understanding</li> <li>▪ Intellectual skills</li> <li>▪ Practical &amp; professional skills</li> <li>▪ General and transferable skills</li> </ul>

## 10- Evaluation of Program:

Evaluator	Tool	Sample
1. Senior student	Questionnaires	Not less than 25%
2. Alumni	Questionnaires	Not less than 25%
3. Stakeholders	Questionnaires, interview	Representative for all sectors
4. Internal evaluator (s)	Reports	Reports 1-2
5. External Evaluator(s)	Reports	Reports 1-2

## 11- Teaching and learning methods

- A mixture of traditional lecturing and advanced interactive methods of teaching is offered to students to gain both knowledge, hands-on experience and skills. The program integrates classroom study and workplace experience as follows.

- **Synchronous:** Interactive lectures, online interactive lectures, problem-solving, case studies and others
- **Asynchronous:** Recorded online lectures, recorded lectures, power points, uploaded worksheets
- **In-class activities:** students are usually required to work in class, submit and discuss papers and course work assignments.
- **Out-class and self-learning activities:** some courses require students to conduct field studies and visits, assignments, individual projects, teamwork projects, reports, etc.
- **Graduation projects.**
- **Field (summer) training:** students are required to undertake summer training (total 6 weeks, 3 weeks / per year) during the second and the third year in any organization relevant to his field of interest.
- **Teaching resources and Technology:** the faculty applies up-to-date interactive teaching technologies, Smart Boards and Modular Object-Oriented Dynamic Learning Environment (Moodle), which enrich and facilitate the learning process and provide opportunities for wider range of on-line interactions between students and instructors. Added to this are white boards as well as Audio-Video equipment, and Microsoft teams, and zoom, etc.

**Program Coordinator:** *Dr. Ola Shawky*

**Head of the department :** *Associate Professor Dina Krema*

**Date:** *27/9/2021*

## National Academic Reference Standards

## أولاً : المعايير الأكاديمية القياسية العامة لخريج كليات التجارة

### 1. المواصفات العامة لخريج كليات التجارة:

يجب أن يكون خريج كلية التجارة قادراً على:

- 1.1 استخدام المنهج العلمي فى التفكير وحل المشكلات.
- 1.2 توظيف المعارف والمهارات المكتسبة فى مجال التخصص لخدمة المجتمع والبيئة المحيطة بشكل إيجابي.
- 1.3 التواصل والاتصال الفعال بالآخرين.
- 1.4 التفاعل مع المستجدات والمتغيرات العالمية واستشراف طبيعة وتأثير تلك المستجدات والمتغيرات على مجال تخصصه.
- 1.5 التعليم المستمر لتطوير المعارف والمهارات المهنية المرتبطة بمجال التخصص
- 1.6 الالتزام وتحمل المسؤولية وإنجاز الأعمال المسندة إليه بما يتفق مع القواعد القانونية والمعايير الأخلاقية والمهنية.
- 1.7 إعداد دراسات جدوى المشروعات وتقييم المقترحات الاستثمارية.
- 1.8 استخدام الحاسب الآلي وتكنولوجيا المعلومات.

### 2. المعارف والمفاهيم:

يجب أن يكون الخريج قد اكتسب المعارف و قادرا على فهم:

- 2.1 الأشكال والأنواع المختلفة لمؤسسات الأعمال والسمات المميزة لكل منها
- 2.2 البيئات المختلفة التي تعمل فيها المنظمات وأساليب التعامل معها.
- 2.3 التطورات والاتجاهات الحديثة والقضايا المعاصرة المرتبطة بمجال التخصص
- 2.4 المبادئ الأساسية والنظريات والاتجاهات والمدارس الفكرية فى مجال التخصص
- 2.5 العلوم وثيقة الصلة بالتخصص الذي يدرسه الطالب.
- 2.6 مناهج البحث العلمي وأدواته وأساليب القياس والتحليل.
- 2.7 التكامل بين العلوم التجارية وغيرها من العلوم الاجتماعية.
- 2.8 أخلاقيات الأعمال والممارسة المهنية فى مجال التخصص.

### 3. المهارات المهنية:

يجب أن يكون الخريج مكتسب المهارات المهنية التالية:

- 3.1 التوظيف الفعال للموارد المادية والبشرية والموارد الأخرى وتنميتها و المحافظة عليها
- 3.2 القيام بدراسات وتحليل الأسواق.
- 3.3 البحث عن مصادر المعلومات المختلفة والتحقق من صدقها.
- 3.4 جمع البيانات والإحصائيات و تحليلها وتفسيرها وما تعكسه من مؤشرات اقتصادية واجتماعية.
- 3.5 تصميم وتشغيل النظم الإدارية والمحاسبية والتأمينية كل فى مجال تخصصه.
- 3.6 استخدام الأساليب العلمية فى حل المشكلات العملية.
- 3.7 أسس ومبادئ الرقابة وتقييم الأداء.
- 3.8 إعداد وعرض وتفسير التقارير فى مجال التخصص بأسلوب علمي.
- 3.9 استخدام تطبيقات الحاسب الآلي وتكنولوجيا المعلومات فى مجال التخصص
- 3.10 استخدام وتوظيف نتائج البحوث والدراسات فى تطوير العمل وتحسين مستويات الأداء.

#### 4. المهارات الذهنية:

يجب أن يكون الخريج قادرا على:

- 4.1 التحليل والاستنتاج وإتباع المنهج العلمي فى التفكير.
- 4.2 تطبيق أسس ومبادئ التفكير الإبتكاري.
- 4.3 النقد والتمييز واكتشاف العناصر الإيجابية والسلبية فى المسائل والقضايا المطروحة
- 4.4 التعامل مع الأرقام وتحليلها وتفسير مدلولاتها.
- 4.5 التعامل الايجابي مع المواقف المختلفة بما يمكن من تحويل التهديدات إلى فرص
- 4.6 عرض الأفكار ووجهات النظر بوضوح وإبداء الرأي بأسلوب علمي مدعم بالأدلة والموضوعية.

## 5. المهارات العامة:

يجب أن يكون الخريج مكتسباً للمهارات العامة التالية:

- 5.1 الإدارة الفعالة للوقت.
- 5.2 الاتصال الفعال والتأثير في الآخرين.
- 5.3 العمل الجماعي.
- 5.4 التنمية المعرفية والفكرية والتعلم الذاتي المستمر.
- 5.5 استخدام أساليب حل المشكلات على المستوى الفردي أو المؤسسي بكفاءة عالية.
- 5.6 العرض والتقديم والحوار.
- 5.7 إدارة الذات والتعامل مع ضغوط العمل.
- 5.8 الابتكار والتطوير والتحسين المستمر في العمل.
- 5.9 استخدام المصطلحات الفنية ذات الصلة بموضوعات البرنامج.
- 5.10 الإلمام بإحدى اللغات الأجنبية واسعة الانتشار.

## ثانياً: برنامج المحاسبة والمراجعة:

### 1. المعارف والمفاهيم:

إلى جانب المعارف العامة والفهم التي يجب أن يكتسبها خريج كلية التجارة يجب أن يكتسب خريج برنامج المحاسبة والمراجعة المعارف والمفاهيم التالية:

- 1.1 الإلمام بنوعيات مؤسسات الأعمال والهيئات والمنظمات وأطرها القانونية وأنشطتها الاقتصادية وطبيعتها الفنية.
- 1.2 الإطار العام لنظم المعلومات (الكلية و الجزئية) وعلاقتها بدعم اتخاذ القرار
- 1.3 جوانب المعرفة المحاسبية و علاقتها بالعلوم ذات الصلة (العلوم السياسية - الاقتصادية - القانون - التأمين - إدارة الأعمال - الإحصاء)
- 1.4 مفهوم ومقومات النظرية المحاسبية ومعاييرها وتطبيقاتها.
- 1.5 إجراءات التسجيل - التبيويب - التحليل - العرض - التفسير للعمليات المالية المعدة يدوياً والكترونياً.

1.6 قواعد وأصول وأحكام تطبيق المعارف المحاسبية المتنوعة في الواقع العملي علي اختلاف نوعياته (هيئات حكومية وغير هادفة للربح - هيئات اقتصادية عامه - منشآت خاصة :صناعية - زارعية تجارية - خدمية).

1.7 مراحل وإجراءات وأساليب إج راء داراسات الجدوى المالية للمشروعات، وتقييم الأصول والالتزامات وأساليب التخطيط المالي وإعداد الموازنات.

1.8 تفهم التشريعات التجارية والضريبية والمالية ذات الصلة وتطبيقاتها.

1.9 معايير وإجراءات مراجعة الحسابات الداخلية (قبل وبعد الصرف).

1.10 مبادئ وقواعد وإجراءات المراجعة ( التدقيق ) الخارجية للقوائم المالية

1.11 أحكام المعاملات ذات الصلة بالأوراق المالية (الأسهم - السندات - الأذون ٠٠٠ ) ، وتداولها (محليا وخارجيا ) ومؤشراتها.

## 2. المهارات المهنية والعملية:

إلى جانب المهارات المهنية العامة التي يجب أن يكتسبها خريج كلية التجارة يجب أن يكون خريج برنامج المحاسبة والمراجعة قادرا على:

2.1 تطبيق الطرق والأساليب والإجراءات والنماذج المحاسبية الملائمة وإعداد التقارير والقوائم المالية وملحقاتها.

2.2 إعداد الموازنات التخطيطية المالية والنقدية ودراسات الجدوى والتحليل والتقييم لبدائل الاستثمار ماليا ومحاسبيا وتقارير متابعة التنفيذ.

2.3 العرض الجيد للمعلومات من خلال التقارير المحاسبية سواء داخل المنشأة او خارجها (مع الموائمة بين الإفصاح المستهدف وسرية المعلومات).

2.4 اختيار العينة الملائمة للمراجعة وتطبيق الأساليب والبرامج المناسبة لإجرائها وفق الظروف المحيطة.

2.5 إجراء الفحص و التدقيق والمقارنة والاستنتاج والتدليل والتوثيق للمستندات والحسابات والقوائم.

2.6 تقديم الاستشارات المالية والضريبية والإدارية ذات الصلة.

2.7 اجتياز الاختبارات المهنية في مجال المحاسبة والمراجعة التي تعقدتها الجهات صاحبة الاختصاص.

### 3. المهارات الذهنية:

إلى جانب المهارات الذهنية لخريجي كلية التجارة يجب أن يكون خريج برنامج المحاسبة والمراجعة قادرا على:

- 3.1 تفسير الإحداث الاقتصادية وما يسفر عنها من معاملات مالية وتوجيهها محاسبيا بالأسلوب الملائم.
- 3.2 تمييز واختيار الطرق والأساليب المحاسبية الملائمة لطبيعة نشاط المنشأة.
- 3.3 تفسير المعلومات والأرقام المحاسبية ومدلولاتها لكل من يهمله الامر.
- 3.4 ابتكار وتصميم النظم المحاسبية وأدلة العمل واقتراح التحسين المستمر وفق المتغيرات الحادثة.

#### التوزيع النسبي لساعات تدريس مقررات البرنامج:

مدة البرنامج : ٤ سنوات.

هيكل البرنامج

• عدد الساعات (120 - 140)

الزامى 120

اختيارى 30

اجمالي 150

مقررات المناهج	عدد	%
مقررات العلوم الأساسية	١٠	٢٥%
مقررات العلوم الاجتماعية والإنسانية	٥	١٢,٥%
مقررات علوم التخصص	٢٠	٥٠%
مقررات من علوم أخرى (حاسب آلى و.....)	٥	١٢,٥%

- التدريب الميداني : تدريب ميداني لطلاب الفرقتين الثانية والثالثة لمدة ٣ أسابيع فى كل فرقة

	<i>Contact Hours</i>				
Contact Hours	Theoretical	Tutorial	Practical		
2	2	-	-		
Course Prerequisite(s)	Not Applicable				
Approval Date Of course Specification	18/7/2022				

## II. Overall Aims of the Course

Upon completion of this course, students will be able to:

- Apply the A2 academic reading and writing course to enable student's skills they have developed throughout the years and to progress toward an advanced level of literacy.
- Analyze the varieties of challenging readings and discover the characteristics and conventions used by scholars in different disciplines.
- Demonstrate professional responsibilities, ethical, cultural and societal aspects in the A2 course to develop the core transferable skills in critical thinking, reading and writing that they will use in their university courses, regardless of their faculties.
- Use effectively communication skills.
- Carry out self-learning strategies for reading and writing more efficiently and for approaching new writing tasks.

### III. Program ILOs Covered by the Course

Program ILOs Covered by the Course			
Knowledge and Understanding	Intellectual Skills	Practical /professional Skills	General and Transferable Skills
			d1, d2, d4, d6, d10

### IV. Intended Learning Outcomes of the Course (ILOs)

**a. Knowledge and Understanding**

---

*On completing the course, the student should be able to:*

- a1. Discuss different aspects of life.
- a2. Discuss principles of recognizing text types.
- a3. Identify master few simple grammatical structures and sentence patterns in a learned repertoire.
- a4. Discuss the fundamental concepts that explain basic vocabulary range of isolated words and phrases related to particular situations.

**b. Intellectual Skills**

---

*On completing the course, the student should be able to:*

- b1. Analyze facts and information from texts.
- b2. Determine measurement criteria to evaluate information
- b3. Analyze texts through graphic organizers
- b4. Engage and communicate activities.
- b5. Analyze the functionality of inferring meaning from various texts.

**c. Practical / Professional Skills**

---

*On completing the course, the student should be able to:*

- c1. Evaluate different methods to produce varied paragraphs.
- c2. Analyze and design different means to construct descriptive sentences.
- c3. Evaluate new ideas.
- c4. Implement charts to organize ideas.
- c5. Acquire a set of fundamental research skills from different resources to manipulate simple phrases and sentences about themselves and imaginary people.

**d. General and Transferable Skills**

---

*On completing the course, the student should be able to:*

- d1. Apply communication skills and techniques in presentations and report writing.
- d2. Work in a team effectively and efficiently considering time and stress management.
- d3. Exploit a range of learning resources to understanding different cases.

## II. Overall Aims of the Course

Upon completion of this course, students will be able to:

- Compare, evaluate, and select methodologies of the various techniques introduced within the course.
- Apply the basic knowledge that enhances skills of reading and writing skills that develop the student's language practice.
- Use fundamental and advanced topics and functional lexis provide the reference by which language is introduced and recycled within clear natural contexts.
- Combine and evaluate different concepts of writing through a range of texts, by understanding genre specific conventions, and developing confidence by planning and discussions and by applying both process and product approaches.

### III. Program ILOs Covered by the Course

Program ILOs Covered by the Course			
Knowledge and Understanding	Intellectual Skills	Practical / Professional Skills	General and Transferable Skills
			d2, d4, d6, d10

### IV. Intended Learning Outcomes of the Course (ILOs)

#### a. Knowledge and Understanding

*On completing the course, the student should be able to:*

- a1. Describe different aspects of festivals, celebrations, and school and education.
- a2. Discuss methodologies of how people can communicate
- a3. Identifies the up-to-date methods to infer meaning from various texts.
- a4. Outline methods to summarize a given text or paragraph

#### b. Intellectual Skills

*On completing the course, the student should be able to:*

- b1. Determine measurement criteria to differentiate between two texts
- b2. Evaluate information
- b3. Analyze texts through graphic organizers
- b4. Relate their knowledge.
- b5. Predict proposal content using visuals.

#### c. Practical / Professional Skills

*On completing the course, the student should be able to:*

- c1. Use different methods to write varied paragraphs.
- c2. Install and maintain different means to generate descriptive sentences.
- c3. Evaluate ideas.
- c4. Implement charts to organize ideas.

#### d. General and Transferable Skills

*On completing the course, the student should be able to:*

- d1. Exploit a range of learning resources.
- d2. Utilize effectively general course facilities.
- d3. Use graphic organizers to analyze and produce.

- **Date:** 18/7/2022

## I. Course Information

Course Code	CSC 101	Course Name	Introduction to computer		
Level	1	Specialization	All faculty programs		
Department Offering the Course	Computer Science				
Credit Hours	<i>Credit Hours</i>				
	Total Credit Hours	2	Theoretical	Tutorial	Practical
		2	2	-	-
	<i>Contact Hours</i>				
Contact Hours	2	Theoretical	Tutorial	Practical	
	2	2	-	-	
Course Prerequisite(s)	Not Applicable				
Approval Date Of course Specification	18/7/2022				

## II. Overall Aims of the Course

### Upon completion of this course, students will be able to:

- Analyze the requirements to understand different components in computer system and operations of the computer systems.
- Demonstrate knowledge and understanding of the basic elements of computer hardware and software and their roles in a computer system.
- Combine and evaluate different tools and facilities.
- Use modern techniques to use Internet and WWW for searching and browsing information.
- Comprehend deeply the basic concepts of software developments.
- Compare, evaluate and select methodologies to solve the algorithmic problems using pseudo code and flow chart.
- Comprehend the computer language and different number systems.

### III. Program ILOs Covered by the Course

Program ILOs Covered by the Course			
Knowledge and Understanding	Intellectual Skills	Practical / Professional Skills	General and Transferable Skills
	b1	c9	d2, d4, d6

### IV. Intended Learning Outcomes of the Course (ILOs)

#### a. Knowledge and Understanding

---

*On completing the course, the student should be able to:*

- a1. Describe the basic of software development.
- a2. Define the basics of application software.
- a3. Identify basic computer terminology.
- a4. List different components in computer system and operations of the computer systems.

#### b. Intellectual Skills

---

*On completing the course, the student should be able to:*

- b1. Analyze and design a solution for computing problems considering limitations and constrains.
- b2. Solve the algorithmic problems using pseudo code and flow chart.

#### c. Practical / Professional Skills

---

*On completing the course, the student should be able to:*

- c1. Run computing equipment in different physical environment.
- c2. Install and maintain different supporting tools for construction and documentation software systems.
- c3. Realize information storage and retrieval skills in computing software systems.
- c4. Acquire a set of fundamental research skills from different resources.

#### d. General and Transferable Skills

---

*On completing the course, the student should be able to:*

- d1. Exploit a range of learning resources.
- d2. Apply communication skills in presentations and report writing using various methods and tools.

Approval Date Of course Specification	18/7/2022				

## II. Overall Aims of the Course

**Upon completion of this course, students will be able to:**

- Apply the basic concepts and theories of human rights, the development of human rights framework and multi- disciplinary character of the field as an area of the study.
- Demonstrate professional responsibilities, ethical, cultural, and societal aspects of Human Rights, the international covenant on economic, social, and cultural rights and all related agreements.
- Deal with the state of human rights in Egypt and the Arab world.
- Analyze the requirements to develop human rights framework.
- Use modern techniques to study the role of civil society.
- Use effectively communication skills.

### III. Program ILOs Covered by the Course

Program ILOs Covered by the Course			
Knowledge and Understanding	Intellectual Skills	Practical / Professional Skills	General and Transferable Skills
a5, a8	b2, b6	c8	d2, d3, d4, d6, d10

### IV. Intended Learning Outcomes of the Course (ILOs)

#### a. Knowledge and Understanding

*On completing the course, the student should be able to:*

- a1. Discuss the links, contests, and conflicts between (largely, but not exclusively, economic) globalization and human rights.
- a2. Identify the ways of promoting and protecting human rights
- a3. Discuss power relationships and roles of diverse actors, including civil society.
- a4. Explain public policy implications, particularly as they relate to Egypt in the Middle East as well as global contexts.

#### b. Intellectual Skills

*On completing the course, the student should be able to:*

- b1. Determine measurement criteria to differentiate between two texts.
- b2. Evaluate information.
- b3. Analyze texts through graphic organizers.
- b4. Implement their knowledge.
- b5. Prepare proposals and presentations to predict content using visuals.

#### c. Practical / Professional Skills

*On completing the course, the student should be able to:*

- c1. Run different soft skills by oral, written, presentations and visual means in a professional way.
- c2. Implement technical reports according to professional standards

#### d. General and Transferable Skills

*On completing the course, the student should be able to:*

- d1. Carry debates effectively with people about globalization and ways of promoting and protecting human rights.
- d2. Communicate effectively with others.
- d3. Participate in small teams.
- d4. Present any of the key themes of the course.
- d5. Use and discuss topics based on the readings.

## II. Overall Aims of the Course

**Upon completion of this course, students will be able to:**

Develops skills and knowledge needed to create and manage a small business, how to keep records, staffing, location, product presentation, pricing, promotion, and product distribution

### III. Program ILOs Covered by the Course

Program ILOs Covered by the Course			
Knowledge and Understanding	Intellectual Skills	Practical / Professional Skills	General and Transferable Skills
a1, a2	b3, b5, b6	c7, c8	d1, d2, d3, d4, d6, d7

### IV. Intended Learning Outcomes of the Course (ILOs)

#### a. Knowledge and Understanding

*On completing the course, the student should be able to:*

- a1. Define what is meant by the term business.
- a2. Explain some of the current problems small business face.
- a3. Describe the growing opportunities in franchising.
- a4. Identify mission and vision of any small business.
- a5. Explain how small business plan human resource needs.
- a6. Name some methods used for recruiting human resources.
- a7. Identify bootstrap marketing plan.
- a8. Outline the porter model.
- a9. Explain the major strategies of business—differentiation, cost, and focus.
- a10. Determine the major risks to business plan success

#### b. Intellectual Skills

*On completing the course, the student should be able to:*

- b1. Evaluate critical tools, functions, concepts and skills that are required for owner/managers of small business.
- b2. Develop a clear vision and meaningful mission statements.
- b3. Analyze strengths opportunities, weaknesses, and threats of any business by using SWOT Analysis.
- b4. Compare between buying franchise and starting new business
- b5. Suggest ways to reduce risk of business.
- b6. Formulate Balance sheet.
- b7. Construct business plan.

#### c. Practical / Professional Skills

*On completing the course, the student should be able to:*

- c1. Apply the skills necessary for venture creation and small business management.
- c2. Use business plan
- c3. Practice successful skills needed by small business owners.

#### d. General and Transferable Skills

*On completing the course, the student should be able to:*

- d1. Develop working in a project
- d2. Use higher order thinking and life-long learning
- d3. Lead the skills necessary for venture creation and small business management.

## II. Overall Aims of the Course

**Upon completion of this course, students will be able to:**

- Apply the basic concepts, theories and information about the psychological behavior and factors affecting it.
- Use basic science in psychology.
- Demonstrate professional responsibilities, ethical, cultural and societal aspects of psychology.
- Own the needed knowledge and skills in psychology.
- Carry out a self-learning and research in psychology field.

### III. Program ILOs Covered by the Course

Program ILOs Covered by the Course			
Knowledge and Understanding	Intellectual Skills	Practical / Professional Skills	General and Transferable Skills
a4, a7, a8	b2	c6	d1, d2, d6, d10

### IV. Intended Learning Outcomes of the Course (ILOs)

#### a. Knowledge and Understanding

*On completing the course, the student should be able to:*

- a1. Identify fundamental concepts and theories related to their environment and their psychological well-being.
- a2. Describe different human behavior and ways of its motivation.
- a3. Discuss different psychological terms, concepts and principles.
- a3. Discuss specifications and major perspectives in psychology.
- a4. Identify the criteria for current use of the ways that psychological theories are used to assess, predict and change human behavior.

#### b. Intellectual Skills

*On completing the course, the student should be able to:*

- b1. Analyze critical thinking using psychological theories and principles on personal relationships.
- b2. Implement the solutions of assessing human behavior.
- b3. Determine measurement criteria for predicting human behavior.

#### c. Practical / Professional Skills

*On completing the course, the student should be able to:*

- c1. Run observational methods to describe, explain, predict as well as control behavior of either one's or others.
- c2. Use psychology to influence and improve lives of human beings.
- c3. Install and maintain different supporting tools to make decisions in different situations effectively.
- c4. Manage time effectively.

#### d. General and Transferable Skills

*On completing the course, the student should be able to:*

- d1. Communicate effectively with others by applying the information they gained about how the body and mind work together.
- d2. Apply communication skills and techniques in presentations and report writing for range of audiences using various methods and tools.

## II. Overall Aims of the Course

**Upon completion of this course, students will be able to:**

- Apply the basic principles of sociology as an academic discipline and provide an analytical perspective of society and everyday life through sociological theories.
- Analyze the ways in which people interact and function in groups.
- Demonstrate professional responsibilities, ethical, cultural values, norms, social stratification, social problems, race and ethnicity, conformity, deviance, urban living, social change, and social movements.

### III. Program ILOs Covered by the Course

Program ILOs Covered by the Course			
Knowledge and Understanding	Intellectual Skills	Practical / Professional Skills	General and Transferable Skills
a4, a7, a8	b2		d2, d3, d6, d10

### IV. Intended Learning Outcomes of the Course (ILOs)

#### a. Knowledge and Understanding

*On completing the course, the student should be able to:*

- a1. Discuss specific areas of study within sociology.
- a2. Identify how the sociological perspective widens our understanding of society.
- a3. Identify the fundamental sociological theories, concepts, and research methods.

#### b. Intellectual Skills

*On completing the course, the student should be able to:*

- b1. Analyze social structure of society.
- b2. Evaluate social changes in modern societies
- b3. Determine measurement criteria to suggest new social issues to be studied during class time
- b4. Implement the understanding of the sociological perspective
- b5. Prepare proposals and presentations to correlate between social structures, social forces, and individual circumstances.
- b6. Implement a research project.

#### c. Practical / Professional Skills

*On completing the course, the student should be able to:*

- c1. Use sociological concepts, terms, and theories to the processes of everyday life.
- c2. Realize explanations for social inequality.
- c3. Implement the understandable complex ideas to practical situations.
- c4. Realize a research project.

#### d. General and Transferable Skills

*On completing the course, the student should be able to:*

- d1. Communicate effectively with others by applying the information they gained about how the body and mind work together.
- d2. Set goals and plans to achieve them.
- d3. Interact and work in group.

## II. Overall Aims of the Course

**Upon completion of this course, students will be able to:**

- Apply the basic concepts, terminology, principles, and theories in area of environmental science.
- Demonstrate professional responsibilities, ethical, cultural, and societal aspects in area of environmental science.
- Deal with the individual, social, environmental, organizational, and economic implications of the application of environmental science.
- Use effectively communication skills to emphasize research methodology, to encourage critical thinking, and to convey a scientific as well as systematic approach to environmental awareness.

### III. Program ILOs Covered by the Course

Program ILOs Covered by the Course			
Knowledge and Understanding	Intellectual Skills	Practical / Professional Skills	General and Transferable Skills
a2, a4, a5, a7	b1	c4	d2, d3, d4, d6, d10

### IV. Intended Learning Outcomes of the Course (ILOs)

#### a. Knowledge and Understanding

*On completing the course, the student should be able to:*

- a1. Define fundamental concepts and theories related to environmental science.
- a2. Discuss principles of managements and economics relevant to environmental science.

#### b. Intellectual Skills

*On completing the course, the student should be able to:*

- b1. Identify measurement criteria for different systems deployment in environmental science.
- b2. Discuss professional, moral, legal, and ethical issues related to environmental science.
- b3. Criticize research paper in environmental science area.

#### c. Practical / Professional Skills

*On completing the course, the student should be able to:*

- c1. Acquire a set of fundamental research skills from different resources of environmental science
- c2. Evaluate the risks and safety aspects related to environmental science.

#### d. General and Transferable Skills

*On completing the course, the student should be able to:*

- d1. Exploit a range of learning resources about environmental science
- d2. Work in a team to develop the requirement documentation about environmental science
- d3. Apply communication skills in presentations and report writing using various methods and tools.

## II. Overall Aims of the Course

**Upon completion of this course, students will be able to:**

- Analyze the requirements needed for solving certain business problems by computer applications.
- Identify graphic design principles that relate to web design and learn how to implement theories into practice
- Use database and electronic spreadsheets applications needed for organization's needs.

### III. Program ILOs Covered by the Course

Program ILOs Covered by the Course			
Knowledge and Understanding	Intellectual Skills	Practical / Professional Skills	General and Transferable Skills
a3	b1,b2	c9	d2, d3, d6

### IV. Intended Learning Outcomes of the Course (ILOs)

#### a. Knowledge and Understanding

*On completing the course, the student should be able to:*

- a1. Investigate emerging technology in shaping new processes, strategies, and business models.
- a2. Discuss the use and application of the databases, electronic spreadsheets, presentation/multimedia, graphics and webpage design software.
- a3. Identify a web application and explain how it works.
- a4. Explain concepts and techniques of Internet and Multimedia applications.

#### b. Intellectual Skills

*On completing the course, the student should be able to:*

- b1. Analyze different business problems to choose the most appropriate computer applications.
- b2. Analyze and evaluate the information in database organization.
- b3. Link different knowledge to solve professional problems.
- b4. Analyze and design a webpage based on business requirements.

#### c. Practical / Professional Skills

*On completing the course, the student should be able to:*

- c1. Practice on some well-known DBMS and electronic spreadsheet software.
- c2. Practice on some well-known graphics, presentation, and multimedia applications.
- c3. Design proper webpages, applying different HTML elements and Cascading Style Sheets (CSS).

#### d. General and Transferable Skills

*On completing the course, the student should be able to:*

- d1. Develop communication skills.
- d2. Apply communication skills in presentations and report writing.
- d3. Respect Teamwork
- d4. Develop skills in using computers and related digital technologies to solve problem

## II. Overall Aims of the Course

Upon completion of this course, students will be able to:

- Apply the basic concepts, theories and information about the scientific thinking and factors affecting it.
- Use basic science in scientific thinking.
- Demonstrate professional responsibilities, ethical, cultural, and societal aspects about thinking scientifically.
- Own the needed knowledge and skills in scientific thinking.
- Carry out a self-learning and research in scientific thinking field.

### III. Program ILOs Covered by the Course

Program ILOs Covered by the Course			
Knowledge and Understanding	Intellectual Skills	Practical / Professional Skills	General and Transferable Skills
a6	b2, b6	c6	d2, d4, d6

### IV. Intended Learning Outcomes of the Course (ILOs)

#### a. Knowledge and Understanding

*On completing the course, the student should be able to:*

- a1. Describe insights into their environment and their scientific thinking well-being.
- a2. Select different human behavior and ways of its motivation.
- a3. Define different scientific thinking terms, concepts and principles.
- a4. State major perspectives in scientific thinking.
- a5. Discuss the ways that scientific thinking theories are used to assess, predict and change human behavior.

#### b. Intellectual Skills

*On completing the course, the student should be able to:*

- b1. Apply critical thinking using scientific thinking theories and principles on personal relationships.
- b2. Assess human behavior in scientific thinking.
- b3. Criticize research paper in scientific thinking

#### c. Practical / Professional Skills

*On completing the course, the student should be able to:*

- c1. Use observational methods to describe, explain, predict as well as control behavior of scientific thinking.
- c2. Show scientific thinking to influence and improve lives of human beings.

#### d. General and Transferable Skills

*On completing the course, the student should be able to:*

- d1. Communicate effectively with others by applying the information they gained about scientific thinking.
- d2. Set goals and plans to achieve them.
- d3. Appreciate continuous professional development and lifelong learning.

Approval Date Of course Specification	18/7/2022				

## II. Overall Aims of the Course

**Upon completion of this course, students will be able to:**

- Differentiate between the main concepts and the fundamental aspects related to communication and presentation skills.
- Know the basic information to build and maintain positive relationships in a personal and professional environment; convey clearly organized messages to public audiences; work effectively in groups; and effectively perform during job interviews.
- Learn a wide range of integrated soft skills that college students require, including audience analysis, confrontation, note taking, active listening, memory, and test taking skills; as well as verbal and nonverbal communication, body language, self-management skills and leadership skills both in college and within the workforce.
- Develop many communication skills, this course primarily focuses on oral communication skills in a variety of contexts.
- Apply the right skill to deliver effective presentations that convince and compel any type of audience. Effective Presentation Skills will enable the students to develop core presentation skills and give them the opportunity to practice these skills.

### III. Program ILOs Covered by the Course

Program ILOs Covered by the Course			
Knowledge and Understanding	Intellectual Skills	Practical / Professional Skills	General and Transferable Skills
			d1, d2, d3, d4, d6, d7, d10

### IV. Intended Learning Outcomes of the Course (ILOs)

#### a. Knowledge and Understanding

*On completing the course, the student should be able to:*

- a1. Describe the fundamental characteristics of the communication process.
- a2. Outline the major concepts of communication: i.e. verbal skills, non-verbal skills, listening and responding skills.
- a3. Explain the major concepts of intrapersonal communication, interpersonal communication, group communication, public communication, organizational communication, and mediated communication.
- a4. Identify, analyze and evaluate these concepts in their own behaviors, demonstrate versatility in applying their communication skills across multiple communication contexts, and integrate the above skills in their personal and professional lives
- a5. State criteria used to evaluate oral presentations.

#### b. Intellectual Skills

*On completing the course, the student should be able to:*

- b1. Analyze their personality and determine the needed skills
- b2. Explore their goal and objectives and set the future plan
- b3. Apply the effective ways to give presentations
- b4. Compare and contrast different types of communication skills
- b5. Distinguish between different types of personal skills
- b6. Investigate the effects of developing communication and presentation skills on their future practical life
- b7. Evaluate an oral presentation according to established criteria.

#### c. Practical / Professional Skills

*On completing the course, the student should be able to:*

- c1. Participate positively in a business or personal communication process
- c2. Analyze their personality and chose the appropriate learning style
- c3. Design a Personal Development Plan and SWOT analysis
- c4. Know the professional way to participate in workshops and events
- c5. Practice working within a team
- c6. Prepare and give an effective presentation

**d. General and Transferable Skills**

*On completing the course, the student should be able to:*

- d1. Gain a range of skills that can assist in future career.
- d2. Motivate teamwork as well as oral and written communications
- d3. Develop the ability to think rationally and strategically particularly as a decision maker
- d4. Improve the ability to apply a range of communication strategies in different fields and on a personal and/or business level.

**V. Course Matrix Content**

Week No	Main Topic	Credit Hours: 2H		Course ILOs Covered by Topic (By ILO Code)			
		Theoretical	Practical	K.U.	I.S	P.P.S.	G.T. S
1	Importance of communication and presentation skills	2	-	a1, a2			d1, d4
2	<b>Major Goals for Presentations</b> 1.The primary forms of professional presentations 2.Identifying appropriate presentation topics 3.The strategies for analyzing an audience 4.The strategies for analyzing a speaking context	2	-	a2, a4	b3, b6	c4, c6	d1- d4
3	<b>Planning and Crafting Presentations</b> 1.Purpose statements and thesis statements 2.The characteristics of main points and the options for arranging them in a speech 3.Differentiate the goals of a compelling introduction and conclusion 4.The role of transitions in a speech	2	-	a3, a4	b3, b5, b6	c4- c6	d1-d4
4	<b>Finding Support for Your Presentation Goals (part1)</b> 1.Determine when supporting material is needed in a presentation 2.Evaluate the quality of supporting material 3.Compare and contrast various information-gathering techniques	2	-	a2, a5	b3, b6, b7	c4- c6	d1-d4

5	<b>Finding Support for Your Presentation Goals (part2)</b> 4. Summarize strategies for maximizing the effectiveness of presentation aids 5. Describe strategies for using supporting	2	-	a2, a5	b3, b6, b7	c4- c6	d1-d4
6	<b>Rehearsing and Delivering Successful Presentations (part1)</b> 1. Compare and contrast the four styles of delivering a presentation 2. Explain how to use visual and vocal cues effectively 3. Summarize the psychological, physical, and behavioral effects of stage fright	2	-	a2, a4, a5	b3, b6, b7	c4- c6	d1-d4
7	<b>Rehearsing and Delivering Successful Presentations (part2)</b> 4. Describe strategies for managing public speaking anxiety and using it to a speaker's advantage 5. Explain how to maintain presence and confidence while speaking	2	-	a2, a4, a5	b3, b6, b7	c4- c6	d1-d4
8	<b>Mid-term Exams</b>						
9	<b>Revision</b>						
10	<b>Effective Team Communication</b> 1. Stages of development for high-performing teams effective teams 2. Styles of leadership 3. Functional and dysfunctional approaches to making team decisions 4. Communicating virtually in teams	2	-	a1, a3	b2, b5, b6	c2- c5	d1-d4
11	<b>Communicating for Professional Success</b> 1. Summarize the six principles of communication	2	-	a1- a3	b1, b2, b6	c1, c2, c5	d1-d4

	2. Describe the principal elements of communication 3. Illustrate the principles of effective communication in professional networks 4. Explain credibility and identify the communication skills it embodies 5. Summarize the characteristics of competent communicators						
12	<b>Culture, Diversity, and Global Engagement</b> 1.Explain culture and co-cultures 2.Identify primary forms of human diversity 3.Explain the major cultural dimensions 4.Describe behavioral strategies for adapting to cultural norms and customs 5.Illustrate ways of engaging diversity in an ethical manner 6.Demonstrate communicating with cultural proficiency	2	-	a1- a3	b1, b2, b4, b6	c1, c2, c5	d1-d4
13	<b>Career Communication</b> 1.Formulate short-term and long-term career aspirations 2.Understand principles for professional networking 3.Develop a résumé, a cover letter, and a reference list 4.Describe strategies for developing an online professional persona	2	-	a2- a4	b2, b6	c1, c3	d1-d4
14-15	<b>Final exams</b>

## II. Overall Aims of the Course

This course provides students with the basic concepts and processes of management with the focus on skills, competencies, techniques, and knowledge needed to successfully manage an organization and identify ways to effectively and creatively respond to management problems and challenges.

### III. Program ILOs Covered by the Course

Program ILOs Covered by the Course			
Knowledge and Understanding	Intellectual Skills	Practical / Professional Skills	General and Transferable Skills
a1, a2, a4, a8	b2, b6	c1, c7, c10	d2, d4, d6, d8, d9, d10

### IV. Intended Learning Outcomes of the Course (ILOs)

#### a. Knowledge and Understanding

*On completing the course, the student should be able to:*

- a1. Outline the basic concepts and principles of management, process, organizations and relation with other fields.
- a2. Identify the key skills required for the contemporary management practice.
- a3. Mention the importance and major features of the corporate culture and the environment in which the organization operates.
- a4. Define managerial ethics and corporation social responsibility.
- a5. Discuss the four fundamental management functions of planning and decision making, organizing, leading, and controlling that comprise the manager's role.
- a6. Identify the various leadership styles and appraise the pros and cons of every style
- a7. Explain the motivation uses and communication to execute the leading function
- a8. Determine the controlling process and evaluate the subsequent responses of the process.
- a9. Discuss why it is important for managers to behave ethically
- a10. Identify the main steps of the planning process and explain the relationship between planning and strategy

#### b. Intellectual Skills

*On completing the course, the student should be able to:*

- b1. Analyze the relationship between the different management functions and their importance in achieving competitive advantage.
- b2. Distinguish ways in which organizational structure impacts strategy, performance and operations.
- b3. Illustrate the significance of properly planning in an organization.
- b4. Analyze the decision-making process to successfully respond to management problems and challenges.
- b5. Evaluate the changes in theories about how managers should behave to motivate and control employees
- b6. Compare among the different leadership styles and assess the major similarities
- b7. Evaluate the controlling process and question the theories of applying the control system within the organization

**c. Practical / Professional Skills**

*On completing the course, the student should be able to:*

- c1. Apply their knowledge and skills to explore opportunities as future managers and entrepreneurs.
- c2. Employ management concepts to deal with key organizational and managerial issues.
- c3. Illustrate the different skills needed by managers.
- c4. Analyze the relationship between business success and management.
- c5. Examine what leadership is and what makes for an effective leader

**d. General and Transferable Skills**

*On completing the course, the student should be able to:*

- d1. Work effectively and efficiently in groups.
- d2. Develop oral communication skills.
- d3. Communicate effectively with others.
- d4. Lead the student's ability to analyze complex situations of understanding cash flows management
- d5. Use the technological advances to gather information.

- **Date:** 18/7/2022

## I. Course Information

Course Code	ACT 101	Course Name	Introduction to Accounting		
Level	1	Specialization	All Faculty Programs		
Department Offering the Course	Department of Accounting				
Credit Hours	<i>Credit Hours</i>				
	Total Credit Hours	3	Theoretical 3	Tutorial 1	Practical -
	<i>Contact Hours</i>				
	Contact Hours	4	Theoretical 3	Tutorial 1	Practical -
Course Prerequisite(s)	Not Applicable				
Approval Date Of course Specification	18/7/2022				

## II. Overall Aims of the Course

By the end of the course, students should be able to understand financial statements, their types, objectives, contents, and the accounting equation and its effect of business events on it. Furthermore, this course enable the students to acquire the knowledge and skills necessary to identify the accounting cycle for a business, record, and post business transactions, and prepare trial balance and financial statements in service and merchandising companies

### III. Program ILOs Covered by the Course

Program ILOs Covered by the Course			
Knowledge and Understanding	Intellectual Skills	Practical / Professional Skills	General and Transferable Skills
a4, a5, a7	b2, b4	c6, c8, c10	d4, d5, d6, d8

### IV. Intended Learning Outcomes of the Course (ILOs)

#### a. Knowledge and Understanding

*On completing the course, the student should be able to:*

- a1. Define the nature of accounting, and its relationship to other sciences.
- a2. State the principles and standards of the accounting theory.
- a3. Discuss the different accounting terms and concepts.
- a4. Outline different forms of organizations.
- a5. Explain the relationship among the financial statements.
- a6. Identify in detail the steps of the accounting cycle.
- a7. Record basic economic transactions for assets, liabilities, stockholder's equity.
- a8. Explain the theory of debits and credits and apply accounting theory to business transactions

#### b. Intellectual Skills

*On completing the course, the student should be able to:*

- b1. Develop creative thinking to solve problems related to accounting.
- b2. Analyze business transactions and their interpretation
- b3. Choose the appropriate accounting principles and assumptions to be applied in different situations.
- b4. Apply an appropriate judgment in selecting and presenting information using various methods relevant to financial accounting.
- b5. Prepare income statement, owners' equity statement, and balance sheet.
- b6. Provide a reasoned argument to the solution of familiar and unfamiliar problems relevant to financial accounting

#### c. Practical / Professional Skills

*On completing the course, the student should be able to:*

- c1. Relate income statement, owners' equity statement, and balance sheet to different business organization.
- c2. Develop the skills needed to analyze financial statements effectively.
- c3. Select appropriate problem-solving method.
- c4. Link accounting theory principles with practical situations.

**d. General and Transferable Skills**

*On completing the course, the student should be able to:*

- d1. Select the appropriate accounting method for decision making.
- d2. Apply analytical techniques of qualitative and quantitative information, in order to use them effectively.
- d3. Develop self and cognitive skills.
- d4. Participate in continuous professional development and lifelong learning

**V. Course Matrix Content**

No. of weeks	Main Topic	Credit Hours: 3H		Course ILOs Covered by Topic (By ILO Code)			
		Theoretical	Practical	K.U.	I.S	P.P.S.	G.T. S
1-3	<b>Introduction, Accounting in action</b> 1. What is accounting. 2. The users and uses of accounting. 3. The generally accepted accounting principles.	3	1	a1-a4	b1-b3		d1- d3
4-5	<b>Recording Process</b> 1. What is an account and how it helps in the recording process. 2. Debits and credits and their use in recording business transactions. 3. The basic steps in the recording process. 4. What is a journal and how it helps in the recording process.	3	1	a1-a8	b1 – b6	c1-c4	d1-d3
6-7	<b>Adjusting the accounts</b> 1. The time period assumption. 2. The accrual basis of accounting. 3. The reasons for adjusting entries. 4. The major types of adjusting entries.	3	1	a4, a5, a6, a8	b1, b2, b3,b5	c1-c4	d1-d3
8	<b>Mid-term Exams</b>						
9-11	<b>Completing the accounting cycle</b> The process of closing the books.	3	1	a3, a4, a5, a8	b1-b3	c1-c4	d1-d3
12-13	<b>Accounting for merchandising operations</b> 1. The differences between service and merchandising companies.	3	1	a1, a2, a7, a8	b1, b2, b4-b6	c1-c4	d1-d3
14-15	<b>Final exams</b>

Course Prerequisite(s)	Not Applicable				
Approval Date Of course Specification	18/7/2022				

## II. Overall Aims of the Course

This course provides the students with the basic concepts and principles of Microeconomics. The course will acquaint the students with necessary knowledge to identify market equilibrium, analyze different elasticities and understand the production theory and cost analysis

### III. Program ILOs Covered by the Course

Program ILOs Covered by the Course			
Knowledge and Understanding	Intellectual Skills	Practical / Professional Skills	General and Transferable Skills
a4, a5, a7	b4	c1, c4, c6	d2, d4, d5, d9, d10

### IV. Intended Learning Outcomes of the Course (ILOs)

#### a. Knowledge and Understanding

*On completing the course, the student should be able to:*

- a1. Define main concepts of Microeconomics and its main principles.
- a2. Explain how economics is related to different social sciences.
- a3. Outline the difference between demand and supply side
- a4. Discuss factors affecting demand and supply
- a5. Identify market equilibrium and disequilibrium.
- a6. List different types of elasticities.
- a7. Explain concepts related to production process.
- a8. Describe the types of costs of production.
- a9. State the main characteristics of different market types

#### b. Intellectual Skills

*On completing the course, the student should be able to:*

- b1. link different economic concepts with producer and consumer decisions
- b2. Differentiate between factors affect supply and demand using graphs to illustrate how changes in demand and supply lead to new equilibrium point.
- b3. Develop pricing strategy for producer in case of disequilibrium in different markets.
- b4. Compare between different types of Elasticities.
- b5. Calculate prices elasticity of demand, income elasticity and cross elasticity
- b6. Suggest appropriate behavior for producer to increase total revenue based on type of elasticity.
- b7. Calculate Total Production, Average Production, and Marginal Production
- b8. Illustrate different stages of production
- b9. Compute different costs
- b10. Compare and contrast between different types of markets

#### c. Practical / Professional Skills

*On completing the course, the student should be able to:*

- c1. Link factors that affect the demand and supply with market behavior
- c2. Use concept of elasticity to explain the behavior of market participants
- c3. Choose best optimal production units based on production and cost analysis
- c4. Analyze how firms behave based on type of markets

**d. General and Transferable Skills**

*On completing the course, the student should be able to:*

- d1. Communicate effectively with colleagues and others, using both written, oral and virtual methods.
- d2. Interpret and express ideas with others.
- d3. Manage time effectively
- d4. Develop self - learning skills
- d5. Demonstrate the ability to use graphs and mathematical formulas to solve problems

## V. Course Matrix Content

## II. Overall Aims of the Course

**This course aims at:**

- Develop the students' knowledge about every type of business enterprise.
- Prepare students to calculate the simple interest, present value and the future sum.
- Develop the students' knowledge the concept of discount rate in the bank.
- Prepare students to know how to calculate the interest when it is compounded monthly, quarterly, semi-annually and annually.
- Develop student's practical skills in calculation the annuity and amortization schedule.

### III. Program ILOs Covered by the Course

Program ILOs Covered by the Course			
Knowledge and Understanding	Intellectual Skills	Practical / Professional Skills	General and Transferable Skills
a4	b2, b4	c6	d1, d2, d3, d4, d5

### IV. Intended Learning Outcomes of the Course (ILOs)

#### a. Knowledge and Understanding

*On completing the course, the student should be able to:*

- a1. List the basic concepts of simple interest and simple discount
- a2. State the basic concepts and operations of simple interest and simple discount and the associated formulas.
- a3. Outline the meaning of maturity value that is related to a bank loan and the discount rate and simple discount and the rule of life.
- a4. Differentiate between simple and compound interest.
- a5. Demonstrate difference between ordinary annuity and annuity due.
- a6. Define promising note.
- a7. Describe amortization and find the result.

#### b. Intellectual Skills

*On completing the course, the student should be able to:*

- b1. Select the most appropriate method for solving problems and case studies, depending on your understanding the key concepts.
- b2. Calculate simple interest.
- b3. Solve the bank discount.
- b4. Compute different annuity problems such as ordinary and annuity due, amortization.
- b5. Find the present value and the amount.
- b6. Construct the promissory note.
- b7. Prepare loan amortization table.

#### c. Practical / Professional Skills

*On completing the course, the student should be able to:*

- c1. Apply knowledge of obtaining a loan or invest in banks and how to buy or sell in installments in solving problems and case studies.
- c2. Analyze the case studies that cover the area of business.
- c3. Explain and interpret the final result.
- c4. Research, analyze and critically evaluate information presented in the media and society

**d. General and Transferable Skills**

*On completing the course, the student should be able to:*

- d1. Use self-learning through exercises and worked example.
- d2. Work in group to develop technique for problem solving.
- d3. Manage time.
- d4. Demonstrate ability to work with figures, make calculations, and outline important numerical information and trends.

## V. Course Matrix Content

## II. Overall Aims of the Course

This course is structured to provide business students with a theoretical background on the fundamentals of law, legal theory, and some legal terms used therein. The course introduces general knowledge of labor regulation, as well as governmental relations and activities, including the societal obligations described in the criminal and other statutory or regulatory law

### III. Program ILOs Covered by the Course

Program ILOs Covered by the Course			
Knowledge and Understanding	Intellectual Skills	Practical / Professional Skills	General and Transferable Skills
a4, a5, a7, a8	b2, b6	c3	d4, d7, d9, d10

### IV. Intended Learning Outcomes of the Course (ILOs)

#### a. Knowledge and Understanding

*On completing the course, the student should be able to:*

- a1. Demonstrate importance of ethics and morals in field of law.
- a2. Apply their knowledge about law and relation between business and law
- a3. Identify the Importance of business law with Introduction to theory of law, rights, contracts, companies, and commercial papers.
- a4. Discuss the various legal concepts which are involved in regulating the business institutions and commercial operations
- a5. Explain expert guidance of an accountant and an attorney to learn about the Basics of business laws that will affect business positively.
- a6. Identify the business organization and the regulation
- a7. List the contracts stages and recognition of contracts' types
- a8. Discuss of the Uniform Commercial Code, with special emphasis on sales of goods, commercial paper, and negotiable instruments, secured transactions, bankruptcy and creditors rights, proprietorships, partnerships, corporations, antitrust law, and the laws effecting entrepreneurs.

#### b. Intellectual Skills

*On completing the course, the student should be able to:*

- b1. Apply logical thinking to solve problems related business law and company's law.
- b2. Identify the commercial papers which usually used in business fields.
- b3. Compare in depth between ordinary judiciary and administrative judiciary.
- b4. Link between environmental changes with patterns of taking decisions

#### c. Practical / Professional Skills

*On completing the course, the student should be able to:*

- c1. Differentiate between business law and other fields of law.
- c2. Acquires skills to identify all kinds of commercial papers.
- c3. Analyze legislations, contracts, and commercial custom as a sources of Business law.
- c4. Analyze the Intellectual property from both point of views intellectual and pecuniary.
- c5. Interpret principles of innovative thinking.
- c6. Criticize and discover positive and negative elements in dealing with problems

**d. General and Transferable Skills**

*On completing the course, the student should be able to:*

- d1. Manage Present intellectual development and continuous learning
- d2. Use efficiency to solve individual or institutional problems
- d3. Lead terminology relevant to the themes of the program

## V. Course Matrix Content

Week No	Main Topic	Credit Hours: 3H		Course ILOs Covered by Topic (By ILO Code)			
		Theoretical	Practical	K.U.	I.S	P.P.S.	G.T. S
1	Overview over the legal rule of law and its characteristics	3	-	a1 – a2	b1 – b4	c1 – c6	
2	The rule of law and its nature and kinds in a legal environment	3	-	a1 – a5	b1 – b4	c1 – c6	
3	Contracts and its stages, requirements, and applications	3	-	a7	b1 – b4	c1 – c6	d1-d3
4	Crimes and Torts and liabilities in criminal and civil fields.	3	-	a4 – a8	b1 – b4	c1 – c6	d1-d3
5	Contract: offer and acceptance.	3	-	a4 – a8	b1 – b4	c1 – c6	
6	Termination of contract.	3	-	a4 – a8	b1 – b4	c1 – c6	
7	Reality of consent, consideration	3	-	a4 – a8	b1 – b4	c1 – c6	
8	<b>Mid-term Exams</b>						
9	Intentional tort, capacity & illegality	3	-	a4 – a8	b1 – b4	c1 – c6	d1-d3
10	Application of law: judicial system,	3	-	a4 – a8	b1 – b4	c1 – c6	
11	Ordinary judiciary	3	-	a4 – a8	b3	c1 – c6	
12	Administrative judiciary	3	-	a4 – a8	b3	c1 – c6	
13	Revision	3	-				
14-15	<b>Final exams</b>

4	3	1	-		
Course Prerequisite(s)	Not Applicable				
Approval Date Of course Specification	18/7/2022				

## II. Overall Aims of the Course

Upon completion of this course, students will be able to understand:

- Basic concepts and principles of Macroeconomics.
- Different Macroeconomic problems and their impact on the economy.
- Various macroeconomic Indicators and analyze them.

### III. Program ILOs Covered by the Course

Program ILOs Covered by the Course			
Knowledge and Understanding	Intellectual Skills	Practical / Professional Skills	General and Transferable Skills
a4	b4	c4, c6	d1, d2, d5, d6

### IV. Intended Learning Outcomes of the Course (ILOs)

#### a. Knowledge and Understanding

*On completing the course, the student should be able to:*

- a1. Define Macroeconomics, its main principles and relation with other social sciences.
- a2. Discuss the circular flow of income.
- a3. Explain the difference between expenditures, value-added and income approaches.
- a4. Outline the main macroeconomic problems, inflation and unemployment, their types, sources, and impacts.
- a5. Determine the difference between consumption and saving functions
- a6. Mention the basic idea of expenditure Multiplier
- a7. Identify equilibrium and disequilibrium in Gross Domestic Product and Price Level.
- a8. Describe the business cycle and explain its phases.

#### b. Intellectual Skills

*On completing the course, the student should be able to:*

- b1. Compare between different approaches to measure the gross domestic product.
- b2. Calculate gross domestic product by applying expenditures and income approaches
- b3. Use graphical tools to describe some macroeconomic problems (Inflation, Unemployment, and Recession)
- b4. Compute unemployment rate and inflation rate
- b5. Graph consumption and saving functions
- b6. Calculate marginal propensity to consume (MPC), marginal propensity to save (MPS)
- b7. Illustrate how expenditure plans and real GDP are determined when the price level is fixed
- b8. Interpret the phases of business cycle.
- b9. Analyze and evaluate the relation between the business cycle and GDP gaps

#### c. Practical / Professional Skills

*On completing the course, the student should be able to:*

- c1. Present, draw and interpret different macroeconomic problems.
- c2. Report data about actual business cycle through differentiate between factors that affect some aggregates in the economy.
- c3. Suggest appropriate policies for Macroeconomic Problems

#### d. General and Transferable Skills

*On completing the course, the student should be able to:*

- d1. Acquire analytical reasoning skills, numeric and clear effective communication skills, using written, oral and virtual methods.
- d2. Interpret and express ideas with others.
- d3. Manage time effectively.
- d4. Use conceptual frameworks effectively in problem solving and decision making

## V. Course Matrix Content

Week No	Main Topic	Credit Hours: 3H		Course ILOs Covered by Topic (By ILO Code)			
		Theoretical	Practical	K.U.	I.S	P.P.S.	G.T. S
1	Introduction to circular flow	3	1	a1, a2

Course Prerequisite(s)	Introduction to Management - MGT 102				
Approval Date Of course Specification	18/7/2022				

## II. Overall Aims of the Course

The course aims at providing the students with the basis of organizational behavior concepts and theories. The course will focus on individual behavior, attitudes and job satisfaction, personality and values, perception and individual decision making, motivation, leadership studies, learning, organization culture and contemporary issues in leadership

### III. Program ILOs Covered by the Course

Program ILOs Covered by the Course			
Knowledge and Understanding	Intellectual Skills	Practical / Professional Skills	General and Transferable Skills
a1, a2, a4	b5	c1, c7	d1, d2, d3, d4, d6, d8, d10

### IV. Intended Learning Outcomes of the Course (ILOs)

#### a. Knowledge and Understanding

*On completing the course, the student should be able to:*

- a1. Define organizational behavior.
- a2. Outline the meaning of attitudes and understanding the meaning of the most important of all- Job Satisfaction.
- a3. Discuss the meaning of perception and how it helps with the internal and external attribution during the decision-making process.
- a4. Identify the different decision-making techniques on both individual and group levels.
- a5. List different personality types.
- a6. Explain the theories of motivation that helped with the evolution of organizational behavior and determine how motivation affects individual behavior in the workplace.
- a7. Describe the leadership styles and how they are used as subordinates' motivators.
- a8. Demonstrate the mechanism of the group formation stages and the issues associated with groups in the workplace.
- a9. Explain challenges of effective organizational communication

#### b. Intellectual Skills

*On completing the course, the student should be able to:*

- b1. Analyze the human behavior process through the cognitive, effective, and behavioral components of attitudes.
- b2. Discover the job satisfaction facets as one of the most important type of attitudes.
- b3. Develop the understanding of the Attribution theory to interpret the human.
- b4. Link theories of motivation with individual behavior in workplace.
- b5. Compare the individual and group decision-making process and develop deeper knowledge of the creativity process in decision-making
- b6. Relate some personality traits to positive individual behaviors.
- b7. Evaluate the early and contemporary theories of motivation and how to use them to affect human behavior.
- b8. Differentiate between the different leadership styles derived from theories and how they affect the motivational levels of individuals in the workplace
- b9. Organize the stages associated with the group formation.
- b10. Discover the issues associated with the group formation that will affect the behavior of individuals operating in these groups

**c. Practical / Professional Skills**

*On completing the course, the student should be able to:*

- c1. Use the components of attitudes to understand human behavior
- c2. Apply the understanding of job satisfaction/dissatisfaction to the consequence-matrix in the workplace
- c3. Practice the external and internal attribution techniques
- c4. Use the decision-making models to interpret how the organizations react to the external environment
- c5. Link different personality types to workplace values
- c6. Show how the motivational theories are used to affect human behavior.
- c7. Work with leadership styles to influence the individual behaviors in the workplace
- c8. Relate the group formation stages to any teamwork context.

**d. General and Transferable Skills**

*On completing the course, the student should be able to:*

- d1. Communicate the understanding of the cognitive, affective and behavioral components of attitudes
- d2. Manage the group behavior through the understanding of the issues associated with it
- d3. Manage Time Effectively
- d4. Use different scientific thinking approaches to analyze the behavior of organizations
- d5. Develop oral and written skills through discussions and presentations

Course Prerequisite(s)	Business Statistics (SAT 101)				
Approval Date Of course Specification	18/7/2022				

## II. Overall Aims of the Course

**Upon completion of this course, students will be able to:**

- Demonstrate knowledge and understanding of statistical concepts and basic definitions.
- Demonstrate the ability to reason and develop evidence-based decisions using numerical information.
- Discuss how to efficiently collect the data needed to answer statistical questions properly and how to handle descriptive and estimation tools in business applications
- Apply basic statistical techniques and tools using the statistical package Minitab, which is a core component of this course.
- Communicate statistical findings clearly and appreciate the relevance of statistics to contemporary society.

### III. Program ILOs Covered by the Course

Program ILOs Covered by the Course			
Knowledge and Understanding	Intellectual Skills	Practical / Professional Skills	General and Transferable Skills
a4, a5, a6, a7	b1, b4	c4, c6, c9	d3, d5, d7, d8

### IV. Intended Learning Outcomes of the Course (ILOs)

#### a. Knowledge and Understanding

---

*On completing the course, the student should be able to:*

- a1. Outline the basic definitions and concepts and reflect with other social science.
- a2. Explain what is meant by a random variable.
- a3. Demonstrate understanding of descriptive statistics by practical application of quantitative reasoning and data visualization.
- a4. Define the mean of a random variable, the variance, and the standard deviation.
- a5. Define the probability function of a random variable
- a6. Explain Conditional Probability in terms of Independent events, Multiplication law, and Bayes' theorem.
- a7. Demonstrate the relationship between two or more variables of interest.

#### b. Intellectual Skills

---

*On completing the course, the student should be able to:*

- b1. Carry out a simple exploratory data analysis; and in particular, to use simple numerical and graphical methods of summarizing data.
- b2. Apply basic statistical reasoning to analyze data and graphs.
- b3. Use probability functions to solve different probability problems.
- b4. Use statistics to model real world behaviors and suggest the assumptions and limitations of those models
- b5. Demonstrate the ability to use statistics to solve problems and determine if the solutions are reasonable

#### c. Practical / Professional Skills

---

*On completing the course, the student should be able to:*

- c1. Use a statistical package to process, analyze and present data.
- c2. Communicate technical results of the investigation in reports and oral presentations
- c3. Design surveys and exploit databases.
- c4. Demonstrate ability to gather information, brainstorming, evaluate each option and determining the best alternative

**d. General and Transferable Skills**

---

*On completing the course, the student should be able to:*

- d1. Demonstrate ability to work with figures, make calculations, understand graphs, charts and simple statistics and outline important numerical information and trends.
- d2. Demonstrate ability to research, analyze and critically evaluate information presented in the media and society.
- d3. Demonstrate ability to work with others.
- d4. Demonstrate ability to use problem solving tools such as
  - Processing data
  - Making choices and decisions
  - Interpretation of statistics
  - Developing a model
  - Analyzing data and drawing conclusions

## I. Course Information

Course Code	ACT 102	Course Name	Financial Accounting		
Level	1	Specialization	All Faculty programs		
Department Offering the Course	Business Administration				
Credit Hours	<i>Credit Hours</i>				
	Total Credit Hours	Theoretical	Tutorial	Practical	
	3	3	1	-	
	<i>Contact Hours</i>				
Contact Hours	Theoretical	Tutorial	Practical		
4	3	1	-		
Course Prerequisite(s)	Introduction to Accounting (ACT 101)				
Approval Date Of course Specification	18/7/2022				

## II. Overall Aims of the Course

This course helps the students understand the important accounting methods and techniques that affect the preparation and presentation of financial statements. Students should be able to identify different types of inventory valuation and accounting treatment for receivables. Moreover, this course enables students to understand accounting for petty cash and how to prepare a bank reconciliation statement. It acquaints students with the different methods to calculate depreciation of fixed assets, and the accounting for current and long term liabilities.

### III. Program ILOs Covered by the Course

Program ILOs Covered by the Course			
Knowledge and Understanding	Intellectual Skills	Practical / Professional Skills	General and Transferable Skills
a4	b4	C6, c8	d1, d2, d3, d4

### IV. Intended Learning Outcomes of the Course (ILOs)

#### a. Knowledge and Understanding

*On completing the course, the student should be able to:*

- a1. Identify the objectives, principles, assumptions, and concepts of financial accounting.
- a2. Outline the different types and accounting methods used in management practices such as calculating inventory.
- a3. Describe different accounting practices such as treatment for receivables and depreciation methods.
- a4. Explain the allowance method of accounting for uncollectible accounts and how the method affects financial statements
- a5. Discuss the procedures and structures for establishing control over the flow of cash, use of cash receipts, cash disbursements and bank reconciliation.
- a6. Outline the transactions related to the purchase, amortization, and recognition of tangible and intangible long-term assets.
- a7. State the purposes behind a company's financial statements analysis.

#### b. Intellectual Skills

*On completing the course, the student should be able to:*

- b1. Interpret different techniques in problem solving
- b2. Evaluate the inventory methods, differentiate among them and analyze the effect of using each method on the financial statements.
- b3. Design a voucher for petty cash reimbursement, funds receipt and reconciliation.
- b4. Apply different mathematical and analytical methods in evaluating accounting for receivables and its effect on financial statements.
- b5. Examine and explain how transactions relating to the recognition, valuation, and disposal of assets, liabilities, and stockholders' equity affect the various financial statements.
- b6. Perform horizontal, vertical and ratio analysis of a company's financial statements.

#### c. Practical / Professional Skills

*On completing the course, the student should be able to:*

- c1. Report suitable scientific approaches in problems solving
- c2. Prepare different types of accounting report
- c3. Select appropriate techniques of evaluation and evaluate the relevance and significance of data collected

**d. General and Transferable Skills**

*On completing the course, the student should be able to:*

- d1. Use different tools in facing different accounting situations
- d2. Innovate creative development work techniques in problem solving
- d3. Manage time effectively
- d4. Communicate with others effectively
- d5. Participate in continuous professional development and lifelong learning through developing intellectual and cognitive skills

## II. Overall Aims of the Course

The main aim of this course is to help the students to understand the cyclical nature of business research and the process of research at both levels of preparations and writing research proposal. Besides, the course acquaints the students with the skills necessary write a proposal that includes an introduction, problem statement (significance of study), literature review, methods section, references, and a project timeline. In summary, the course helps undergraduate.

### III. Program ILOs Covered by the Course

Program ILOs Covered by the Course			
Knowledge and Understanding	Intellectual Skills	Practical / Professional Skills	General and Transferable Skills
a6, a8	b6	c2	d1, d2, d3, d6, d10

### IV. Intended Learning Outcomes of the Course (ILOs)

#### a. Knowledge and Understanding

*On completing the course, the student should be able to:*

- a1. Define the nature of research.
- a2. Outline the difference between basic and applied researches.
- a3. Discuss and decision making of topic and idea selection.
- a4. Identify the major phases of research.
- a5. Explain the purpose of each step and how to evaluate it.
- a6. Write the research proposal as well as outlining the research design

#### b. Intellectual Skills

*On completing the course, the student should be able to:*

- b1. Differentiate between types and quality of research.
- b2. Choose and make decision of both topic and idea, as to use different techniques.
- b3. Compare and understand the differences of each research step.
- b4. Evaluate research methodology as phases and steps.
- b5. Analyze the information collected to work in a research.
- b6. Plan the research design using the elements of research design explained by the course instructor.
- b7. Suggest different ideas and how to work on them to produce good research.
- b8. Develop a research proposal that represents the research plan.

#### c. Practical / Professional Skills

*On completing the course, the student should be able to:*

- c1. Use all taught techniques to prepare the research design.
- c2. Apply all techniques taught concerning the research preparation phase and writing phase as well.
- c3. Design the research.
- c4. Practice preparation of the research.

#### d. General and Transferable Skills

*On completing the course, the student should be able to:*

- d1. Communicate effectively.
- d2. Acquire analytical reasoning skills, numeric and clear effective communication skills.
- d3. Manage tasks, time, and resources effectively.
- d4. Enhance critical thinking skills.
- d5. Improve academic writing skills

## II. Overall Aims of the Course

### Upon completion of this course, students will be able to:

- Identify the main concepts of finance and its relationship with other fields.
- Differentiate between the different legal business organizations.
- Use different ratios to evaluate the financial performance of the firm.
- Prepare the cash flow of the firm to determine how the cash flow is generated
- Develop proforma financial statements to forecast the financial needs of the firm in the future.
- Use different financial formulas to calculate single amounts, annuities, mixed streams, and other special cases

### III. Program ILOs Covered by the Course

Program ILOs Covered by the Course			
Knowledge and Understanding	Intellectual Skills	Practical / Professional Skills	General and Transferable Skills
a1, a4, a5, a7	b4	c4, c6, c10	d1, d2, d3, d5, d8

### IV. Intended Learning Outcomes of the Course (ILOs)

#### a. Knowledge and Understanding

*On completing the course, the student should be able to:*

- a1. Define finance and its relation to other sciences.
- a2. Outline the different managerial finance functions.
- a3. Discuss the different legal forms of business organizations.
- a4. Describe principal–agent and the conflicts that may arise in these relationships.
- a5. State the difference between time series analysis and cross-sectional analysis
- a6. Identify the financial positions of the corporation.
- a7. Outline different methods used to prepare proforma income statement and balance sheet.
- a8. Explain the financial planning process, including long-term (strategic) financial plans and short-term (operating) plans.
- a9. Demonstrate complete understanding of the future value (FV) and present value (PV) of a single sum of money, an ordinary annuity, an annuity due, a perpetuity (PV only), and a series of unequal cash flows.
- a10. Explain the investment appeal of common stocks and why individuals like to invest in them.
- a11. Discuss the basic features of common stocks

#### b. Intellectual Skills

*On completing the course, the student should be able to:*

- b1. Evaluate the financial performance of the firm.
- b2. Interpret the meaning of different financial ratios.
- b3. Choose the best appropriate short-term and long-term financial plans of the corporations.
- b4. Prepare pro – forma income statement and balance sheet.
- b5. Solve time value of money problems for different frequencies of compounding interest.
- b6. Classify common stocks according to their returns
- b7. Differentiate between different types of common stocks

#### c. Practical / Professional Skills

*On completing the course, the student should be able to:*

- c1. Use different problem-solving methods in evaluating, planning, and forecasting the current financial position and its future needs.

- c2. Use the financial ration in evaluating the financial position for real world cases.
- c3. Forecast the financial needs of the corporation
- c4. Choose the best investment opportunities by comparing how cash flow is received or paid along with different interest rates.
- c5. Write reports effectively.

**d. General and Transferable Skills**

*On completing the course, the student should be able to:*

- d1. Communicate effectively with others.
- d2. Manage tasks, time, and resources effectively.
- d3. Acquire analytical reasoning skills, numeric and clear effective communication skills.
- d4. Manage time effectively.

## I. Course Information

Course Code	MGT 201	Course Name	Production and Operations Management 1		
Level	2	Specialization	All faculty Programs		
Department Offering the Course	Business Administration				
Credit Hours	<i>Credit Hours</i>				
	Total Credit Hours	3	Theoretical	Tutorial	Practical
			3	1	-
	<i>Contact Hours</i>				
	Contact Hours	4	Theoretical	Tutorial	Practical
			3	1	-
Course Prerequisite(s)	MGT 101 – Introduction to Management				
Approval Date Of course Specification	18/7/2022				

## II. Overall Aims of the Course

Upon completion of this course, students will be able to:

- Generate a plan to increase productivity through the effective use of labor, capital, and management
- Modify the production / operation department in order to improve the overall performance of the organization.
- Take decisions in a professional manner and perform efficiently the five main functions of management: planning, organizing, staffing, leading and controlling.
- Integrates the different managerial decisions to develop and implement operations strategies.

### III. Program ILOs Covered by the Course

Program ILOs Covered by the Course			
Knowledge and Understanding	Intellectual Skills	Practical / Professional Skills	General and Transferable Skills
a4	b3, b5, b6	c6, c7	d1, d2, d3, d5, d7, d8

### IV. Intended Learning Outcomes of the Course (ILOs)

#### a. Knowledge and Understanding

*On completing the course, the student should be able to:*

- a1. Exhibit a broad and deep knowledge of advanced core areas of production and operations management and its interdepartmental relations within organizations.
- a2. Differentiate between production and operation management contributions, functions, and challenges.
- a3. Define what is meant by operation strategy and state its importance
- a4. List the factors that affect strategies of operations
- a5. Discuss the operation strategy formulation
- a6. Outline the main objectives for designing any product or service
- a7. Mention the types of processes in manufacturing and service
- a8. Outline the importance of quality control management
- a9. State the factors that affect location selection
- a10. Identify the main objectives of capacity control in operations
- a11. List the main steps of capacity planning and control
- a12. Define the fundamental advantage and necessity of forecasting in various situations.
- a13. Explain supply chain management, contrast it from operations management and propose the main performance drivers of supply chain performance.

#### b. Intellectual Skills

*On completing the course, the student should be able to:*

- b1. Illustrate how transformation processes within production affect organizations
- b2. Use the main phases for product design to design a service or a product
- b3. Relate different operation strategies to organizational structures
- b4. Analyze how up to date technologies affect operation using real world examples.
- b5. Use new trends in technology to explain how services are now delivered.
- b6. Discover the Productivity and Multifactor Productivity
- b7. Determine the optimum location for a distribution center
- b8. Interpret the utilization, efficiency, and effectiveness tools and methods
- b9. Suggest location plans and analysis
- b10. Choose the most suitable location decision
- b11. Evaluate a cost analysis, compute the total cost for each alternative location
- b12. Design flow charts, check sheets, pareto charts, scatter diagrams, and histograms in quality measurements
- b13. Interpret the major slacks in supply chains and formulate the approaches to manage them

**c. Practical / Professional Skills**

---

*On completing the course, the student should be able to:*

- c1. Decide on appropriate operational models to analyze problems
- c2. Prove understanding of advanced analytical methods, both theory- and model based.
- c3. Show a deeper understanding of issues of operations in manufacturing and service organizations
- c4. Defend conclusions using operational and economic arguments with proper rigor
- c5. Reason logically and work analytically
- c6. Relate basic and advanced quantitative methods to applied topics.
- c7. Show how to choose an appropriate forecasting method in a particular environment.
- c8. Differentiate the inventory management methodologies and apply the existing models to propose the optimal order sizes.

**d. General and Transferable Skills**

---

*On completing the course, the student should be able to:*

- d1. Work coherently and successfully as a part of a team.
- d2. Work in stressful environment and within constraints.
- d3. Communicate effectively.
- d4. Manage tasks, time, and resources effectively.
- d5. Demonstrate understanding of relevant mathematical and statistical technique

## I. Course Information

Course Code	ACT 201	Course Name	Cost Accounting	
Level	2	Specialization	All Faculty Programs	
Department Offering the Course	Department of Accounting			
Credit Hours	<i>Credit Hours</i>			
	Total Credit Hours	Theoretical	Tutorial	Practical
	3	3		-
	<i>Contact Hours</i>			
Contact Hours	Theoretical	Tutorial	Practical	
4	3	1	-	
Course Prerequisite(s)	Financial accounting (ACT 102)			
Approval Date Of course Specification	18/7/2022			

## II. Overall Aims of the Course

This course introduces students to the basic concepts of cost accounting. Emphasis is placed on cost terminology, costing systems, cost measurements, cost-volume-profit analysis, accounting for different cost elements (materials, labor, and overhead), and different methods for allocating indirect costs.

### III. Program ILOs Covered by the Course

Program ILOs Covered by the Course			
Knowledge and Understanding	Intellectual Skills	Practical / Professional Skills	General and Transferable Skills
a4	b4	c1, c6, c8	d5, d8

### IV. Intended Learning Outcomes of the Course (ILOs)

**a. Knowledge and Understanding**

*On completing the course, the student should be able to:*

- a1. Discuss principles of cost accounting.
- a2. Outline a framework for cost accounting and cost management
- a3. Explain why product costs are computed in different ways for different purposes.
- a4. Discuss various methods of cost estimation
- a5. State the main differences in income using the following methods, variable costing, and absorption costing
- a6. Outline main aspects in linear cost function and three common ways in which they behave.
- a7. State three criteria used to evaluate and choose cost drivers
- a8. Specify internal control procedures for materials.
- a9. Explain Accounting for materials and its journal entries.
- a10. explain how to Allocate multiple support department costs using the direct method, the step-down method, and the reciprocal method

**b. Intellectual Skills**

*On completing the course, the student should be able to:*

- b1. Differentiate between various forms of cost and what they mean.
- b2. Differentiate variable costs and fixed costs.
- b3. Compare between variable costing and absorption costing
- b4. Prepare Income Statement under absorption costing and variable costing
- b5. Select the appropriate methods to be applied for evaluating inventory.
- b6 Determine from the general ledger the total cost of materials purchased and used in manufacturing.
- b7 Differentiate among various methods to value inventory of materials.
- b8. differentiate the single-rate method from the dual-rate method
- b9. analyze how bundling of products gives rise to revenue allocation issues and the methods used for it.
- b10. Demonstrate how to Allocate common costs using the stand-alone method and the incremental method.

**c. Practical / Professional Skills**

*On completing the course, the student should be able to:*

- c1. Analyze cost data and their interpretation.
- c2. Apply different methods in using organization's cost for fulfilling business objective.
- c3. Employ cost accounting theories for cost problems.
- c4. Draw reasoned conclusions using data, to solve complicated cost accounting problems.
- c5. Recommend a complete set of modification to the cost accounting systems.
- c6. Apply the methods of FIFO, LIFO, WEIGHTED AVERAGE to determine the quantity of each kind of material on hand and its cost.

**d. General and Transferable Skills**

*On completing the course, the student should be able to:*

- d1. Develop problem solving techniques in determining a solution to cost accounting problems.
- d2. Enable students to communicate effectively when dealing with cost accounting problems.
- d3. Innovate Creative development work techniques in cost Accounting.

## V. Course Matrix Content

No. of weeks	Main Topic	Credit Hours: 3H		Course ILOs Covered by Topic (By ILO Code)			
		Theoretical	Practical	K.U.	I.S	P.P.S.	G.T. S
1 - 2	An Introduction to Cost terms and purposes - <b>Cost classifications</b>	3	1	a1, a2	b1, b2		
3	An Introduction to Cost terms and purposes - <b>Cost classifications</b>	3	1	a1 - a3	b1, b2	c1,c3

## II. Overall Aims of the Course

**Upon completion of this course, students will be able to:**

- Apply the principles of effective data management and information retrieval
- Use Knowledge, Skills, practices and competence in the Management Information Systems field to solve management problems, and to support business decisions
- Deal with organizational, managerial, and technology aspects of information systems
- Evaluate the various business information systems and enterprise applications
- Evaluate the information systems strategies to achieve business strategic objectives
- Carry out a self-learning and research in Management Information Systems

### III. Program ILOs Covered by the Course

Program ILOs Covered by the Course			
Knowledge and Understanding	Intellectual Skills	Practical / Professional Skills	General and Transferable Skills
a1, a2, a3, a4, a7	b2, b3, b5	c3, c5, c8, c9	d2, d4, d8

### IV. Intended Learning Outcomes of the Course (ILOs)

#### a. Knowledge and Understanding

*On completing the course, the student should be able to:*

- a1. Define the current use of information systems in business.
- a2. Describe the concepts, principles, and theories related to Management Information Systems.
- a3. Determine the organizational, management, and technology dimension of information systems.
- a4. Identify the different types of Enterprise Applications, their functions, structure, and business process types.
- a5. Describe the current developments in information technology practices and trends.
- a6. Explain the information technology infrastructure and services.
- a7. State the information systems development process life cycle.
- a8. Discuss the ethical issues related to Information Systems use

#### b. Intellectual Skills

*On completing the course, the student should be able to:*

- b1. Analyze different business processes and models.
- b2. Interpret the information needs for various management level.
- b3. Choose solutions for enhancing systems in organizations.
- b4. Suggest management information systems for various types of business to support management decisions in all management levels.
- b5. Apply management information systems strategies to achieve competitive advantages.

#### c. Practical / Professional Skills

*On completing the course, the student should be able to:*

- c1. Solve management problems using information systems.
- c2. Design information systems for various management disciplines
- c3. Write report on contemporary issues in information systems.
- c4. Present information systems supporting decision making in organization.

#### d. General and Transferable Skills

*On completing the course, the student should be able to:*

- d1. Communicate effectively with others.
- d2. Apply the English language fluency.
- d3. Innovate creative development work techniques.
- d4. Work within group
- d5. Develop intellectual and cognitive self-learning and development skills.

## I. Course Information

Course Code	MIS 202	Course Name	Introduction to Programming		
Level	2	Specialization	All Faculty Programs		
Department Offering the Course	Management Information Systems				
Credit Hours	<i>Credit Hours</i>				
	Total Credit Hours	3	Theoretical	Tutorial	Practical
			3	-	2
	<i>Contact Hours</i>				
	Contact Hours	5	Theoretical	Tutorial	Practical
			3	-	2
Course Prerequisite(s)	MIS201				
Approval Date of Course Specification	18/7/2022				

## II. Overall Aims of the Course

Upon completion of this course, students will be able to:

- Use Knowledge, Skills, practices, and competence in the Programming of Information Systems to solve management problems.
- Understand the fundamentals of computer programming concepts.
- Carry out a self-learning in Information Systems Programming

### III. Program ILOs Covered by the Course

Program ILOs Covered by the Course			
Knowledge and Understanding	Intellectual Skills	Practical / Professional Skills	General and Transferable Skills
a2, a4, a5	b1, b4	c5, c6, c9	d2, d3, d4, d6, d8, d9

### IV. Intended Learning Outcomes of the Course (ILOs)

#### a. Knowledge and Understanding

*On completing the course, the student should be able to:*

- a1. Define and describe the basics of computing hardware, programming languages.
- a2. Discuss the phases of software development life cycle.
- a3. Explain programming logic using algorithms and flowcharts.
- a4. Describe the concepts of control structures, functions, and arrays in programming.

#### b. Intellectual Skills

*On completing the course, the student should be able to:*

- b1. Compare and differentiate between algorithms, methods and techniques used in structured programming.
- b2. Convert algorithm such as flow chart into programming commands.
- b3. Design programs using programming language rules, commands, and operators.

#### c. Practical / Professional Skills

*On completing the course, the student should be able to:*

- c1. Design algorithmic problem solutions for real life problems
- c2. Write codes using the programming language constructs.
- c3. Apply various software verification and validation techniques.
- c4. Practice on using computer programming basics including control structures, functions, and arrays.
- c5. Practice on using decision and repetition statements.

#### d. General and Transferable Skills

*On completing the course, the student should be able to:*

- d1. Communicate effectively with others.
- d2. Respect teamwork.
- d3. Cope up with different presentations and discussion.
- d4. Innovate creative development work techniques.
- d5. Develop intellectual and cognitive self – learning and development skills.

## V. Course Matrix Content

Week No	Main Topic	Credit Hours: 3H		Course ILOs Covered by Topic (By ILO Code)

	<i>Contact Hours</i>				
Contact Hours	Theoretical	Tutorial	Practical		
3	3	-			
Course Prerequisite(s)	MGT 101				
Approval Date Of course Specification	18/7/2022				

## II. Overall Aims of the Course

This course provides students with the core principles, concepts, and strategies of marketing in the context of current and emerging marketing realities. In addition, it acquaints the students with the opportunity to apply the marketing concepts to practical business situations. The course also, develop the students' abilities in the marketing decision making and the marketing strategy formulation, learn the successful marketing strategies.

### III. Program ILOs Covered by the Course

Program ILOs Covered by the Course			
Knowledge and Understanding	Intellectual Skills	Practical / Professional Skills	General and Transferable Skills
a3, a4, a7	b2, b5	c2, c6	d1, d2, d3, d5, d9, d10

### IV. Intended Learning Outcomes of the Course (ILOs)

#### a. Knowledge and Understanding

*On completing the course, the student should be able to:*

- a1. Define fundamental marketing concepts as well as trends and tasks.
- a2. Explain the importance of being marketing oriented in business practice.
- a3. Describe the role of marketing within contemporary organizations
- a4. State the current trends in the business and marketing environments.
- a5. Identify viable segmentation and targeting approaches for markets.
- a6. Explain a range of common strategies to use with each of the various marketing mix tools: product, pricing, promotion, and distribution
- a7. Discuss the relationship of the elements of the marketing mix and how they will impact a company's marketing strategy.
- a8. Determine various decisions areas within marketing and tools used by marketing managers for making decisions.
- a9. Describe the types of social media and the framework of social media marketing.

#### b. Intellectual Skills

*On completing the course, the student should be able to:*

- b1. Analyze the business environment and the key forces which drive and/or restrain marketing success
- b2. Solve Marketing problems using logical thinking.
- b3. Evaluate marketing mix strategies in the application of marketing decisions.
- b4. Interpret consumer buying behavior in various type of buying decisions.
- b5. Choose examples from current events and real-world marketing situations to discuss different marketing strategies.

#### c. Practical / Professional Skills

*On completing the course, the student should be able to:*

- c1. Use their knowledge and skills to assess marketing opportunities.
- c2. Solve marketing problems
- c3. Select appropriate segmentation and targeting strategies in identifying target markets.
- c4. Prepare a complete marketing strategy
- c5. Select appropriate social media strategy.

**d. General and Transferable Skills**

*On completing the course, the student should be able to:*

- d1. Communicate effectively with different audiences.
- d2. Develop an appropriate technique to analyze and solve marketing problems.
- d3. Use personal and interpersonal skills appropriate for being an effective member of a marketing team.
- d4. Apply communication skills techniques in Presentations and discussion

## II. Overall Aims of the Course

**Upon completion of this course, students will be able to:**

- Demonstrate knowledge and understanding of statistical inference and its role in the analysis of business and economics problems.
- Apply basic statistical techniques such as statistical estimation, statistical hypothesis testing, multiple regression analysis and time series analysis using the statistical package Minitab, which is a core component of this course.
- Demonstrate the ability to reason and develop evidence-based decisions using numerical information.
- Communicate statistical findings clearly and appreciate the relevance of statistics to contemporary society.

### III. Program ILOs Covered by the Course

Program ILOs Covered by the Course			
Knowledge and Understanding	Intellectual Skills	Practical / Professional Skills	General and Transferable Skills
a4,	b1, b4	c3, c4, c6, c9	d4, d5, d8

### IV. Intended Learning Outcomes of the Course (ILOs)

#### a. Knowledge and Understanding

*On completing the course, the student should be able to:*

- a1. Define key inferential concepts to have a critical insight into the appropriateness of statistical techniques.
- a2. Explain what is meant by the terms null and alternative hypotheses, type I and type II errors, test statistic, level of significance, and p-value.
- a3. Explain what is meant by a contingency (or two-way) table.
- a4. Outline the basic concepts of analysis of variance.
- a5. Outline the assumptions and limitations of statistical models.

#### b. Intellectual Skills

*On completing the course, the student should be able to:*

- b1. Apply basic tests for the one-sample and two-sample situations and apply test for paired data.
- b2. Build models to make predictions, draw conclusions, check whether the results are reasonable, and find optimal results using technology where necessary and appropriate.
- b3. Demonstrate an understanding of the nature of statistical reasoning including the ability to prove simple results and/or make statistical inferences.
- b4. Demonstrate the ability to use statistics to solve problems and determine if the solutions are reasonable.
- b5. Apply chi-square test to test the independence of two classification criteria.

#### c. Practical / Professional Skills

*On completing the course, the student should be able to:*

- c1. Use the statistical package as platform for statistical computing.
- c2. Interpret technical results of the investigation in reports and oral presentations.
- c3. Design surveys and manage and exploit databases.
- c4. Demonstrate ability to gather information, brainstorming, evaluate each option and determining the best alternative.

#### d. General and Transferable Skills

*On completing the course, the student should be able to:*

- d1. Demonstrate ability to work with figures, make calculations, understand graphs, charts and simple statistics and outline important numerical information and trends.
- d2. Demonstrate ability to research, analyze and critically evaluate information presented in the media and society.
- d3. Demonstrate ability to work with others
- d4. Demonstrate ability to use problem solving tools such as

- Processing data
- Making choices and decisions
- Interpretation of statistics
- Developing a model
- Analyzing data and drawing conclusions

## V. Course Matrix Content

- **Date:** 7/9/2021

## I. Course Information

Course Code	ECN 201	Course Name	Money and Banking		
Level	2	Specialization	All faculty programs		
Department Offering the Course	Business Administration Department				
Credit Hours	<i>Credit Hours</i>				
	Total Credit Hours	3	Theoretical 3	Tutorial 1	Practical -
	<i>Contact Hours</i>				
	Total Contact Hours	4	Theoretical 3	Tutorial 1	Practical -
Course Prerequisite(s)	ECN 102				
Approval Date of Course Specification	18/7/2022				

## II. Overall Aims of the Course

This course aims at discussing the importance of money and banking to economic activity on both the national and international level through investigating the relationship between money and banking and Macroeconomic theory

### III. Program ILOs Covered by the Course

Program ILOs Covered by the Course			
Knowledge and Understanding	Intellectual Skills	Practical / Professional Skills	General and Transferable Skills
a3, a4	b4	c6	d1, d2, d3, d4, d5, d6, d7, d10

### IV. Intended Learning Outcomes of the Course (ILOs)

#### a. Knowledge and Understanding

*On completing the course, the student should be able to:*

- a1. Outline functions of financial markets and how it affects macroeconomic goals.
- a2. Describe the different types of financial intermediaries and its role in stabilizing the economy
- a3. Discuss the main functions of money
- a4. Illustrate the main functions of central banks and commercial banks
- a5. Explain the general principles of bank management
- a6. Define what is meant by money supply explaining the main players in money supply process.
- a7. Discuss the factors that affect monetary base and money supply
- a8. Define the theories of the demand for money (classical and Keynesian theories and Milton Friedman`s reformulation of the quantity theory of money)
- a9. Differentiate between conventional and non – conventional monetary policy tools
- a10. Compare and contrast the difference between tools and goals of monetary policy

#### a. Intellectual Skills

*On completing the course, the student should be able to:*

- b1. Explain the evolution of money payment systems.
- b2. Demonstrate different classifications of Monetary aggregates and how it is used to measure money supply
- b3. Illustrate how payment system developed over time
- b4. Examine how banks maximize their profits
- b5. Use liquidity management principle to explain how banks can manage any shortfall in reserves.
- b6. Evaluate the role of Central Banks in controlling money supply.
- b7. Criticize simple multiplier model and derive the formula for multiple deposit creation

## II. Overall Aims of the Course

The main aim of this course is to provide the students with fundamental concepts and academic platform for Human Resources management. Therefore, the course examines the role of the Human Resources professional as a strategic partner in managing today's organizations with an in-depth study of the key functions.

### III. Program ILOs Covered by the Course

Program ILOs Covered by the Course			
Knowledge and Understanding	Intellectual Skills	Practical / Professional Skills	General and Transferable Skills
a3, a4	b1, b2	c1, c10	d1, d2, d3, d7, d9, d10

### IV. Intended Learning Outcomes of the Course (ILOs)

#### a. Knowledge and Understanding

*On completing the course, the student should be able to:*

- a1. Define the functions and concepts of human resource management.
- a2. Identify human resource strategy.
- a3. Describe job analysis and talent management process.
- a4. Explain procedures personal planning and recruiting.
- a5. Identify testing and selecting methods for interviewing candidates for retaining employees.
- a6. Describe training and development techniques.
- a7. Determine the appropriate performance appraisal.
- a8. Discuss strategic pay plans for attaining employee rights in the organization.
- a9. Describe the concept and techniques for international human resource management.

#### b. Intellectual Skills

*On completing the course, the student should be able to:*

- b1. Evaluate the human resource function and strategies.
- b2. Interpret job analysis and concepts for talent management process.
- b3. Choose the key procedures in recruitment and selection.
- b4. Analyze selection and interview techniques.
- b5. Suggest training and development methods.
- b6. Compare various forms of performance appraisal.
- b7. Design pay plans for increasing retention and engagement of employees.
- b8. Apply the concepts of global staffing

#### c. Practical / Professional Skills

*On completing the course, the student should be able to:*

- c1. Apply contemporary HR practices
- c2. Examine HR career cheers.
- c3. Analyze retention tools.
- c4. Practice strategic pay plans.

**d. General and Transferable Skills**

*On completing the course, the student should be able to:*

- d1. Communicate in small groups.
- d2. Lead a team-building activity discuss how collaboration hindered or helped the team to be successful.
- d3. Manage time effectively.
- d4. Develop presentation skills

## II. Overall Aims of the Course

This course focuses on corporate and divisional plan formulation and implementation. The course will acquaint the students with knowledge and skills to understand the process of strategic decision making and organizational change.

### III. Program ILOs Covered by the Course

Program ILOs Covered by the Course			
Knowledge and Understanding	Intellectual Skills	Practical / Professional Skills	General and Transferable Skills
a3	b2, b3, b5, b6	c2, c3, c8	d2, d3, d7, d8, d9, d10

### IV. Intended Learning Outcomes of the Course (ILOs)

#### a. Knowledge and Understanding

*On completing the course, the student should be able to:*

- a1. Outline the process of forming, formulating, implementing and evaluating business strategies
- a2. Explain the basic concepts of strategy Formulation.
- a3. Describe the practices of strategy Implementation
- a4. Discuss the company vision and mission statement and their importance for effectiveness of organization.
- a5. Define Business level strategy.
- a6. Identify external and internal forces affect organization.

#### b. Intellectual Skills

*On completing the course, the student should be able to:*

- b1. Analyze corporate business level strategies
- b2. Interpret the analytical modeling of scenario planning
- b3. Differentiate the different types of strategy in the organization
- b4. Evaluate the external and internal environment of the organization
- b5. Compare between strategic analysis (SWOT) for internal and external environment and (PEST) analysis for external environment.
- b6. Interpret various strategic options available to the organization.

#### c. Practical / Professional Skills

*On completing the course, the student should be able to:*

- c1. Present the practical and integrative model of strategic management process that defines basic activities in strategic management
- c2. Examine challenges faced by managers in implementing and evaluating strategies based on the nature of business, industry, and cultural differences
- c3. Analyze the competitive situation and strategic dilemma in dealing with dynamic global business environment in terms of rapidly changing market trends and technological advancement
- c4. Design a strategic plan that operationalizes the goals and objectives of the firm

**d. General and Transferable Skills**

*On completing the course, the student should be able to:*

- d1. Use critical analysis and synthesis in solving complex multidisciplinary scientific and research work in the field of strategic management
- d2. Develop programs and procedures in order to achieve organizational goals.
- d3. Solve practical business problems in the field of strategic management

## II. Overall Aims of the Course

The objective of the course is to provide students with the skills to run any investment project such as establishing a new project, expansion of existing project, replacements of major machinery and equipment, and elaborate the purpose and contents of the main studies that make up the feasibility study which are: the marketing study, the technical study, and the financial study

### III. Program ILOs Covered by the Course

Program ILOs Covered by the Course			
Knowledge and Understanding	Intellectual Skills	Practical / Professional Skills	General and Transferable Skills
a2, a5, a6, a7	b4, b5,b6	c2, c3, c8, c10	d1, d2, d3, d5, d6, d7, d8, d9

### IV. Intended Learning Outcomes of the Course (ILOs)

#### a. Knowledge and Understanding

*On completing the course, the student should be able to:*

- a1. Outline critical social and environmental issues concerning investing in projects and tools for their analysis.
- a2. Explain how government and other different business organizations use feasibility study to evaluate any investment proposal
- a3. Identify and compare the investment opportunities of different projects.
- a4. Relate key aspects of monitoring and evaluation of project design and management.
- a5. Explain feasibility study phases
- a6. List main demand forecasting techniques considering their limitations and constraints.
- a7. State the steps for preparing market study
- a8. Discuss how technical study can affect the investment decision.
- a9. Outline the main financial techniques used to prepare financial study
- a10. Describe the national impact of the project on the economy

#### b. Intellectual Skills

*On completing the course, the student should be able to:*

- b1. Identify the importance of conducting a feasibility study prior to any major investment project such as establishing a new project, expansion of existing project, and replacements of major machinery and equipment.
- b2. Relate decisions concerning projects to the wider micro and macroeconomic policy analysis
- b3. Estimate market demand using different demand forecasting technique
- b4. Prepare market research study
- b5. Use different financial techniques to estimate the cost of starting the business
- b6. Link concept of capital structure with firm decisions of finance.
- b7. Link technical studies to demand and market studies.
- b8. Relate scenario analysis to decision making
- b9. Prepare final report.

#### c. Practical / Professional Skills

*On completing the course, the student should be able to:*

- c1. Prepare a research project on appraising investment decisions.
- c2. Appraise financial statements.
- c3. Formulate financial analysis of projects.
- c4. Demonstrate the ability to apply different market, financial and technical studies on new service or product.

- c5. Write final report that help investors to take their final decision,  
 d. **General and Transferable Skills**

*On completing the course, the student should be able to:*

- d1. Experience with conceptual frameworks effective for problem solving and decision making.  
 d2. Acquire analytical reasoning skills, numeric and clear effective communication skills.  
 d3. Test the ability of students to work under pressure and as part of a team.  
 d4. Communicate effectively with others  
 d5. Retrieve different management, financial, and economic terminologies  
 d6. Develop their report writing skills  
 d7. Improve their presentation skills

## II. Overall Aims of the Course

The objective of this course is to provide students with an introduction to the auditing profession. The course provides the students with main concepts and objectives of auditing, types of audits and auditors. In addition, students will be able to identify the responsibilities and duties of auditors, the generally accepted auditing standards, the different types of audit reports, and audit evidence

### III. Program ILOs Covered by the Course

Program ILOs Covered by the Course			
Knowledge and Understanding	Intellectual Skills	Practical / Professional Skills	General and Transferable Skills
a8, a17, a18	b9	c15, c17, c20	d1, d2d4, ,d9,d10

### IV. Intended Learning Outcomes of the Course (ILOs)

#### a. Knowledge and Understanding

*On completing the course, the student should be able to:*

- a1. Describe the nature and scope of auditing and related services.
- a2. State the difference between auditing and accounting.
- a3. Discuss the difference between types of auditors and audits.
- a4. Outline the nature of CPA firms, what they do, and their structure.
- a5. Identify the role of the PCAOB and AICPA on the CPA profession.
- a6. Identify the generally accepted auditing standards in applying ethical and disciplinary consideration in the field.
- a7. Describe the parts of the standard unqualified audit report.
- a8. List the conditions required to issue the standard unqualified audit report.
- a9. Identify the types of audit reports that can be issued when an unqualified opinion is not justified.
- a10. Define management's responsibility and auditor's responsibility regarding the financial statements and internal control.
- a11. Distinguish among the three categories of management assertions about financial information.
- a12. Specify the characteristics that determine the persuasiveness of evidence.

#### b. Intellectual Skills

*On completing the course, the student should be able to:*

- b1. Differentiate audit services from other assurance and non-assurance services provided by CPAs.
- b2. Relate quality control standards and practices within the accounting profession.
- b3. Design an audit plan and its procedures.
- b4. Choose the appropriate audit report based on different situations.
- b5. Draft appropriately modified audit reports under a variety of circumstances.
- b6. Explain how materiality affects audit reporting decisions.
- b7. Relate the six-general transaction related audit objectives to management assertions for classes of transactions.
- b8. Link the eight-general balance-related audit objectives to management assertions for account balances.
- b9. Link the four presentation and disclosure-related audit objectives to management assertions for presentation and disclosure.
- b10. Interpret the eight types of evidence used in auditing.

**Course specifications**

**c. Practical / Professional Skills**

*On completing the course, the student should be able to:*

- c1. Write different types of audit reports.
- c2. Use all professional tests in auditing field.
- c3. Provide an opinion about materiality levels and its relationship with the type of audit opinion.
- c4. Enhance report writing skills

**d. General and Transferable Skills**

*On completing the course, the student should be able to:*

- d1. Respect teamwork
- d2. Choose appropriate tools in analyzing.
- d3. Utilize auditing terminology
- d4. Manage time effectively

## II. Overall Aims of the Course

This course aims at introducing to the students the characteristics of a partnership, formation of a partnership, the distribution of profits and losses among partners, admission of a new partner, withdrawal of an existing partner, and the liquidation of a partnership. Furthermore, this course acquaints the students with the necessary skills and knowledge to understand accounting for corporations.

### III. Program ILOs Covered by the Course

Program ILOs Covered by the Course			
Knowledge and Understanding	Intellectual Skills	Practical / Professional Skills	General and Transferable Skills
a1, a9, a13, a19	b8,	c11, c14	d4, d5, d9, d10

### IV. Intended Learning Outcomes of the Course (ILOs)

#### a. Knowledge and Understanding

*On completing the course, the student should be able to:*

- a1. Identify the characteristics of the partnership form of business organization.
- a2. Explain the effects of the entries to record the liquidation of a partnership.
- a3. List the major characteristics of a corporation.
- a4. Explain the accounting for treasury stock.
- a5. Outline the items reported in a retained earnings statement.
- a6. Describe the form and content of corporation income statements.
- a7. State reasons for issuing bonds.
- a8. Identify the methods for the presentation and analysis of long-term liabilities.
- a9. Outline the usefulness of the statement of cash flows.
- a10. Explain the operating, investing, and financing activities.

#### b. Intellectual Skills

*On completing the course, the student should be able to:*

- b1. Interpret the accounting entries for the formation of a partnership.
- b2. Analyze the bases for dividing net income or net loss.
- b3. Design the form and content of partnership financial statements.
- b4. Illustrate how common stock is issued.
- b5. Evaluate the stockholders' equity section.
- b6. Differentiate between cash dividends and stock dividends.
- b7. Analyze the entries for the issuance of bonds and interest expense.
- b8. Interpret the entries when bonds are redeemed or converted.
- b9. Design a statement of cash flows using the indirect method.
- b10. Evaluate the statement of cash flows.

#### c. Practical / Professional Skills

*On completing the course, the student should be able to:*

- c1. Use accounting techniques to journalize the entries.
- c2. Practice accounting techniques to prepare the financial statements.
- c3. Select the accounting techniques to compute earnings per share
- c4. Write reports effectively.

Course specifications

d. General and Transferable Skills

*On completing the course, the student should be able to:*

- d1. Develop problem solving tools for facing different situations in partnership, and corporations.
- d2. Use different accounting terminologies related to business practices.
- d3. Demonstrate cognitive thinking abilities related to different forms of accounting entities
- d4. Manage time effectively.

## II. Overall Aims of the Course

This course provides in-depth study of the techniques and theories used in cost accounting. It covers some cost concepts used to support management decision-making, difference between Job Costing and Process Costing, Activity Based Costing (ABC), Standard Costing and Direct Cost Variance Analysis.

### III. Program ILOs Covered by the Course

Program ILOs Covered by the Course			
Knowledge and Understanding	Intellectual Skills	Practical / Professional Skills	General and Transferable Skills
a13	b8, b9	C1,c11	d1,d4, d5, d9

### IV. Intended Learning Outcomes of the Course (ILOs)

#### a. Knowledge and Understanding

*On completing the course, the student should be able to:*

- a1. Explain the basic concepts and principles of job costing
- a2. Outline the importance and role of cost accounting systems.
- a3. Define the basic concepts and principles of process-costing
- a4. Identify Standard Costing and Direct Cost Variance Analysis in business evaluation.
- a5. Demonstrate weighted average and FIFO methods
- a6. Discuss activity-based costing concepts and principles
- a7. Identify Flexible Budgets, Direct-Cost Variances, and Management Control

#### b. Intellectual Skills

*On completing the course, the student should be able to:*

- b1. Analyze cost accounting information and their interpretation used in supporting management decision making.
- b2. Suggest the proper cost accounting techniques in solving problems such as ABC
- b3. Apply Activity based costing and compare it with other costing systems
- b4. Evaluate job costing, process costing and ABC
- b5. Prepare a budget and use it for performance evaluation
- b6. Choose appropriate costing method for different organizations.
- b7. Provide recommendations to improve the business operations

#### c. Practical / Professional Skills

*On completing the course, the student should be able to:*

- c1. Choose the appropriate cost scientific approaches in problem solving
- c2. Use cost skills in solving problems of work field
- c3. Differentiate between costing techniques
- c4. Use Activity Based Costing system and other costing systems
- c5. Using cost accounting methods evaluate the business performance

#### d. General and Transferable Skills

*On completing the course, the student should be able to:*

- d1. Develop different scientific terminologies related to cost.
- d2. Manage time effectively.
- d3. Demonstrate ability to use different problem-solving techniques.

## V. Course Matrix Content

No. of weeks	Main Topic	Credit Hours: 3H		Course ILOs Covered by Topic (By ILO Code)			
		Theoretical	Practical	K.U.	I.S.	P.P.S.	G.T.S
1-2	<b>Job Costing</b> -Describe the building-block concepts of costing systems. -Distinguish job costing from process costing. -Describe the approaches to evaluating and implementing job-costing systems	3	1	a1, a2	b1, b2, b4, b6, b7	c1- c5	d1-d3
3 - 4	<b>Job Costing</b> -Distinguish between actual, budgeted, and normal costing. -Analyze the flow of costs from direct and indirect cost pools to inventory accounts, including adjustments for over- and under allocated costs.	3	1	a1, a2	b1, b2, b4, b5, b6, b7	c1- c5	d1-d3
5 - 6	<b>Process Costing</b> -Distinguish process- from job costing allocation methods within -Apply the weighted-average method of process costing	3	1	a2, a3, a5	b1, b6, b7	c1- c5	d1-d3
7	<b>Process Costing</b> -Apply the FIFO method of process costing -Apply process-costing methods to report transferred-in costs and operations costing.	3	1	a2, a3, a5	b1, b6, b7	c1- c5	d1-d3
8	<b>Mid-term Exams</b>						
9-11	-Activity-Based Costing and -Activity-Based Management	3	1	a2,a6	b1- b7	c1- c5	d1-d3
12-13	-Flexible Budgets, -Direct-Cost Variances, and -Management Control	3	1	a2, a4, a7	b1, b6, b7	c1, c2, c5	d1-d3
14-15	<b>Final exams</b>

## II. Overall Aims of the Course

The main objective of this course is to enable students to have an in-depth knowledge of the principles and objectives of the techniques and theories used in managerial accounting and recognize managerial accounting concepts for external and internal analysis, reporting, and decision-making.

### III. Program ILOs Covered by the Course

Program ILOs Covered by the Course			
Knowledge and Understanding	Intellectual Skills	Practical / Professional Skills	General and Transferable Skills
a10, a12, a13, a15	b8, b10, b13	c13, c18	d2, d4, d5

### IV. Intended Learning Outcomes of the Course (ILOs)

#### a. Knowledge and Understanding

*On completing the course, the student should be able to:*

- a1. Explain how changes in activity affect contribution margin and net operating income.
- a2. Identify the break-even point and the level of sales to achieve a desired target profit.
- a3. Discuss the concepts of margin of safety.
- a4. Outline the concept of high low method.
- a5. Identify relevant and irrelevant costs and benefits in a decision.
- a6. Discuss the concept of differential analysis as a key to decision making
- a7. State the purpose of budgets and how different types of budgets are prepared.
- a8. Define responsibility accounting.
- a9. Demonstrate the strengths and weaknesses related to the meaning of Return on Investment (ROI) and Residual Income.
- a10. Analyze how customers' sensitivity changes in price influence pricing decisions.

#### b. Intellectual Skills

*On completing the course, the student should be able to:*

- b1. Use the contribution margin ratio (CM ratio) to compute changes in contribution margin and net operating income resulting from changes in sales volume.
- b2. Compute the margin of safety.
- b3. Calculate the degree of operating leverage at a particular level of sales and explain how it can be used to predict changes in net operating income.
- b4. Analyze a mixed cost using the high-low method.
- b5. Evaluate the basis upon which you choose from among at least two alternatives.
- b6. Interpret the results of differential analysis.
- b7. Prepare a budgeted income statement and a budgeted balance sheet to understand how budgets are interconnected and related.
- b8. Link the concept of responsibility accounting to budgeting.
- b9. Report on the results of Return on Investment (ROI) and residual income.
- b10. Analyze pricing decisions using value-based pricing.
- b11. Compute the target cost for a new product or service.

**c. Practical / Professional Skills**

---

*On completing the course, the student should be able to:*

- c1. Recommend a product line or other business segment should be added or dropped.
- c2. Examine the make or buy decision.
- c3. Decide whether a special order should be accepted.
- c4. Analyze single constraint decision.
- c5. Prepare a master budget.

**d. General and Transferable Skills**

---

*On completing the course, the student should be able to:*

- d1. Use problem solving tools in helping the decision-making process of management.
- d2. Innovate creative managerial accounting techniques in different situations.
- d3. Communicate with decision makers results of managerial analyses.
- d4. Work in teams to find solutions to managerial issues.

## V. Course Matrix Content

No. of weeks	Main Topic	Credit Hours: 3H		Course ILOs Covered by Topic (By ILO Code)

## II. Overall Aims of the Course

The objective of this course is to provide an overview on governmental accounting. Governmental accounting includes concepts, objectives and principles of governmental accounting, the budgetary process, classifications, and methods of the preparation and structure of the general budget in Egypt.

### III. Program ILOs Covered by the Course

Program ILOs Covered by the Course			
Knowledge and Understanding	Intellectual Skills	Practical / Professional Skills	General and Transferable Skills
a9, a13, a14, a15	b8	c11, c13, 18	d4, d6, d9

### IV. Intended Learning Outcomes of the Course (ILOs)

#### a. Knowledge and Understanding

*On completing the course, the student should be able to:*

- a1. Describe the nature of governmental sector and state main governmental accounting basis.
- a2. Define Fund accounting and mention its types.
- a3. Outline the differences between governmental accounting system and preparatory system.
- a4. Identify users of governmental and financial reporting.
- a5. Discuss the public budget, its structure and classification in Egypt.
- a6. Explain the rules of internal control in governmental units.
- a7. Describe the nature of national accounting and methods of measuring national production
- a8. Explaining method of preparing the production and the coefficient matrices.

#### b. Intellectual Skills

*On completing the course, the student should be able to:*

- b1. Suggest the applicable accounting rules in governmental transactions in Egypt.
- b2. Interpret the use of documents, books, and reports in the Egyptian and governmental accounting system.
- b3. Evaluate governmental accounting basis.
- b4. Differentiate between types of governmental fund.
- b5. Prepare classified budgets
- b6. Compare current budget, capital budget and budget of local administration units.
- b7 Clarifying how to get each of the production and coefficient matrix from the other.

#### c. Practical / Professional Skills

*On completing the course, the student should be able to:*

- c1. Prepare documents, books, and reports
- c2. Present monthly, quarterly, and annual reports
- c3. Apply current, capital, and local administration units' budget.
- c4. Present different types of funds of governmental accounting system.
- c5 Applying different methods for calculating national production and its matrix.

**d. General and Transferable Skills**

*On completing the course, the student should be able to:*

- d1. Apply critical thinking skills in facing different governmental accounting solutions
- d2. Work on different departments of Government Accounting.
- d3. Enhance governmental accounting reporting skills.
- d4. Enhance national accounting reporting skills.
- d5. Improve students' presentation skills.

## II. Overall Aims of the Course

This course provides students with an overview of the Egyptian Tax System. By the end of the course, students should be able to understand the different classifications of tax, the characteristics of tax on natural persons' income, unified tax on salaries and the like, commercial and industrial revenues, non-commercial professions revenues, real estate revenues, mobile capital revenues, sales tax, stamp tax, and corporate tax.

### III. Program ILOs Covered by the Course

Program ILOs Covered by the Course			
Knowledge and Understanding	Intellectual Skills	Practical / Professional Skills	General and Transferable Skills
a4, a16	b7, b9	c19	d4, d5, d9

### IV. Intended Learning Outcomes of the Course (ILOs)

#### a. Knowledge and Understanding

*On completing the course, the student should be able to:*

- a1. Outline the nature of tax accounting, and its relationship to accounting courses.
- a2. Define tax accounting, taxpayer and determine the different classifications of tax.
- a3. Identify tax period, liability, and the conditions under which the natural person is considered residence in Egypt.
- a4. Explain the conditions for levying tax on different types of tax.
- a5. Demonstrate the revenues including in tax base and discuss the tax exemptions under recent Egyptian Laws.
- a6. Discuss the other exemptions for in-kind benefit.
- a7. Outline the condition under which taxpayer can benefit from personal exemptions.
- a8. Name the exemptions for non-commercial professions.
- a9. Determine the importance of keeping regular books.
- a10. Explain the tax on the values of alienations of realties.
- a11. Define VAT and its characteristics.
- a12. Discuss the registration due within the VAT department

#### b. Intellectual Skills

*On completing the course, the student should be able to:*

- b1. Evaluate cases under which tax period less or more than twelve months.
- b2. Apply tax brackets classification to compute the tax due and tax payable.
- b3. Calculate social insurance, and medical insurance.
- b4. Use tax rules to compute net taxable revenue, and total tax due per month/per year.
- b5. Prepare the settlement list at the end of the year.
- b6. Calculate the in-kind benefit, and lump tax on sums received by resident and non-resident in Egypt.
- b7. Compute the deductible costs and taxable revenues for non-commercial professions.
- b8. Compare between computing tax due in case of keeping regular books or using arbitrary basis.
- b9. Compute revenues of agricultural Exploitation of Horticultural crops.
- b10. Calculate the gross value of the invoice that issued by producer, wholesaler and retailer.
- b11. Calculate the tax due that must be paid to VAT department by producer, wholesaler, and retailer.

**c. Practical / Professional Skills**

*On completing the course, the student should be able to:*

- c1. Apply tax accounting calculations to compute the tax for natural and juridical person.
- c2. Calculate the tax due on different sources of revenues as salaries, free professions, non-commercial activities, real-estate wealth, and value added tax in real life.
- c3. Analyze, and interpret the information contained in a tax return presented to the tax administration.

**d. General and Transferable Skills**

*On completing the course, the student should be able to:*

- d1. Use problem solving tools in computing tax.
- d2. Develop intellectual and cognitive skills to determine and support a solution to tax accounting problems.
- d3. Use terminology related to tax accounting and practices.

Course Prerequisite(s)	Auditing (ACT 301) Tax Accounting (ACT 306)				
Approval Date Of course Specification	18/7/2022				

## II. Overall Aims of the Course

This course provides students with skills necessary to perform operational auditing, discover employee and management fraud and duties and responsibilities of external auditor.

### III. Program ILOs Covered by the Course

Program ILOs Covered by the Course			
Knowledge and Understanding	Intellectual Skills	Practical / Professional Skills	General and Transferable Skills
a8, a17, a18	b9, b13	c15, c17, c18, c20	d4, d6, d7, d8

### IV. Intended Learning Outcomes of the Course (ILOs)

#### a. Knowledge and Understanding

*On completing the course, the student should be able to:*

- a1. Outline the litigious environment in which CPAs practice, and differentiate between business failure, audit failure, and audit risk.
- a2. Describe the liability of accountants to clients, third parties and related defenses under different laws.
- a3. Outline the importance of audit planning and its procedures and identify the client's business industry and risk.
- a4. Discuss the five major types of analytical procedures.
- a5. List the steps of materiality.
- a6. Demonstrate COSO internal control framework, five components, and its objectives.
- a7. Identify fraud its conditions, and auditor's responsibility for detecting them.
- a8. Define the different types of audit tests and the impact of information technology on audit testing.
- a9. Define sampling and sampling distribution.

#### b. Intellectual Skills

*On completing the course, the student should be able to:*

- b1. Illustrate how CPAs can reduce litigation threats.
- b2. Explain legal liability concepts of accountants and auditors.
- b3. Evaluate clients, make acceptance decisions, and perform initial audit planning.
- b4. Compute common financial ratios.
- b5. Explain the relationship between different types of audit risk.
- b6. Interpret main reasons for planning.
- b7. Link the concept materiality with different types of audit risk model.
- b8. Differentiate between tests of controls and substantive tests of transactions for different accounts.
- b9. Demonstrate the difference between evaluating, reporting, and testing internal controls.
- b10. Develop responses to identified fraud risks.
- b11. Compare between transaction-related audit objectives with balance-related and presentation and disclosure related audit objectives.
- b12. Apply sampling attributes in tests of controls and substantive tests of transactions.

**c. Practical / Professional Skills**

*On completing the course, the student should be able to:*

- c1. Evaluate materiality and different types of audit risk.
- c2. Compare between different types of audit planning and analytical procedures.
- c3. Analyze audits of internal control and control risk.
- c4. Detect different types of fraud auditing.
- c5. Develop solutions for different auditing cases.
- c6. Choose between representative samples.

**d. General and Transferable Skills**

*On completing the course, the student should be able to:*

- d1. Develop intellectual and cognitive skills.
- d2. Use communication skills in group discussions.
- d3. Apply analytical thinking in the judgment of the amounts to be considered material.
- d4. Develop presentation skills.

## II. Overall Aims of the Course

The main objective of this course is to understand accounting problems and information disclosure in preparing financial statements in organizations with special accounting systems. Students will recognize several accounting systems of such as accounting for banks, petroleum, oil and gas companies, and insurance companies.

### III. Program ILOs Covered by the Course

Program ILOs Covered by the Course			
Knowledge and Understanding	Intellectual Skills	Practical / Professional Skills	General and Transferable Skills
a1, a2 a9,a13, a14	b7, b8, b14	c11	d4, d5, d8

### IV. Intended Learning Outcomes of the Course (ILOs)

#### a. Knowledge and Understanding

*On completing the course, the student should be able to:*

- a1. Outline the differences between services offered by banks
- a2. Describe the organizational structure for commercial banks
- a3. Outline the different types of departments in banking sector
- a4. Explain the accounting treatments used in recording transactions of banks.
- a5. Identify the main basic terms and concepts for oil and gas accounting.
- a6. Discuss the Oil and Gas value chain and stages of exploring and production.
- a7. State the methods of accounting for oil and gas costs.
- a8. Explain Financial Accounting for Drilling and Development costs.
- a9. Identify the main concepts and terms of Insurance.
- a10. Outline the Importance, divisions and main re insurance activities.
- a11. Discuss the main components of accounting system of insurance company

#### b. Intellectual Skills

*On completing the course, the student should be able to:*

- b1. Compare between two different divisions of commercial banks.
- b2. Analyze the different departments of commercial banks and its Accounting treatment.
- b3. Report on different services offered by banks.
- b4. Apply two accounting methods to calculate oil and gas costs.
- b5. Calculating Depletion and amortization under both accounting methods for oil and gas.
- b6. Record oil and gas transactions in journal entries.
- b7. Prepare the financial statements of insurance company
- b8. Differentiate the accounting treatments used by different organizations.

#### c. Practical / Professional Skills

*On completing the course, the student should be able to:*

- c1. Prepare journal entries for different organizations
- c2. Analyze the processes followed by different bank departments
- c3. Prepare financial statements for different accounting organizations.

#### d. General and Transferable Skills

*On completing the course, the student should be able to:*

- d1. Develop knowledge at solving problems of different types of organizations.
- d2. Apply critical thinking skills to solve various accounting problems.
- d3. Participate in continuous professional development and lifelong learning through developing intellectual and cognitive skills

## II. Overall Aims of the Course

The objective of this course is to help students build the theoretical framework of a scientific research and select a research topic related to accounting profession. It helps students prepare a research design that includes the different steps of a scientific research, work in a team to tackle a predetermined accounting problem and apply analytical and practical skills towards providing a solution to this specific accounting problem.

### III. Program ILOs Covered by the Course

Program ILOs Covered by the Course			
Knowledge and Understanding	Intellectual Skills	Practical / Professional Skills	General and Transferable Skills
a6 ,a7	b1,b2 ,b4	C2	d1, d2, d3,d4,d5, d6, d8,d10

### IV. Intended Learning Outcomes of the Course (ILOs)

#### a. Knowledge and Understanding

*On completing the course, the student should be able to:*

- a1. Describe the different steps of a research project
- a2. Identify the attributes of a good research topic
- a3. Explain the meaning of research question (s), research objective (s), and research Hypothesis
- a4. Identify the different types of theories
- a5. Discuss the different research philosophies and approaches
- a6. Mention the importance and purpose of the critical literature review to a research project
- a7. Explain what is meant by plagiarism

#### b. Intellectual Skills

*On completing the course, the student should be able to:*

- b1. Generate ideas that will help in the choice of an appropriate research topic
- b2. Select an appropriate research topic
- b3. Analyze research problem
- b4. Plan and design a research project
- b5. Formulate research question and research objectives
- b6. Differentiate between research philosophies and approaches
- b7. Rank the literature sources available
- b8. Evaluate the relevance of literature sources
- b9. Adopt a critical perspective in reviewing the literature

#### c. Practical / Professional Skills

*On completing the course, the student should be able to:*

- c1. Use different techniques to generate research ideas
- c2. Turn research ideas into a research project that has clear research question (s) and objectives
- c3. Apply different methods to undertake a literature search
- c4. Summarize previous studies related to research topic
- c5. Evaluate and criticize previous studies related to research topic
- c6. Relate previous studies to each other
- c7. Reference the literature found accurately
- c8. Draft a research proposal
- c9. Write a relevant literature review

**d. General and Transferable Skills**

*On completing the course, the student should be able to:*

- d1. Enhance presentation and soft skills
- d2. Develop critical and analytical thinking
- d3. Use brainstorming process
- d4. Lead and work in a team with identified objectives and tasks
- d5. Manage time and efforts to meet deadlines

## II. Overall Aims of the Course

This course acquaints the students with necessary knowledge and skills to gather data through quantitative and qualitative methods, analyze different types of data by applying a variety of statistical and qualitative methods, interpret the findings, test the hypotheses of a scientific research and, formulate the results, conclusion, and recommendations of a scientific research.

### III. Program ILOs Covered by the Course

Program ILOs Covered by the Course			
Knowledge and Understanding	Intellectual Skills	Practical / Professional Skills	General and Transferable Skills
a6, a8, a11	b2, b4, b13	c4, c12	d1, d2, d3, d6,d10

### IV. Intended Learning Outcomes of the Course (ILOs)

#### a. Knowledge and Understanding

*On completing the course, the student should be able to:*

- a1. Outline ethical issues at different stages of research
- a2. Outline the various types of data collection, design, analysis, and presentation.
- a3. Differentiate between primary and secondary data
- a4. Identify a suitable sampling frame from research objectives
- a5. Describe the different types of interview
- a6. Explain the different levels of statistical analysis
- a7. Summarize the different steps of a scientific research project

#### b. Intellectual Skills

*On completing the course, the student should be able to:*

- b1. Select the type of data that suites the research objectives
- b2. Plan and organize the data collection process
- b3. Conceptualize a questionnaire covering research variables
- b4. Prepare an interview guide based on predetermined themes
- b5. Aggregate the data collected from different sources
- b6. Suggest an interpretation of results
- b7. Report the different steps of a research project in a scientific manner
- b8. Relate the results of statistical analysis to theoretical hypotheses

#### c. Practical / Professional Skills

*On completing the course, the student should be able to:*

- c1. Negotiate the access to data sources
- c2. Pilot and deliver a questionnaire to collect data
- c3. Apply appropriate actions to enhance response rates
- c4. Measure the validity and reliability of the data collected
- c5. Conduct an interview respecting research issues
- c6. Analyze data using different statistical tools
- c7. Summarize the data collected from qualitative source
- c8. Compare the findings with predicted results
- c9. Write a report summarizing the steps of research project

**d. General and Transferable Skills**

*On completing the course, the student should be able to:*

- d1. Enrich scientific research ethics
- d2. Develop critical and analytical thinking
- d3. Lead and work in a team with identified objectives and tasks
- d4. Manage time and efforts to meet deadlines
- d5. Enhance presentation and soft skills

## II. Overall Aims of the Course

This course aims at providing the students with the skills that enable them to blend entrepreneurial goals with a realistic survey of the wide variety of functional business skills needed to operate a small firm effectively. Moreover, the course will focus on acquaint the students with knowledge and skills from different discipline as marketing, financial management, and business planning, as well as a clearer view of small business's contribution to the national economy

### III. Program ILOs Covered by the Course

Program ILOs Covered by the Course			
Knowledge and Understanding	Intellectual Skills	Practical / Professional Skills	General and Transferable Skills
a4, a8	b1, b6, b12	c3, c16	d2, d6, d7, d8

### IV. Intended Learning Outcomes of the Course (ILOs)

#### a. Knowledge and Understanding

---

*On completing the course, the student should be able to:*

- a1. Identify the concept of negotiation
- a2. List the stages of negotiation process.
- a3. Discuss the different types of negotiation.
- a4. Define the relation between communication skills and negotiation skills.
- a5. Explain of conflict and the cost of conflict.
- a6. State the different types of conflict.
- a7. Identify the Conflict Resolution Process
- a8. Explain how to manage difficult negotiations: Third-Party Approaches.
- a9. Determine the types of third-party intervention.
- a10. Describe the main phases of negotiation.
- a11. Outline the different types of negotiation goals.
- a12. Explain the difference between negotiation strategies and tactics.

#### b. Intellectual Skills

---

*On completing the course, the student should be able to:*

- b1. Analyze the negotiation process
- b2. Discover third party intervention to manage different negotiation.
- b3. Compare different types of negotiation strategies.
- b4. Differentiate between the negotiation strategies and tactics.
- b5. Analyze different negotiation case studies.
- b6. Interpret the effects of developing influence and persuasion skills on managing effective negotiations.

**c. Practical / Professional Skills**

---

*On completing the course, the student should be able to:*

- c1. Prepare a framework for a negotiation process.
- c2. Write the Position, Interest, worst alternative to a negotiation, the best alternative to a negotiation agreement, walk away price and Zone of possible agreement
- c2. Design a negotiation teamwork.
- c3. Select a negotiation plan.
- c4. Use the appropriate negotiation strategy.
- c5. Select different negotiation tactics.
- c6. Manage negotiation process.
- c7. Practice communication and assertiveness skills.
- c8. Recommend the appropriate tools to develop persuasion skills.

**d. General and Transferable Skills**

---

*On completing the course, the student should be able to:*

- d1. Work coherently and successfully as a part of a team.
- d2. Manage self-stress skills
- d3. Lead teamwork as well as oral and written communications
- d4. Manage tasks, time, and resources effectively.
- d5. Demonstrate understanding of relevant mathematical and statistical technique
- d6. Develop the ability to think rationally
- d7. Innovate creative negotiation techniques

## II. Overall Aims of the Course

By the end of this course, students should be able to understand and demonstrate the use of basic and advanced proper writing techniques that today's technology demands, including anticipating audience reaction, writing effective and concise letters and memos, preparing informal and formal reports, proofreading and editing copies of business correspondence, using career skills that are needed to succeed, such as using ethical tools, working collaboratively, resolving workplace conflicts, planning successfully for participating in meetings and conducting proper techniques in telephone usage, using e-mail effectively and efficiently, developing interpersonal skills that contribute to effective personal, social and professional relationships, and utilizing electronic presentation software

### III. Program ILOs Covered by the Course

Program ILOs Covered by the Course			
Knowledge and Understanding	Intellectual Skills	Practical / Professional Skills	General and Transferable Skills
a4, a11	b1, b8, b11	c6, c15	d2, d3, d4, d5, d6, d7

### IV. Intended Learning Outcomes of the Course (ILOs)

#### a. Knowledge and Understanding

*On completing the course, the student should be able to:*

- a1. Define communication and the importance of effective business communication.
- a2. Discuss professional communication.
- a3. Describe steps to improve the clarity of your writing.
- a4. Explain the credible sources of information in building strong relationships in the stakeholders.
- a5. Describe how effective listening can contribute to your career success
- a6. Identify and conduct an information-gathering interview to assist you in a current work or school project
- a8. Explain the ways in which communication in the workplace is a form of problem solving.

#### b. Intellectual Skills

*On completing the course, the student should be able to:*

- b1. Specify the challenges and opportunities of mobile communication in business.
- b2. Identify major collaboration technologies and explain how to give constructive feedback.
- b3. Interpret the listening process.
- b4. Suggest how good listeners overcome barriers at each stage of the process.
- b5. Analyze the different individual communication forms and styles
- b6. Differentiate between verbal and non-verbal message.
- b7. Develop an effective strategy for a specific presentation

#### c. Practical / Professional Skills

*On completing the course, the student should be able to:*

- c1. Investigate the challenges and opportunities of various communication forms and steps in business.
- c2. Analyze major collaboration technologies.
- c3. Present constructive feedback.

#### d. General and Transferable Skills

*On completing the course, the student should be able to:*

- d1. Develop Effective Communication Skills.
- d2. Innovate Effective Presentation Skills.
- d3. Manage Team Spirit & Team cooperation
- d4. Use self-management skills.

Course Prerequisite(s)	MGT 101				
Approval Date Of course Specification	7/9/2021				

## II. Overall Aims of the Course

**Upon completion of this course, students will be able to:**

- Use the various techniques for planning and managing projects
- Explain the stages and processes of the project life cycle
- Develop a testable, effective business concept
- Demonstrate analytical and critical thinking skills
- Conduct a feasibility analysis for a new venture
- Analyze business report and publications
- Apply research methodologies and practices to an allied business field.
- Apply contemporary scientific methods and mathematical techniques.

### III. Program ILOs Covered by the Course

Program ILOs Covered by the Course			
Knowledge and Understanding	Intellectual Skills	Practical / Professional Skills	General and Transferable Skills
a1, a2, a9, a18	b2, b5, b12	c2, c4, c11, c16	d1, d2, d3, d4, d6, d7

### IV. Intended Learning Outcomes of the Course (ILOs)

#### a. Knowledge and Understanding

*On completing the course, the student should be able to:*

- a1. Explain the concepts and main features of the environment facing small business.
- a2. Identify the factors conducive to entrepreneurship and small business.
- a3. Outline market competitiveness and competitive advantage.
- a4. Identify mission and vision of any small business.
- a5. State types of franchise.
- a6. Discuss the drawbacks of franchise.
- a7. Select bootstrap marketing plan.
- a8. Outline the porter model.
- a9. Explain the major strategies of business—differentiation, cost, and focus.
- a10. Determine the major risks to business plan success

#### b. Intellectual Skills

*On completing the course, the student should be able to:*

- b1. Evaluate critical tools, functions, concepts, and skills that are required for owner/managers of small business.
- b2. Develop a clear vision and meaningful mission statements.
- b3. Analyze strengths opportunities, weaknesses, and threats of any business by using SWOT Analysis.
- b4. Compare between buying franchise and starting new business
- b5. Suggest ways to reduce risk of business.
- b6. Formulate Balance sheet.
- b7. Construct business plan.

#### c. Practical / Professional Skills

*On completing the course, the student should be able to:*

- c1 Apply the skills necessary for venture creation and small business management.
- c2 Use business plan
- c3 Practice successful skills needed by small business owners.

#### d. General and Transferable Skills

*On completing the course, the student should be able to:*

- d1. Develop working in a project
- d2. Use higher order thinking and life-long learning
- d3. Lead the skills necessary for venture creation and small business management.

Course Prerequisite(s)	Financial Accounting (ACT 102) Introduction to Computer (CSC 101)				
Approval Date of Course Specification	18/7/2022				

## II. Overall Aims of the Course

This course introduces some computer applications related to accounting systems. It includes definition and components of e-accounting, review of major internet-based accounting software, internet applications to perform financial accounting functions, and running electronic financial spreadsheet tools to provide efficient decision making to solve accounting problems.

### III. Program ILOs Covered by the Course

Program ILOs Covered by the Course			
Knowledge and Understanding	Intellectual Skills	Practical / Professional Skills	General and Transferable Skills
a3, a10,a13	b8, b14	c9, c12,c14	d5, d6, d9

### IV. Intended Learning Outcomes of the Course (ILOs)

#### a. Knowledge and Understanding

*On completing the course, the student should be able to:*

- a1. Discover the basic features of Microsoft Office Excel 2016
- a2. Outline the advantages of spreadsheet in solving accounting problems
- a3. Explain how computerized accounting systems work
- a4. Compare computerized accounting systems with manual accounting systems
- a5. Memorize basic accounting principles and theory
- a6. Outline the accounting cycle manually and electronically
- a7. Describe how accounting computerized models could be built

#### b. Intellectual Skills

*On completing the course, the student should be able to:*

- b1. Analyze the economic events to identify their financial consequences in accounting terms
- b2. Choose the appropriate formulas to enter data in preprogrammed spreadsheet models
- b3. Recommend computerized solutions to support decision-making process
- b4. Comment what-if analysis
- b5. Interpret graphical information
- b6. Develop model-building skills
- b7. Suggest advanced formulas to complete model building

#### c. Practical / Professional Skills

*On completing the course, the student should be able to:*

- c1. Use appropriate accounting terminology to identify accounting problems.
- c2. Develop formulas and enter data to complete partially constructed spreadsheet models
- c3. Make corrections to errors discovered in Excel-based company's books.
- c4. Perform what-if analysis
- c5. Prepare business reports in a scientific manner
- c6. Create different types of charts
- c7. Build models from start to finish to introduce computerized solutions to accounting problems

#### d. General and Transferable Skills

*On completing the course, the student should be able to:*

- d1. Communicate accounting problems.
- d2. Develop critical thinking skills to suggest solutions to accounting problems
- d3. Enhance research and reporting skills.
- d4. Develop information technology skills.

Course Prerequisite(s)	Advanced cost accounting (ACT303) Managerial accounting and budgeting (ACT304)				
Approval Date of Course Specification	18/7/2022				

## II. Overall Aims of the Course

This course includes a greater emphasis on managerial and cost accounting skills: Cost-volume-profit relationship, product costing methods, interaction between Activity Based Costing (ABC)/Activity Based Management (ABM) and Activity Based Budgeting (ABB). Emphasis is placed on Standard Costing systems and Indirect Cost Variance Analysis.

### III. Program ILOs Covered by the Course

Program ILOs Covered by the Course			
Knowledge and Understanding	Intellectual Skills	Practical / Professional Skills	General and Transferable Skills
a10, a11, a12, a13, a15	b10, b13	c11, c13, c14, c16, c18, c19	d5, d8

### IV. Intended Learning Outcomes of the Course (ILOs)

#### a. Knowledge and Understanding

---

*On completing the course, the student should be able to:*

- a1. Outline the basic concepts of Cost-Volume-Profit (CVP) analysis
- a2. Outline the break-even point for a multiproduct company
- a3. Explain the effects of shifts in the sales mix on contribution margin and the breakeven point.
- a4. Discuss how Activity-based costing (ABC) provide managers with cost information for strategic and other decisions
- a5. Describe the interaction between Activity Based Costing (ABC) and Activity Based Management (ABM)
- a6. Explain how variances provide feedback concerning how well an organization performed in relation to its budget.
- a7. Discuss the different types of variances and their implications
- a8. Explain the importance of target costing in pricing decision.
- a9. State how customers' sensitivity to changes in price should influence pricing decisions.
- a10. Identify relevant and irrelevant costs and benefits in a decision.

#### b. Intellectual Skills

---

*On completing the course, the student should be able to:*

- b1. Interpret the results of CVP analysis
- b2. Use CVP to evaluate what prices to charge, what marketing strategy to use, and what cost structure to maintain using CVP analysis
- b3. Differentiate between activity-based costing and traditional costing system.
- b4. Apply ABC in managing overhead and making decisions.
- b5. Evaluate the significance of direct materials and direct labor variances and
- b6. Demonstrate the difference between variable manufacturing overhead and the fixed overhead budget variances.
- b7. Analyze pricing decisions using value-based pricing.
- b8. Suggest the target cost for a new product or service
- b9. Evaluate the basis upon which you choose among alternatives

**c. Practical / Professional Skills**

---

*On completing the course, the student should be able to:*

- c1. Prepare different types of reports that help managerial accountant in taking decisions
- c2. Apply managerial accounting knowledge in problem solving and decision making.
- c3. Communicate results to management to help in decision making

**d. General and Transferable Skills**

---

*On completing the course, the student should be able to:*

- d1. Use problem solving tools in helping the decision-making process of management
- d2. Innovate creative managerial accounting techniques in different situations.

<b>Approval Date of Course Specification</b>	18/7/2022				

## II. Overall Aims of the Course

The objective of this course is to examine the design, operation, and control of accounting information systems, business cycles, business processes, and the flow of financial transactions through the accounting information systems.

### III. Program ILOs Covered by the Course

Program ILOs Covered by the Course			
Knowledge and Understanding	Intellectual Skills	Practical / Professional Skills	General and Transferable Skills
a10	b11, b12, b13	c12	d4, d5, d6, d9

### IV. Intended Learning Outcomes of the Course (ILOs)

#### a. Knowledge and Understanding

*On completing the course, the student should be able to:*

- a1. Outline the accounting and other information systems uses in managerial applications.
- b2. Explain the accountants' role in an information system
- a3. Outline the management of information systems and their impact upon organizations.
- a4. Identify the transaction cycle.
- a5. Define the main transaction processing approaches
- a6. Discuss the use of relevant communication and information technologies for application in business and management.
- a7. State the ethical aspects, different frauds, and internal controls needed in the Accounting Information Systems
- a8. Identify risk management and control of accounting information systems.
- a9. Determine the relationship, interrelation, and the processes of the accounting information system transaction cycles
- a10. Outline how block chain and artificial intelligence change and transform accounting.
- a11 The main uses of the outputs of AIS.

#### b. Intellectual Skills

*On completing the course, the student should be able to:*

- b1. Differentiate between the types of information systems
- b2. Interpret the different types of business cycles
- b3. Compare the types of documentation techniques
- b4. Choose security measures for different accounting systems.
- b5. Distinguish the fraud types, schemes and internal controls used to overcome frauds
- b6. Analyze the steps followed in transaction cycles.
- b7. Interpret the importance of how block chain revolutionized the work performed by account
- b8 Clarify how to use the AIS outputs in long and short term decisions.

#### c. Practical / Professional Skills

*On completing the course, the student should be able to:*

- c1. Apply different business cycles (revenues, expenditures, production, human resources, and financing cycles),
- c2. Design the flow of financial transactions, internal control to the information systems.

- c3. Select the appropriate internal controls to be followed in situations faced by business organizations.  
 c4. Determine the suitable techniques and criteria to use in assessment.

**d. General and Transferable Skills**

*On completing the course, the student should be able to:*

- d1. Innovate information system techniques in different situations.  
 d2. Apply critical thinking skills to solve various control problems.  
 d3. Work on different types of transaction processing cycle  
 d4. Use information technology in the accounting field.  
 d5. Enhance presentation skills

## II. Overall Aims of the Course

The objective of this course is to provide a critical examination of the accounting theory and practices involved in a selected number of advanced accounting topics. The course focuses on accounting for branches, accounting for mergers and acquisitions, prepare consolidated financial statements, intercompany transactions and record and eliminate those transactions when preparing consolidated financial reports.

### III. Program ILOs Covered by the Course

Program ILOs Covered by the Course			
Knowledge and Understanding	Intellectual Skills	Practical / Professional Skills	General and Transferable Skills
a9, a13	b8, b11	c11	d2, d4, d5, d6, d9

### IV. Intended Learning Outcomes of the Course (ILOs)

#### a. Knowledge and Understanding

*On completing the course, the student should be able to:*

- a1. Define branches and divisions as a way of expanding business operations
- a2. Explain the accounting system used for branches and divisions
- a3. Outline reconciliation of reciprocal ledger accounts
- a4. Discuss transactions between branches
- a5. Outline the need and various forms of business combination
- a6. Explain purchase and acquisition methods for the business combination
- a7. Define the nature of the parent-subsidiary concept
- a8. Explain the consolidated financial statements of a wholly owned and partially owned

#### b. Intellectual Skills

*On completing the course, the student should be able to:*

- b1. Interpret journal entry for home office and branches
- b2. Analyze combined financial statements for home office and branches
- b3. Interpret closing entry at the end of the accounting period
- b4. Record journal entries for business combination
- b5. Design a working paper for consolidated Balance Sheet
- b6. Prepare the consolidated financial statements.

#### c. Practical / Professional Skills

*On completing the course, the student should be able to:*

- c1. Use accounting techniques to journalize the entries.
- c2. Practice accounting techniques to prepare the financial statements.

#### d. General and Transferable Skills

*On completing the course, the student should be able to:*

- d1. Use problem solving tools for facing different situations in Accounting for branches, Business combination, consolidated financial statements.
- d2. Demonstrate intellectual and cognitive abilities when dealing with advanced accounting areas.
- d3. Apply communication skills when presenting financial information to stakeholders.

## II. Overall Aims of the Course

The objective of this course is to provide an overview on the international dimensions of accounting. It includes international accounting definition, objectives, characteristics, the institutions concerned with international accounting, accounting for external operations of multinational companies, accounting for operations of companies having branches and foreign agencies, and the accounting for the effects of price changes of foreign currencies.

### III. Program ILOs Covered by the Course

Program ILOs Covered by the Course			
Knowledge and Understanding	Intellectual Skills	Practical / Professional Skills	General and Transferable Skills
a9, a12	b7, b8, b14	c11, c18	d4, d5, d9, d10

### IV. Intended Learning Outcomes of the Course (ILOs)

#### a. Knowledge and Understanding

*On completing the course, the student should be able to:*

- a1. Explain how international accounting is distinct from domestic accounting.
- a2. Outline the factors that are contributing to the internationalization of accounting field.
- a3. Describe how financial reporting is regulated and enforced in Europe, the Americas and Asia
- a4. Explain the nature of foreign currency transactions
- a5. Identify the difference between a translation gain or loss and a transaction gain or loss.
- a6. Explain why financial statements potentially are misleading during periods of changing prices.
- a7. Discuss the effect of general price-level adjustments on financial statement amounts
- a8. Describe in what ways the current cost accounting framework differs from conventional accounting.
- a9. Identify the special difficulties involved in undertaking international business strategy analysis.
- a10. State the steps involved in conducting an accounting analysis.

#### b. Intellectual Skills

*On completing the course, the student should be able to:*

- b1. Interpret different international accounting aspects.
- b2. Analyze the similarities and differences among the accounting systems Europe, the Americas and Asia
- b3. Interpret different Approaches for recording foreign transactions.
- b4. Evaluate which of the available foreign currency translation methods are best under which specific business and currency market conditions
- b5. Compare and contrast the financial statement effects of the temporal versus the current rate method of foreign currency translation.
- b6. Interpret how and why adjustments for changing prices may vary from country to country.
- b7. Apply several coping mechanisms available to deal with cross-country accounting

measurement differences.

b8. Prepare Income Statement, and Balance Sheet Using Different Translation Methods.

**c. Practical / Professional Skills**

---

*On completing the course, the student should be able to:*

c1. Report Foreign Transactions Using Different Methods.

c2. Using Different Translation Methods to evaluate Income Statement, and Balance sheets for different organizations.

c3 Examine, Show and Employ Different Theories for Translation Problems.

**d. General and Transferable Skills**

---

*On completing the course, the student should be able to:*

d1. Manage accounting problems.

d2. Innovate critical thinking skills in determining a solution for accounting problems.

d3. Enable students to communicate effectively when dealing with international accounting issues.

## II. Overall Aims of the Course

**Upon completion of this course, students will be able to:**

- Understand various types of risks and methods of handling such risks.
- Present risk management process.
- Analyze different insurance contracts and premiums

### III. Program ILOs Covered by the Course

Program ILOs Covered by the Course			
Knowledge and Understanding	Intellectual Skills	Practical / Professional Skills	General and Transferable Skills
a5, a11	b5	c3,c15	d4, d6, d10

### IV. Intended Learning Outcomes of the Course (ILOs)

#### a. Knowledge and Understanding

*On completing the course, the student should be able to:*

- a1. Explain the meaning of risk and the different types of risks.
- a2. List the five steps of risk management process.
- a3. Outline different risk handling techniques.
- a4. Specify the main feature of insurance industry and the role of insurance towards financial development and stabilization.
- a5. Identify the difference between financial and legal definition of insurance.
- a6. State the requirements for legal insurance contract and the main parts of any insurance contract.
- a7. Discuss the importance of marketing and underwriters in insurance operations.
- a8. Define gambling
- a9. Discuss how insurance and gambling are different
- a10. Demonstrate the concept of life insurance and life tables.
- a11. Determine the different types of insurance policies and calculating premiums of life insurance.

#### b. Intellectual Skills

*On completing the course, the student should be able to:*

- b1. Illustrate why insurance consumers are not well informed about insurance market
- b2. Analyze the difference between insurance and hedging techniques
- b3. Calculate insurance premiums.
- b4. Evaluate the insurance contracts from legal and financial perspectives.
- b5. Demonstrate insurance operation framework before and after selling insurance policy.
- b6. Use reinsurance concept in explaining its role in preventing bankruptcy for some insurance firms.
- b7. Assess the role of reinsurance in supporting insurance operations in catastrophic events.
- b8. Select the best insurance policy that can minimize the identified risk.
- b9. Explain how current trends and global events lead to the development of new insurance policies.
- b10. Demonstrate employment and individual risk management, its importance, and methods of calculating premiums in life insurance.

**c. Practical / Professional Skills**

*On completing the course, the student should be able to:*

- c1. Use different problem-solving techniques and scientific thinking.
- c2. Prepare risk management plan that suits different organizations.
- c3. Choose the best risk handling techniques that minimize business risks.
- c4. Use real world examples to understand how insurance contracts are different based on risk being insured.
- c5. Discuss different risks related to job
- c6. Link the concepts of moral hazards to life and property insurance
- c7. Write reports effectively

**d. General and Transferable Skills**

*On completing the course, the student should be able to:*

- d1. Communicate effectively in a group
- d2. Manage tasks, time, and resources effectively.
- d3. Participating in group discussions and take responsibility of their own self learning
- d4. Manage time effectively

## II. Overall Aims of the Course

This module aims at providing the students with the skills necessary for decision-making in corporations and different institutions include the investments and financing decisions in both the long-term and the short-term. For long-term investment decisions, different techniques for capital budgeting cost of capital, leverage, capital structure and dividends policy will be discussed. On the other hand, short term financial decisions will relate to working capital and current assets management topics.

### III. Program ILOs Covered by the Course

Program ILOs Covered by the Course			
Knowledge and Understanding	Intellectual Skills	Practical / Professional Skills	General and Transferable Skills
a11, a15, a19	b4, b6	c6, c13, c14	d4, d5, d8, d9

### IV. Intended Learning Outcomes of the Course (ILOs)

#### a. Knowledge and Understanding

*On completing the course, the student should be able to:*

- a1. Identify the meaning and fundamentals of risk, return, and risk preferences.
- a2. Describe procedures for assessing and measuring the risk of both a single asset and a portfolio.
- a3. Discuss the concept of diversification.
- a4. Explain the capital asset pricing model (CAPM), its relationship to the security market line (SML), and the major forces causing shifts in the SML.
- a5. Define the basic concept and sources of capital associated with the cost of capital.
- a6. Identify the capital budgeting process and the various categories of capital projects.
- a7. Outline the three major cash flow components.
- a8. Define leverage, business risk, sales risk, operating risk and financial risk
- a9. Discuss working capital management, net working capital and the related trade-off between profitability and risk.
- a10. Outline inventory management; differing views and common techniques.
- A11. Identify cash payout procedures, their tax treatment, and the role of dividend reinvestment plans.
- a12. Explain the differences between stock splits and stock dividends.

#### b. Intellectual Skills

*On completing the course, the student should be able to:*

- b1. Measure the expected return, the standard deviation and the coefficient of variation of different assets
- b2. Assess the return and the risk of individual assets and portfolios.
- b3. Calculate the cost of debt using the approximation formula, cost of preferred stock and the cost of equity capital using the capital asset pricing model approach and the dividend discount model approach.
- b4. Interpret the beta and the weighted average cost of capital (WACC) for a project.
- b5. Calculate Net present value (NPV), internal rate of return (IRR), payback period and profitability index (PI) of a single capital project
- b6. Evaluate the initial investment, the relevant operating cash inflows and the terminal cash flow associated with a proposed capital expenditure.
- b7. Analyze the effect of financial leverage on a company's net income and return on equity.
- b8. Interpret the operating breakeven quantity of sales.
- b9. Measure the degree of operating leverage, the degree of financial leverage and the

- degree of total leverage
- b10. Contrast the aggressive and conservative funding strategies.
  - b11. Calculate the operating and cash conversion cycles.
  - b12. Determine the economic order quantity under different situations.
  - b13. Compute cash dividends and stock dividends

**c. Practical / Professional Skills**

---

*On completing the course, the student should be able to:*

- c1. Choose the best asset based on its risk and return
- c2. Construct efficient portfolios that earn highest return relative to risk.
- c3. Assess the long-term investments acceptability based on their cost of capital.
- c4. Contrast the NPV decision rule to the IRR decision rule when evaluating independent and mutually exclusive projects.
- c5. Apply different techniques to choose best project among different investment alternatives.
- c6. Analyze the effect of financial leverage on a company's net income and return on equity.
- c7. Explore the tradeoff between profitability and risk.
- c8. Report the key strategies for managing the cash conversion cycle.
- c9. Identify the factors affecting dividend policy.
- c10. Analyze the effect on the equity accounts under stock split and stock dividend.
- c11. Evaluate the three basic types of dividend policies

**d. General and Transferable Skills**

---

*On completing the course, the student should be able to:*

- d1. Communicate effectively.
- d2. Develop models to take investment decisions
- d3. Use the Internet to acquire relevant financial information

## II. Overall Aims of the Course

This course enables the student to understand chartering new financial-service institutions and establishing branches, ATMs, telephone services, and Web Sites. The students should be able to understand the financial statements, liquidity management, loans and discounts, interest rates, credit analysis, the types of deposit accounts offered, pricing deposit services, types of business loans and their pricing.

### III. Program ILOs Covered by the Course

Program ILOs Covered by the Course			
Knowledge and Understanding	Intellectual Skills	Practical / Professional Skills	General and Transferable Skills
a9, a14	b4, b11	c6, c18	d1, d4, d5, d8, d9

### IV. Intended Learning Outcomes of the Course (ILOs)

#### a. Knowledge and Understanding

*On completing the course, the student should be able to:*

- a1. Explain how the commercial banks integrate into the overall financial system.
- a2. Identify modern banking services and products.
- a3. Discuss issues covering the monitoring, regulation, structure, conduct and performance of depository financial institutions.
- a4. Comprehend an understanding of the financial statements published by modern commercial banks
- a5. Describe the return on equity model and measures used in evaluating the performance of depository financial institutions.
- a6. Discuss different strategies of modern banking organization.
- a7. Explain different causes and consequences of various issues, events and crises caused by or effect on depository institutions.
- a8. Discuss the corporate governance rules and principles that govern the banking sector

#### b. Intellectual Skills

*On completing the course, the student should be able to:*

- b1. Analyze the role of depository fanatical institutions as a sub-system of the whole financial sector.
- b2. Compare different commercial banking services with those delivered by different depository and non-depository financial institutions, and its relative importance as an income source for these commercial banks.
- b3. Evaluate the different consequences of a given financial regulation/policy on the functions of depository financial institutions.
- b4. Interpret financial information for depository financial institutions.
- b5. Calculated profitability ratios of the given financial statements of commercial banks
- b6. Relate the performance of given commercial bank against its historical performance, or the competitor's performance, with industry performance benchmark.
- b7. Assess pros. and cons. for different organization strategies for commercial banks
- b8. Analyze causes and consequences of a given issues, events, crises facing depository financial institutions.

#### c. Practical / Professional Skills

*On completing the course, the student should be able to:*

- c1. Practice the empirical foundations upon which practices in depository financial institutions are based and the factors that influence decision making within these contexts.
- c2. Apply quantitative techniques and tool to evaluate the performance of commercial banks.
- c3. Evaluate given depository financial institution's performance against its historical

performance and/or the competitor performance.  
 c4. Exploiting the common conceptual framework outlined in the course (finance theory and managerial theory) to be able to understand and analyses the modern depository financial institution in a changing world of technology, IC and markets

**d. General and Transferable Skills**

*On completing the course, the student should be able to:*

- d1. Develop self-learning practices
- d2. Communicate effectively and clearly in written and oral formats
- d3. Develop independent study and carry out research.

## I. Course Information

Course Code	FIN 303	Course Name	Investment and Portfolio Management		
Level	3	Specialization	Finance		
Department Offering the Course	Business Administration				
Credit Hours	<i>Credit Hours</i>				
	Total Credit Hours	Theoretical	Tutorial	Practical	
	3	3	1	-	
	<i>Contact Hours</i>				
Contact Hours	Theoretical	Tutorial	Practical		
4	3	1	-		
Course Prerequisite(s)	Corporate Finance (FIN 201)				
Approval Date Of course Specification	18/7/2022				

## II. Overall Aims of the Course

The objective of the course is to study theory and empirical evidence relevant to portfolio management. An emphasis is placed on understanding how an investment professional would allocate funds in a hypothetical portfolio.

### III. Program ILOs Covered by the Course

Program ILOs Covered by the Course			
Knowledge and Understanding	Intellectual Skills	Practical / Professional Skills	General and Transferable Skills
a19	b8	c6, c13, c14	d4, d5, d8

### IV. Intended Learning Outcomes of the Course (ILOs)

#### a. Knowledge and Understanding

*On completing the course, the student should be able to:*

- a1. Define investment and the factors that contribute to the rate of returns which the investors require on alternative investments.
- a2. Describe the steps in the portfolio management process.
- a3. Explore the meaning of risk aversion and the evidence that indicates that investors are generally risk averse.
- a4. Explain the selection of an optimal portfolio, given an investor's utility (or risk aversion) and the capital allocation line.
- a5. Define the capital market theory and how does it extend Markowitz portfolio theory.
- a6. Discuss the CAPM assumptions and the impact of relaxing these assumptions.
- a7. Identify the Arbitrage pricing theory, its strengths and weaknesses.
- a8. Determine the value of bonds, preferred stocks and common stocks.
- a9. List the approaches to the valuation of common stocks.
- a10. Specify the performance measured techniques.

#### b. Intellectual Skills

*On completing the course, the student should be able to:*

- b1. Differentiate between the types of risks that increase the uncertainty of the asset's rate of return.
- b2. Compute historical and expected returns, as well as risk measures.
- b3. Assess the standard deviation, covariance of returns and the coefficient of variation for stocks.
- b4. Calculate beta coefficient for stocks.
- b5. Compare between the estimated intrinsic values of an investment with its prevailing market price to take a decision.
- b6. Evaluate the fair value of stocks and bonds.
- b7. Estimate the major inputs to the stock valuation models.
- b8. Calculate the Sharp ratio, Treynor ratio, Jensen's Alpha and information ratio to measure the portfolio performance.

**c. Practical / Professional Skills**

---

*On completing the course, the student should be able to:*

- c1. Report the macroeconomics & microeconomics factors that contribute to change in the required rates of return for investment.
- c2. Explore the reason of selecting different portfolios from set of portfolios on the efficient frontier by different investors.
- c3. Interpret the minimum- variance and efficient frontiers of risky assets.
- c4. Differentiate between systematic and systemic risk.
- c5. Use the CAPM assumptions and the impact of relaxing these assets.
- c6. Estimate the expected risk premium of a security of portfolio using multi-factor models.
- c7. Apply the dividend discount model, the present value of operating cash flow technique and the present value of free cash flow to equity technique to the valuation of a firm in addition to the relative valuation approach.
- c8. Interpret the logic of the three- step (top-down) approach.
- c9. Recommend the appropriate approach to the valuation of common stock.
- c10. Estimate the firm's future growth based on history.
- c11. Evaluate how well portfolios of securities are diversified.

**d. General and Transferable Skills**

---

*On completing the course, the student should be able to:*

- d1. Communicate effectively.
- d2. Develop models to take an investment decision
- d3. Use both qualitative methods and problem-solving tools on individual and corporate levels
- d4. Enhance presentation skills.

## II. Overall Aims of the Course

This course is designed to introduce students to the structure, operation, and regulation of modern financial markets. Well-functioning financial markets are essential for the effective allocation and employment of capital. It will consider the mechanisms that have evolved in the equity and debt markets to facilitate this allocation. Students will learn how the money market provides debt claims for short-term money management, how the equity and bond markets provide issuers with long-term financing, how newly created financial assets are introduced through the primary market, and how electronic and floor-based equity markets differ

### III. Program ILOs Covered by the Course

Program ILOs Covered by the Course			
Knowledge and Understanding	Intellectual Skills	Practical / Professional Skills	General and Transferable Skills
a19, a19	b7	c3, c13, c14	d4, d8

### IV. Intended Learning Outcomes of the Course (ILOs)

#### a. Knowledge and Understanding

*On completing the course, the student should be able to:*

- a1. Discuss how the financial markets integrate into the overall economic system.
- a2. Identify the main differences between primary and secondary markets.
- a3. Describe objectives of market regulation.
- a4. Discuss the different types of markets include equities, fixed income, derivatives, and alternative investments.
- a5. Explore the major types of securities, currencies, contracts, commodities, and real assets that trade in organized markets, including their distinguishing characteristics and major subtypes.
- a6. Define market order
- a7. Comprehend an understanding of security market index and the types of the indexes.
- a8. Describe market efficiency and related concepts, including their importance to investment practitioners.
- a9. Explain different causes and consequences of various issues, events, and crises in the world of finance

#### b. Intellectual Skills

*On completing the course, the student should be able to:*

- b1. Contrast between primary markets and secondary markets.
- b2. Distinguish the characteristics and major subtypes of the financial markets.
- b3. Compute the rate of return for different types of orders.
- b4. Calculate the rate of return on a margin transaction, and the security price at which the investor would receive a margin call.
- b5. Calculate the value, price return, and total return of an index.
- b6. Differentiate between the three forms of the efficient market hypothesis.
- b7. Analyze causes and consequences of a given issues, events, crises facing financial markets.
- b8. Link financial crisis to the performance of financial markets.

**c. Practical / Professional Skills**

*On completing the course, the student should be able to:*

- c1. Practice the empirical foundations upon which practices in financial institutions and markets are based and the factors that influence decision making within these contexts.
- c2. Interpret how securities, contracts, and currencies are traded in quote-driven, order-driven, and brokered markets.
- c3. Execute different types of orders
- c4. Interpret the value, price return, and total return of an index
- c5. Contrast weak-form, semi-strong-form, and strong-form market efficiency.
- c6. Use lessons learned from previous financial crisis to different institutional reforms that must be adopted to mitigate its adverse effects and prevent reoccurrence.

**d. General and Transferable Skills**

*On completing the course, the student should be able to:*

- d1. Communicate effectively.
- d2. Acquire analytical reasoning skills, numeric and clear effective communication skills.
- d3. Manage tasks, time, and resources effectively.
- d4. Develop presentation skills.

<b>Course Prerequisite(s)</b>	Introduction to Marketing (MKT 201)				
<b>Approval Date of Course Specification</b>	18/7/2022				

## II. Overall Aims of the Course

This course will introduce the student to the influence that consumer behavior has on marketing activities. Students will apply theoretical concepts to marketing strategies and decision-making. Topics include consumer and market segments, environmental influences, individual determinants, decision processes, information research and evaluation.

### III. Program ILOs Covered by the Course

Program ILOs Covered by the Course			
Knowledge and Understanding	Intellectual Skills	Practical / Professional Skills	General and Transferable Skills
a2, a3, a11	b5, b6, b10 b12	c2, c16	d1, d2, d3, d4, d9, d10

### IV. Intended Learning Outcomes of the Course (ILOs)

#### a. Knowledge and Understanding

*On completing the course, the student should be able to:*

- a1. Define the nature and scope of consumer behavior and its main concepts.
- a2. Describe how trends in Internet usage, green marketing, and cell phone usage affect consumer behavior.
- a3. Discuss how the traditional bases for segmentation can inform marketing strategy.
- a4. Explain the environmental factors that influence consumer decisions.
- a5. Identify the behavioral principles to effectively develop marketing strategies.
- a6. Mention how social, cultural, and family groups can affect consumer behavior.
- a7. Explain the decision-making process consumers go through when buying a product.

#### b. Intellectual Skills

*On completing the course, the student should be able to:*

- b1. Differentiate between the different market segments and their impact on marketing strategies.
- b2. Evaluate the internal and external forces affecting the consumer behavior.
- b3. Interpret the effect of situational influences on consumer behavior.
- b4. Analyze the consumer learning processes and information acquisition.
- b5. illustrate factors that affect the acquisition and consumption and disposing of products and services.
- b6. Evaluate non-purchase elements of consumer behavior (such as shopping behavior, information processing, post-purchase behavior, consumer satisfaction, product disposal etc.).

#### c. Practical / Professional Skills

*On completing the course, the student should be able to:*

- c1. Apply knowledge and skills acquired to explore opportunities as future managers and entrepreneurs.
- c2. Investigate the insights gained from the theoretical concepts to real-world marketing practices and challenges.
- c3. Analyze the social, cultural, and family groups that can affect consumer behavior.
- c4. Assess the role of the Internet and mobile as part of multi-channel shopping.
- c5. Examine the different processes following the Purchase including use, evaluation, and in some cases satisfaction.

**d. General and Transferable Skills**

*On completing the course, the student should be able to:*

- d1. Work effectively and efficiently in teams.
- d2. Encourage critical thinking and communication skills (both written and verbal).
- d3. Develop intellectual and cognitive self-learning and development skills.
- d4. Communicate effectively with others.

	<b>Contact Hours</b>	<b>Theoretical</b>	<b>Tutorial</b>	<b>Practical</b>	
<b>4</b>	<b>3</b>	<b>1</b>	<b>-</b>		
<b>Course Prerequisite(s)</b>	Introduction to Marketing (MKT 201)				
<b>Approval Date of Course Specification</b>	<b>18/7/2022</b>				

## II. Overall Aims of the Course

This course is based on a proactive approach to the management of marketing information and the application of that information to marketing decisions. It aims at providing students with valuable insights concerning markets, customers, products, and business strategy.

### III. Program ILOs Covered by the Course

Program ILOs Covered by the Course			
Knowledge and Understanding	Intellectual Skills	Practical / Professional Skills	General and Transferable Skills
a5, a6, a8	b1, b12	c2, c4, c16	d1, d2, d3, d5, d9, d10

### IV. Intended Learning Outcomes of the Course (ILOs)

#### a. Knowledge and Understanding

*On completing the course, the student should be able to:*

- a1. Explain Basic marketing research concepts and describe the needs of marketing managers for marketing and market information.
- a2. Determine the objectives of the marketing research project.
- a3. Identify the type of research that will best help achieve the objectives.
- a4. Explain each stage of the marketing research process and the decisions that need to be made at each stage of the process.
- a5. Show an understanding of questionnaire design and sampling theory
- a6. Manage and execute service framework
- a7. Describe questionnaire design and sampling theory.
- a8. Identify how to write a good marketing research proposal.
- a9. Write reports that convey marketing information simply and effectively and encourage marketing action.

#### b. Intellectual Skills

*On completing the course, the student should be able to:*

- b.1. Develop skills in the process of problem identification,
- b.2. Illustrate the appropriate marketing research techniques needed to achieve a research objective.
- b.3. Practice critical analysis and problem-solving competencies in marketing research
- b.4. Apply logical thinking to solve Marketing problems
- b.5. Interpret findings and make recommendations.

#### c. Practical / Professional Skills

*On completing the course, the student should be able to:*

- c1. Display problem analysis skills and an ability to translate a management problem into a feasible research question.
- c2. Demonstrate a working knowledge of the concepts and methods of marketing research.
- c3. Design a research program to achieve a specific research objective.
- c4. Apply with an increased sensitivity the biases and limitations of marketing data.
- c5. Use examples from current events and real-world marketing situations to apply, illustrate, and discuss different marketing research problems.
- c6. Design a questionnaire.

**d. General and Transferable Skills**

*On completing the course, the student should be able to:*

- d1. Collaborate effectively by working as a part of a team, undertaking and managing teamwork tasks.
- d2. Communicate through oral presentations and written submissions to an informed audience.
- d3. Build writing, speaking and analytical skills
- d4. Develop critical thinking skills.

Program ILOs Covered by the Course			
Knowledge and Understanding	Intellectual Skills	Practical / Professional Skills	General and Transferable Skills
A4, a11	b5, b12	c16	d1, d2, d3, d4, d5, d9, d10

### IV. Intended Learning Outcomes of the Course (ILOs)

#### a. Knowledge and Understanding

*On completing the course, the student should be able to:*

- a1. Discuss the marketing strategy concepts and theories.
- a2. Integrate the elements of the different levels of strategy with a profound focus on the marketing strategy.
- a3. Identify the dimensions of dynamic market environments and the process of developing marketing strategies.
- a4. Explain the resource allocation models used in different organizations.
- a5. State the environmental key factors for understanding competitive dynamics.

#### b. Intellectual Skills

*On completing the course, the student should be able to:*

- b1. Analyze the issues associated with planning, implementing, and controlling marketing strategies and programs.
- b2. Compare between different tools the organization use to gain competitive advantage in the marketplace.
- b3. Evaluate strategic options for a firm given an understanding of a segmented market context.
- b4. Use available data to justify evidence-based marketing strategy decisions.

#### c. Practical / Professional Skills

*On completing the course, the student should be able to:*

- c1. Apply marketing strategy related knowledge and technical skills to resolve problems and make ethical decisions across a range of institutional, national, and global contexts
- c2. Use initiative, creativity, and judgement to plan and implement marketing strategy related professional projects.
- c3. Apply theoretical framework to real world marketing problems.

#### d. General and Transferable Skills

*On completing the course, the student should be able to:*

- d1 Build writing, speaking, discussion and analytical skills.
- d2 Apply personal and interpersonal skills appropriate to being an effective member of a marketing team.
- d3 Communicate effectively with different audiences, recognizing and respecting various norms
- d4 Develop skills of critical and reflective thinking.

## V. Course Matrix Content

Week No	Main Topic	Credit Hours: 3H		Course ILOs Covered by Topic (By ILO Code)			
		Theoretical	Practical	K.U.	I.S	P.P.S.	G.T.S
1	Three Levels of Strategy: Similar Components but Different Issues	3	1	a1,a2	b1		
2	Marketing's Role in Formulating and Implementing Strategies	3	1	a1,a2	b1		
3	Formulating and Implementing Marketing Strategy— An Overview of the Process	3	1	a1,a2	b1		
4	Corporate Scope—Defining the Firm's Mission and objectives	3	1	a1-a3	b1 ,b2		
5	Corporate Growth Strategies	3	1	a5	b2, b3		
6	Allocating Corporate Resources	3	1	a4	b3, b4		
7	Strategic Decisions at the Business-Unit Level	3	1	a1, a2	b3 -b4		
8	<b>Mid – term Exams</b>						
9	How Do Businesses Compete?	3	1	a5	b1 -b2		
10	The Fit Between Business Strategies and the Environment	3	1	a3 – a5	b2 -b3		
11	Understanding Market Opportunities	3	1	a3 – a5	b2 -b3		
12	Targeting Attractive Market Segments	3	1	a5	b3 -b4		
13	Project presentation	3				c1 - c3	d1– d4
14 - 15	<b>Final Exams</b>						
	<ul style="list-style-type: none"> <li>• <b>G.T.S:</b> General and Transferable Skills</li> <li>• <b>I.S:</b> Intellectual Skills</li> </ul>			<ul style="list-style-type: none"> <li>• <b>P.P.S. :</b> Practical / Professional Skills</li> <li>• <b>K.U. :</b> Knowledge and Understanding</li> </ul>

Minor – Management Information system  
Course Specification

## I. Course Information.

Course Code	MIS302	Course Name	E-Commerce		
Level	Third	Specialization	Management Information Systems		
Department Offering the Course	Management and Information System Department				
Credit Hours	<i>Credit Hours</i>				
	Total Credit Hours 3	Theoretical 3	Tutorial -	Practical 1	
Credit Hours	<i>Contact Hours</i>				
	Contact Hours 4	Theoretical 3	Tutorial -	Practical 1	
Course Prerequisite(s)	MIS 201				
Approval Date of Course Specification	7/9/2021				

## II. Overall Aims of the Course

Upon completion of this course, students will be able to:

- Use Knowledge, Skills, practices, and competence in the field of E-commerce to evolve business
- Identify key elements of E-commerce infrastructure
- Evaluate the different E-commerce business models
- Discuss different marketing and advertising technologies
- Carry out a self-learning and research in E-Commerce

### III. Program ILOs Covered by the Course

Program ILOs Covered by the Course			
Knowledge and Understanding	Intellectual Skills	Practical / Professional Skills	General and Transferable Skills
a2, a3, a5, a10, a11	b2, b3, b13, b14	c1, c5, c9, c12, c14	d2, d3, d6, d8

### IV. Intended Learning Outcomes of the Course (ILOs)

#### a. Knowledge and Understanding

*On completing the course, the student should be able to:*

- a1. Explain what E-Commerce is and describe different types of E-commerce.
- a2. Specify the Eight Unique Features of E-Commerce.
- a3. Describe E-Commerce Technologies (Packet switching – TCP/IP – IP Address – URL – Cloud Computing – Web 2.0).
- a4. Describe the e-commerce life cycle.
- a5. Specify the key elements of E-Commerce business models, and different B2C business models.
- a6. Discuss the different dimensions of E-Commerce Security.
- a7. Define different security threats, and how to secure E-commerce web sites.
- a8. Explain the social, mobile, and local marketing and advertising.

#### b. Intellectual Skills

*On completing the course, the student should be able to:*

- b1. Analyze different E-commerce business processes and models.
- b2. Distinguish the appropriate practices that enable the organization to transform its business
- b3. Choose solutions for enhancing E-commerce systems in organizations
- b4. Suggest various security measures for E-commerce systems.
- b5. Appraise E-commerce, and marketing to achieve competitive advantages

#### c. Practical / Professional Skills

*On completing the course, the student should be able to:*

- c1. Design and develop e-commerce website
- c2. Write report about the needed information to build e-commerce system.
- c3. Practice on how to Present e-commerce websites and apply different revenue models.

#### d. General and Transferable Skills

*On completing the course, the student should be able to:*

- d1. Communicate effectively with others
- d2. Apply the English language fluency
- d3. Innovate creative development work techniques
- d4. Work within group

## V. Course Matrix Content

No. of weeks	Main Topic	Credit Hours: 3H		Course ILOs Covered by Topic (By ILO Code)			
		Theoretical	Practical	K.U.	I.S	P.P.S.	G.T. S
1	Introduction to course Syllabus	3	1	a1			
2	What is E-commerce, The Difference Between E-commerce and E-business, E-commerce Technology Why Study E-Commerce?, Unique Features of E-commerce Technology	3	1	a1, a2			
3	Types of E-commerce Understanding E-commerce: organizing Themes- Case Study	3	1	a2	b2		
4	E-commerce Infrastructure (The Internet- TCP/IP Architecture and Protocol Suite Client/Server Computing - Cloud Computing -Web Servers and Web Clients- Web 2.0 Features and Services)	3	1	a3	b2		
5	E-commerce Presence Map, SWOT Analysis The Systems Development Life Cycle, Basic Functionality Needed for E-commerce	3	1	a4	b1	c1,c2	d1,d4

Course Prerequisite(s)	MIS201				
Approval Date of Course Specification	18/7/2022				

## II. Overall Aims of the Course

**Upon completion of this course, students will be able to:**

- Explain basic database concepts and terminology
- Identify information needs within an organization
- Formulate user and organizational requirements for a database
- Design a conceptual model that satisfies these needs and requirements using a relational data / entity relationship model
- Design SQL queries for a relational database to satisfy users' information needs

### III. Program ILOs Covered by the Course

Program ILOs Covered by the Course			
Knowledge and Understanding	Intellectual Skills	Practical / Professional Skills	General and Transferable Skills
a10	b4, b14	c5, c12, c13, c14	d2, d3, d7, d8

### IV. Intended Learning Outcomes of the Course (ILOs)

#### a. Knowledge and Understanding

*On completing the course, the student should be able to:*

- a1. Explain the importance of database systems and the difference between file management and database.
- a2. Define the basic concepts surrounding a relational database.
- a3. Describe the concept of the entity-relationship modeling.
- a4. Explain the normalization methods of database tables.

#### b. Intellectual Skills

*On completing the course, the student should be able to:*

- b1. Distinguish attributes, components, relationships, patterns, main ideas, and errors.
- b2. Compare a range of solutions and critically evaluate and justify proposed design solutions.
- b3. Appraise a range of DB-solutions and critically evaluate them and justify proposed design and development solutions.
- b4. Formulate the structured language for database manipulation.

#### c. Practical / Professional Skills

*On completing the course, the student should be able to:*

- c1. Draw Entity relationship diagrams
- c2. Recommend the appropriate database schema for the system
- c3. Design and implement a practical database system.
- c4. Apply appropriate database design methodology.
- c5. Use the (DBMSs) effectively.

#### d. General and Transferable Skills

*On completing the course, the student should be able to:*

- d1. Display an integrated approach to the deployment of communication skills.
- d2. Work effectively with database owners and for database users.
- d3. Strike the balance between self-reliance and seeking help when necessary.
- d4. Display personal responsibility by working to multiple deadlines concerning the course requirements.
- d5. Write and deliver coherent and structured technical reports.

## V. Course Matrix Content

No. of weeks	Main Topic	Credit Hours: 3H		Course ILOs Covered by Topic (By ILO Code)			
		Theoretical	Practical	K.U.	I.S	P.P.S.	G.T. S
1	Introduction to Databases and Conceptual Modeling (Part 1)	3	2	a1	b2		d2

## II. Overall Aims of the Course

**Upon completion of this course, students will be able to:**

- Discuss systems' development life cycle.
- Identify systems' characteristics.
- Discuss IS project management.
- Analyze a problem and design an appropriate solution using a set of structured and object-oriented tools and techniques.

### III. Program ILOs Covered by the Course

Program ILOs Covered by the Course			
Knowledge and Understanding	Intellectual Skills	Practical / Professional Skills	General and Transferable Skills
a9, a10, a11, a12, a13, a14	b2, b5, b13	c1, c2, c3, c5, c8, c9, c11, c12, c13, c15	d1, d2, d3, d4, d5, d6, d8, d9, d10

### IV. Intended Learning Outcomes of the Course (ILOs)

#### a. Knowledge and Understanding

*On completing the course, the student should be able to:*

- a1. Discuss the steps of information systems development life cycle and the various tools for analysis, design, implementation, documentation, and project management.
- a2. Describe the tools and techniques of information system analysis and design.
- a3. Describe the interrelationship between employer, managers, employees, and workers in organization.
- a4. Identify principles and practices of business process modeling.
- a5. Explain the structured and object-oriented approaches covered by Unified Modelling Language (UML) that are used in information systems analysis and design.

#### b. Intellectual Skills

*On completing the course, the student should be able to:*

- b1. Evaluate management information systems and suggest solutions for enhancing systems in organizations.
- b2. Design a proposal and a project plan for management information systems for various types of business types.
- b3. Design feasibility studies for management information systems projects.
- b4. Analyze system requirements using process and data modeling tools.

#### c. Practical / Professional Skills

*On completing the course, the student should be able to:*

- c1. Use organizational resources (physical, financial, human....etc.) with the objective of its sustainable development.
- c2. Design systems and tools as response to information needs to enhance organization performance.
- c3. Develop strategic plan for management information systems integration and operation within organizations.
- c4. Gather data to analyze and define the functional and non-functional requirements of an information system.
- c5. Build structured and object-oriented models that will assist programmers to develop an information system.
- c6. Prepare proper documentation for each step of the software system development life cycle.

**d. General and Transferable Skills**

*On completing the course, the student should be able to:*

- d1. Communicate effectively with others.
- d2. Respect teamwork.
- d3. Cope up with different presentations and discussion.
- d4. Innovate creative development work techniques.
- d5. Apply the English language fluency.

## I. Course Information

Course Code	MIS 307	Course Name	Operating Systems		
Level	Third	Specialization	Management Information Systems		
Department Offering the Course	Management and Information system				
Credit Hours	<i>Credit Hours</i>				
	Total Credit Hours	Theoretical	Tutorial	Practical	
	3	3	-	2	
	<i>Contact Hours</i>				
Contact Hours	Theoretical	Tutorial	Practical		
5	3	-	2		
Course Prerequisite(s)	MIS 303				
Approval Date of Course Specification	18/7/2022				

## II. Overall Aims of the Course

Upon completion of this course, students will be able to:

- Identify the fundamentals of operating systems concepts.
- Describe the different components of an operating system.
- Explain the concept of resources sharing, systems structures, process management, memory management strategies, and other related topics.
- Compare examples of many real-world operating systems to illustrate fundamental operating-system concepts.

### III. Program ILOs Covered by the Course

Program ILOs Covered by the Course			
Knowledge and Understanding	Intellectual Skills	Practical / Professional Skills	General and Transferable Skills
a10	b11, b14	c12	d1, d4, d5, d6, d8

### IV. Intended Learning Outcomes of the Course (ILOs)

#### a. Knowledge and Understanding

---

*On completing the course, the student should be able to:*

- a1. Describe an operating system and define its components.
- a2. Discuss operating system functions with their different types.
- a3. Explain inter-process communication methods in different operating environments.
- a4. Specify different design issues related to operating systems.
- a5. Explain how an operating system manages multithreading, processes, memory, and I/O devices.
- a6. Explain many real-world operating systems perform multithreading, process scheduling and memory management

#### b. Intellectual Skills

---

*On completing the course, the student should be able to:*

- b1. Compare between types of operating systems.
- b2. Evaluate different types of multithreading models.
- b3. Differentiate between different process management techniques.
- b4. Distinguish between different CPU scheduling algorithms.
- b5. Evaluate different techniques of memory management.

#### c. Practical / Professional Skills

---

*On completing the course, the student should be able to:*

- c1. Practice on different CPU scheduling and memory management algorithms and techniques.
- c2. Examine the performance of an operating system.
- c3. Practice on setup and tune the settings of different most popular real-world operating systems such as Linux.
- c4. Practice on how to perform process management, memory management, mass storage management using popular efficient operating systems such as Linux.

**d. General and Transferable Skills**

*On completing the course, the student should be able to:*

- d1. Manage time effectively.
- d2. Develop intellectual and cognitive self – learning and development skills.
- d3. Use problem solving tools on individual and corporate levels.
- d4. Cope up with different presentations and discussion.
- d5. Innovate creative development work techniques.

## V. Course Matrix Content

No. of weeks	Main Topic	Credit Hours: 3H		Course ILOs Covered by Topic (By ILO Code)			
		Theoretical	Practical	K.U.	I.S	P.P.S.	G.T. S
1	Course Overview and Syllabus Review	3	2	a1			
2	Introduction to operating systems (Part 1)	3	2	a1, a2	b1		
3	Introduction to operating systems (Part 2)	3	2	a1, a2	b1		d5
4	System Structures (Part 1) - Operating System Services (functions) - User Operating System Interface - System Calls	3	2	a1, a2, a4	b1	c2	
5	System Structures (Part 2) - Operating System Structure (MS-DOS, UNIX, Mac OS, Android) o Simple Structure o Layered Approach o Microkernel System Structure o Modules o Hybrid Systems Virtual Machines	3	2	a1, a2, a4	b1	c2	d1, d5
6	Process Concept (Part 1) - Process Concept Process Scheduling	3	2	a3, a4, a6	b1	c1	

7	Process Concept (Part 2) - Inter-process Communication Communications in Client-Server Systems	3	2	a3, a4, a6	b1	c1	d1 - d5
8	<b>Mid-term Exams</b>						
9	Multithreading Programming - Multicore Programming - Multithreading Models - Thread Libraries - Threading Issues Operating System Examples	3	2	a4- a6	b2	c2	d1 - d5
10	Process Scheduling (Part 1) - Basic Concepts - Scheduling Criteria - Scheduling Algorithms Thread Scheduling	3	2	a4,-a6	b3,b4	c1, c2, c4	
11	Process Scheduling (Part 2) - Multiple-Processor Scheduling - Real-Time CPU Scheduling Operating Systems Examples	3	2	a4,-a6	b3,b4	c1, c2, c4	d1 - d5
12	Memory Management Strategies (Part 1) - Background - Swapping - Contiguous Memory Allocation Segmentation	3	2	a4,-a6	b5	c1, c2, c4	d1 - d5
13	Memory Management Strategies (Part 2) - Paging - Structure of the Page Table Revision	3	2	a4,-a6	b5	c1, c2, c4	
14-15	<b>Final exams</b>

## II. Overall Aims of the Course

**Upon completion of this course, students will be able to:**

- Describe the foundations and key issues of managerial decision making.
- Explain the main concepts of Decision Support System (DSS) and Management Sciences
- Discuss the knowledge needed to use management information system in different business processes to solve management problems and support decision in all managerial levels.
- Explain key areas contributing to DSS such as knowledge acquisition, expert systems, and knowledge base systems
- Practice the essential skills to design management information systems and suggest organization structures and business process for different business functions within organizations.

### III. Program ILOs Covered by the Course

Program ILOs Covered by the Course			
Knowledge and Understanding	Intellectual Skills	Practical / Professional Skills	General and Transferable Skills
a2, a10	b1, b2, b4, b14	c3, c6, c9, c12	d1, d2, d4, d5, d6

### IV. Intended Learning Outcomes of the Course (ILOs)

#### a. Knowledge and Understanding

*On completing the course, the student should be able to:*

- a1. Discuss the complexity of today's business environment and describe how organizations survive and even excel in such an environment.
- a2. Identify the difficulties in managerial decision making today.
- a3. Discuss the foundations and key issues of managerial decision making.
- a4. Specify the major frameworks of computerized decision support: decision support systems (DSS) and business intelligence.
- a5. Describe the foundations, definitions, and capabilities of decision support systems (DSS) and business intelligence (BI)
- a6. Describe DSS components and technology levels.
- a7. Explain the importance of databases and database management.
- a8. Describe data mining as an enabling technology for business intelligence.
- a9. Explain the role of data warehouses in decision support.
- a10. Identify the major tools of computerized decision support.
- a11. Define data mining software tools.

#### b. Intellectual Skills

*On completing the course, the student should be able to:*

- b1. Analyze the scientific practices and approaches.
- b2. Interpret the different approaches of creative thinking.
- b3. Classify the various forms of mathematical and analytical approaches and their interpretations.
- b4. Develop analytical reasoning, and problem-solving skills.
- b5. Compare between methods, techniques tools ... etc.

#### c. Practical / Professional Skills

*On completing the course, the student should be able to:*

- c1. Apply the concepts of decision making and modeling as a problem-solving approach.
- c2. Apply business intelligent systems and methodologies to decision making.
- c3. Design and develop decision support systems for specific applications.
- c4. Select appropriate data mining tools and techniques

#### d. General and Transferable Skills

*On completing the course, the student should be able to*

- d1. Communicate effectively with others.
- d2. Develop a range of fundamental research skills, through the use of online resources.
- d3. Innovate creative development work techniques.
- d4. Work in stressful environment and within constraints.
- d5. Cope up with different presentations and discussion skills.

## II. Overall Aims of the Course

This course is designed to teach students to understand the achievement of superior standards of work through identifying the knowledge and skills required for performing jobs effectively inside the workplace. The course acquaints the students with necessary knowledge and skills to measure and evaluate performance

### III. Program ILOs Covered by the Course

Program ILOs Covered by the Course			
Knowledge and Understanding	Intellectual Skills	Practical / Professional Skills	General and Transferable Skills
a11	b12	c10	d1, d2, d4, d5, d6, d8

### IV. Intended Learning Outcomes of the Course (ILOs)

#### a. Knowledge and Understanding

---

*On completing the course, the student should be able to:*

- a1. Define performance management and performance appraisal.
- a2. Explain the aims and characteristics of performance management systems.
- a3. Describe the performance appraisal process.
- a4. Identify the performance management formal and informal methods.
- a5. Discuss the different techniques of data gathering.
- a6. Discuss the various approaches and methods of performance appraisal.
- a7. Determine performance appraisal errors and solutions.
- a8. Emphasize the developmental aspect of performance management

#### b. Intellectual Skills

---

*On completing the course, the student should be able to:*

- b1. Differentiate between performance management and performance appraisal.
- b2. Analyze the relationship between performance management systems and other HR systems.
- b3. Design the performance management process.
- b4. Interpret performance appraisal methods and approaches.
- b5. Choose the best techniques for performance appraisal interviews.
- b6. Suggest the best solution for performance appraisal errors.
- b7. Detect employees' developmental needs and suggest corrective actions.

#### c. Practical / Professional Skills

---

*On completing the course, the student should be able to:*

- c1. Design effective performance appraisal standards
- c2. Apply the performance evaluation analysis.
- c3. Prepare Performance appraisal methods
- c4. Present performance management results
- c5. Formulate performance development plans

**d. General and Transferable Skills**

*On completing the course, the student should be able to:*

- d1. Communicate performance results in interactive business discussions
- d2. Use the various appraisal methods.
- d3. Develop an improvement plan for an employee.
- d4. Work using Information Technology to Support Performance Management
- d5. Manage time effectively

## V. Course Matrix Content

## II. Overall Aims of the Course

This course aims at acquainting the students with basic knowledge needed to plan the acquisition of human resources based on anticipated corporate productivity needs, the provisions, impact of human rights, pay equity, employment equity, freedom of information measures. In addition, it provides the students with the main recruitment and selection techniques and their strengths and weaknesses.

### III. Program ILOs Covered by the Course

Program ILOs Covered by the Course			
Knowledge and Understanding	Intellectual Skills	Practical / Professional Skills	General and Transferable Skills
a4, a11	b13	c1, c16	d3, d4, d5, d10

### IV. Intended Learning Outcomes of the Course (ILOs)

#### a. Knowledge and Understanding

- 
- a1. Explain the difference between recruitment and selection.
  - a2. Identify the various forms of internal and external recruitment.
  - a3. Mention suitable job advertisement for a vacancy.
  - a4. Discuss best practices methods for selecting applicants.
  - a5. Define objectives for human resources management strategy.
  - a6. Determine different types of interviews.
  - a7. Outline job matching for selecting applicants.
  - a8. Discuss psychometric tests.
  - a9. Discuss E-recruitment practices.

#### b. Intellectual Skills

---

*On completing the course, the student should be able to:*

- b1. Interpret the various forms of external recruitment.
- b2. Evaluate the internal recruitment methods.
- b3. Design an effective job advertisement.
- b4. Analyze selection methods and techniques.
- b5. Choose best practice standards for human resource management strategy.
- b6. Differentiate between methods of interviews.
- b7. Suggest appropriate job matching techniques.
- b8. Compare between different types of psychometric tests.
- b9. Analyze the advantages and disadvantages of E-recruitment.

#### c. Practical / Professional Skills

---

*On completing the course, the student should be able to:*

- c1. Design process for recruitment and selection.
- c2. Present job advertisement.
- c3. Relate the various types of job matching techniques.

#### d. General and Transferable Skills

---

*On completing the course, the student should be able to:*

- d1. Use problem solving tools
- d2. Develop oral fluency skills.
- d3. Lead a team-building activity discuss how collaboration helped the team to be successful.
- d4. Manage time effectively.

## II. Overall Aims of the Course

This course introduces students to fundamental concepts of Human Resources planning and provides them with an understanding of the wide range of staffing activities within both commercial and industrial organizations. This course develops students' abilities to analyze and integrate the complex social, cultural and organizational factors influencing Human Resources planning and staffing

### III. Program ILOs Covered by the Course

Program ILOs Covered by the Course			
Knowledge and Understanding	Intellectual Skills	Practical / Professional Skills	General and Transferable Skills
a11	b1, b3, b13	c16	d2, d4, d5, d10

### IV. Intended Learning Outcomes of the Course (ILOs)

#### a. Knowledge and Understanding

---

*On completing the course, the student should be able to:*

- a1. Describe the practice and study of Human Resources Planning.
- a2. List the latest development in the field of Human Resources Management
- a3. Identify the required specialist knowledge and contemporary concepts in the areas of Human Resources Planning
- a4. Identify the role of Human Resources Planning research in the 21st century, its research and its impact increasing contribution on the local, regional, and international economy and the difference between them.
- a5. Distinguish Human Resources Planning from other forms of human resources practices.

#### b. Intellectual Skills

---

*On completing the course, the student should be able to:*

- b1. Discover the Human Resources Planning environmental challenges.
- b2. Analyze a company's Strategic plan that will be used to organize the material presented in the course.
- b3. Compare between quantitative methods and qualitative methods in HR forecasting.
- b4. Differentiate the roles and characteristics of HR forecasters.

#### c. Practical / Professional Skills

---

*On completing the course, the student should be able to:*

- c1. Examine solutions to Human Resources Planning problems in real world situations.
- c2. Apply internal and external factors or determinants that affect HRP.
- c3. Use Special Applications of Human Resources Planning (HRP at National Level, HRP at the Sectoral Level, HRP at the Industry Level, HRP at the Unit Level, HRP at the Departmental Level) such as web-based HR, Enterprise portals, self- service, HRIS

**d. General and Transferable Skills**

*On completing the course, the student should be able to:*

- d1. Communicate and lead effectively with others in the area of Human resources Management.
- d2. Manage different project oral discussion and build managerial skills in the field of Human resources Management through case studies such as (Forecasting for home support workers, Ontario power generation, HR planning at M&K)
- d3. Develop critical thinking techniques.

## II. Overall Aims of the Course

The course content identifies training and development needs through needs assessments, analysis of jobs and tasks to determine training and development objectives, developing appropriate training objectives, designing effective training and development programs using different techniques or methods

### III. Program ILOs Covered by the Course

Program ILOs Covered by the Course			
Knowledge and Understanding	Intellectual Skills	Practical / Professional Skills	General and Transferable Skills
a3, a4, a11, a12, a14, a15, a16	b1, b2, b3, b5, b6, b7, b8, b9	c1, c2, c3, c4, c5, c7, c8, c15, c18	d1, d4, d8, d9, d10

### IV. Intended Learning Outcomes of the Course (ILOs)

#### a. Knowledge and Understanding

- 
- a1. Define the concept and concept of training and development.
  - a2. Describe training need assessment process.
  - a3. Explain training and curriculum objectives.
  - a4. Identify training and development methods and plans.
  - a5. Discuss appropriate presentation aids for training and development.
  - a6. Explain training session and training outcomes.

#### b. intellectual skills

---

*On completing the course, the student should be able to:*

- b1. Interpret training and development process.
- b2. Analyze training task.
- b3. Design the most suitable curriculum for training.
- b4. Select the best training methods.
- b5. Differentiate between types of presentation aids.
- b6. Develop training plans formats.
- b7. Evaluate training learning outcomes and sessions.

#### c. Practical / Professional Skills

---

*On completing the course, the student should be able to:*

- c1. Prepare a framework for a training process.
- c2. Design task analysis.
- c3. Practice the best training methods.
- c4. Use the most valid presentation aids in training.
- c5. Apply training and development plans.
- c6. Report the training sessions and learning outcomes.

#### d. General and Transferable Skills

---

*On completing the course, the student should be able to:*

- d1. Innovate a range of skills that can assist in future career.
- d2. Manage teamwork as well as oral and written communications.
- d3. Use the ability to think rationally and strategically as a decision maker.
- d4. Communicate effectively.
